Preface	1
Introduction.....	1
PART I - Oil from Coal	
Processing, Synthetic Fuels Demonstration Plant, Louisiana, Mo.....	1
Coal-Hydrogenation Demonstration Plant.....	1
Operations.....	1
Liquid-phase run 8 (Lake DeSmet coal).....	1
Liquid-phase run 9 (Pittsburgh-seam coal).....	5
Vapor-phase run 4 (Lake DeSmet and Illinois oils).....	7
1952 plant improvements and future program.....	12
Comparative evaluation of hydrogenation of two typical midwestern coals, Western Kentucky and Illinois No. 6.....	16
Gas-Synthesis Demonstration Plant.....	17
Coal gasification.....	17
Operation of the oxygen plant.....	19
Operation of the Kerpely producer.....	19
Operation of the purification unit.....	19
Theoretical studies of coal gasification.....	20
Future plans.....	20
Catalyst fusion and reduction.....	20
Fischer-Tropsch synthesis and distillation.....	22
Synthesis run 2.....	22
Synthesis run 3.....	24
Future plans.....	26
Engineering and economic studies for commercial-size operations.....	26
Coal preparation.....	26
Ammonia from coal versus natural gas.....	27
30-ton-per hour coal-hydrogenation plant.....	30
10,000-barrel-per-day gas-synthesis plant.....	32
General description of process.....	32
Description of process by sections.....	34
Coal preparation, feeding, and gasification.....	35
Oxygen plant.....	36
Purification of synthesis gas.....	36
Recovery of sulfur.....	37
Synthesis.....	37
Scrubbing recycle CO ₂	39
Synthesis catalyst plant.....	39
Distillation and light ends recovery.....	40
Catalytic reforming.....	40
Poly plant.....	41
Catalytic-cracking unit.....	41
General.....	42
Power-plant operation.....	42
Safety.....	42
Research and development, Coal-to-Oil Laboratories and Pilot Plants, Bruceton and Pittsburgh, Pa.	43
Synthesis of liquid fuels from hydrogen and carbon monoxide (Fischer-Tropsch and related processes)	43
Process development.....	43
Pilot-plant operations.....	43
Synthesis experiments.....	43
Purification of synthesis gas.....	44

CONTENTS((Cont.))

	<u>Page</u>
Bench-scale experiments.....	45
Catalyst-oil slurry process.....	45
Fixed-bed-activity tests.....	46
Mechanism of the synthesis.....	47
Composition of catalyst and of synthesis gas.....	47
Role of promoters.....	47
Behavior of carbides.....	48
Effect of water vapor.....	49
Reactions of synthesis gas in the presence of metal carbonyls.....	49
Cobalt hydrocarbonyl.....	49
Homologation of alcohols.....	49
Refining synthesis products.....	50
Synthesis of liquid fuels by hydrogenation of coal.....	50
Process development.....	50
Fluidized hydrogenation.....	50
Coal assaying.....	50
Coking of heavy-oil let-down (H.O.L.D.).....	52
Development of vapor-phase catalyst.....	53
Refining shale oil.....	54
Kinetics of hydrogenation.....	55
Effect of organic compounds.....	55
Pressure dependence of hydrogenation.....	55
Formation of oxygenated compounds.....	56
Characterization and separation of products.....	58
Direct determination of oxygen.....	58
Tar acids and bases.....	58
High-pressure instrumentation.....	59
High-pressure connections.....	59
High-pressure, low-volume pump.....	59
Sensitive pressure controller.....	60
High-pressure flow-meter assembly.....	61
Quick-opening product receiver.....	61
Technical publications.....	61
Research and development, Synthesis-Gas Laboratories and Coal Pilot Plants, Morgantown, W. Va., and field tests, Gorgas, Ala.	63
Experimental development of processes for producing synthesis gas from coal.....	63
Pulverized-coal-gasification pilot plant, Morgantown, W. Va.	63
Atmospheric-pressure gasifier.....	63
High-pressure gasifier.....	65
Oxygen plant.....	67
Coal preparation and handling equipment.....	68
Pneumatic transportation of coal by pipeline.....	68
Steam-oxygen superheater.....	68
Coal-preheating tests.....	68
Laboratory-scale experimentation.....	69
Process design and cost studies.....	69
Gas purification.....	70
Analytical methods.....	70
Bench-scale experiments.....	70
Operation of pilot plant.....	71
Proposed pressure gasifier on pilot-plant scale.....	72
New Morgantown Experiment Station.....	73
Underground gasification project, Gorgas, Ala.	73
First International Conference on Underground Gasification of Coal.....	80
Appendix. Bibliography of papers and reports presented or published in 1952	81

TABLES

	Page
1. Analyses of Lake DeSmet, Wyo., and Pittsburgh, Pa., coals.....	2
2. Typical liquid-phase processing and yield data, Lake DeSmet, Wyo., and Pittsburgh, Pa., coals.....	4
3. Typical liquid-phase yield data for Lake DeSmet, Wyo., and Pittsburgh, Pa., coals.....	5
4. Average analytical data, liquid-phase hydrogenation of Lake DeSmet, Wyo., and Pittsburgh, Pa., coals.....	6
5. Typical operating conditions and yields; vapor-phase processing of light oils from Lake DeSmet and Illinois No. 6 coals.....	9
6. Typical analytical data of major-stream-vapor-phase hydrogenation of light oils from Lake DeSmet and Illinois No. 6 coals.....	10
7. Analysis of finished gasoline.....	11
8. Typical operating conditions, synthesis run 3.....	25
9. Estimated plant-investment and utility requirements for ammonia plant (synthesis gas from natural gas).....	28
10. Estimated plant-investment and utility requirements for ammonia plant (synthesis gas from coal gasification).....	28
11. Estimated daily operating-cost summary for ammonia plants (synthesis gas from natural gas).....	29
12. Estimated daily operating-cost summary for ammonia plants (synthesis gas from coal gasification).....	29
13. Breakdown of estimated capital requirements for 30-ton-per-hour coal-hydrogenation plant.....	30
14. Estimated operating-cost summary for 30-ton-per-hour coal-hydrogenation plant.....	31
15. Product distribution and value for 30-ton-per-hour coal-hydrogenation plant.....	31
16. Statement of estimated capital, income, payout, and cash for 30-ton-per-hour coal-hydrogenation plant.....	32
17. Hydrogenation products from Kentucky coal.....	51
18. Hydrogenation products from Illinois coal.....	52
19. Comparison of calculated and experimental yields from coking of heavy-oil let-down at 550° C.	52
20. Hydrogenation of middle oil with pelleted catalyst BK-536-P-L4.....	54
21. Ultimate composition of some bituminous coals and characterization of their hydrogenation products.....	57
22. Typical analyses of Sewickley coal as used in the Morgantown Station Gasification Experiments.....	64
23. Average results from the operation of the atmospheric pressure gasifier	65
24. Average results from the operation of the high-pressure gasifier.....	66
25. Summary of electrolinking-carbonization.....	75
26. Gasification of the section between boreholes XII and XIII using XI and XII as inlets and VIII as an outlet, unidirectional flow.....	76
27. Gasification with air in the section between boreholes XIV and XV and boreholes XVI and XVII using boreholes XIV and XVI as inlets.....	77
28. Operating data during oxygen gasification.....	78
29. Analyses of gas produced during oxygen gasification.....	79
30. Average operating data using air blast followed by steam run.....	79

ILLUSTRATIONS

Follows
page

Fig.

1.	Gas-Synthesis Demonstration Plant, Louisiana, Mo. (view looking east).....	Frontispiece
2.	Simplified flow diagram, liquid and vapor phase of hydrogenation.....	2
3.	New high-pressure injection pump	12
4.	New high-pressure injection-pump packing gland.....	12
5.	Paste-injection pumps.....	12
6.	Original and modified coal-paste loop.....	12
7.	Cross section of flue-gas cooler.....	12
8.	Water-sprayed metal belt-conveyor pitch-disposal unit.....	12
9.	Centrifugal pump packing for heavy-solids-bearing oils.....	12
10.	Tar-acid recovery-unit flow diagram.....	14
11.	Vertical gasifier-feed-system diagram.....	16
12.	Lower section of vertical gasifier.....	16
13.	Reactants nozzle for vertical gasifier.....	16
14.	Amine scrubber, reactivator, and auxiliaries.....	18
15.	Catalyst-reduction unit, hydrogen-heating furnace (center), and reduction vessel (left of center).....	20
16.	Flow sheet of Gas-Synthesis Plant, with original distillation unit..	24
17.	Revised flow diagram of distillation unit, Gas-Synthesis Plant.....	24
18.	Two-stage hammer-mill reduction.....	26
19.	Hammer mill and three-stage roller mill.....	26
20.	Hammer mill and two-pair-high roller mill.....	26
21.	Coal-size distribution.....	26
22.	Material balance-flow diagram, 30-ton-per-hour coal-hydrogenation plant.....	30
23.	Pictorial flow sheet, commercial gas-synthesis plant.....	34
24.	Tilting furnace used in pilot plant for reducing and nitriding catalysts.....	44
25.	Schematic diagram of pilot plant for hot carbonate scrubbing.....	44
26.	Hot potassium carbonate scrubber for removing carbon dioxide from synthesis gas.....	44
27.	Apparatus for sulfur analysis.....	44
28.	High-pressure charcoal absorber for recovering light hydrocarbons from spent synthesis gas.....	46
29.	Bench-scale catalyst-testing apparatus.....	46
30.	Laboratory-scale fluidization unit.....	50
31.	Continuous distillation column for removing gasoline from coal-hydrogenation oils.....	50
32.	Reactor for vapor-phase-hydrogenation unit.....	52
33.	Elimination of N ₂ during hydrogenation of crude shale oil.....	54
34.	Schematic drawing of apparatus for direct determination of oxygen...	58
35.	Apparatus for determining equilibria in gaseous systems.....	58
36.	Cyclic molecular still for isolating coronene.....	58
37.	Dehydrogenation apparatus.....	58
38.	Spinning-band column for phenol separation.....	58
39.	High-pressure, low-volume pump.....	58
40.	Schematic diagram of pressure controller.....	60
41.	Quick-opening product receiver.....	60
42.	Atmospheric-pressure gasifier design 4.....	64
43.	Reactant injection nozzle for gasifier 4.....	64
44.	Pilot-plant flow sheet for atmospheric-pressure gasification.....	64

ILLUSTRATIONS (Cont.)

<u>Fig.</u>		Follows
		<u>page</u>
45.	Relation between gasifier pressure and coal throughputs.....	66
45A.	Reactor for pressure gasification.....	66
46.	Pressure gasifier in gasification pilot plant.....	66
47.	Pilot-plant flow sheet for pressure gasification.....	66
48.	Expansion engine in oxygen plant.....	66
49.	Operating panel and oxygen pump in oxygen plant.....	66
50.	250-hp. air compressor in oxygen plant.....	66
51.	Coal-preparation system in gasification pilot plants.....	68
52.	Coal weigh tanks for pneumatic coal-conveying system.....	68
53.	Coal-handling system for pressure gasification.....	68
54.	Dowtherm experimental apparatus for preheating coal.....	68
55.	Effect of weight rate of coal flow on heat-transfer coefficient.....	68
56.	Effect of pressure on performance of GW-activated carbon.....	70
57.	Adsorptive capacity of GW carbon for carbonyl sulfide (COS) in H ₂ -CO ₂ mixtures.....	70
58.	Diagrammatic arrangement of apparatus for studying synthesis of methane.....	70
59.	Pilot-plant apparatus for removing hydrogen sulfide and organic su sulfur compounds from gas simultaneously.....	72
60.	Architect's sketch of new Morgantown, W. Va., Experiment Station....	72
61.	Plan of electrolinking gasification trials.....	74
62.	Producer gas from underground gasification burning at 12-inch outlet burner.....	78
63.	"Cascade" oxygen storage units and vaporizing trucks used during oxygen runs.....	78

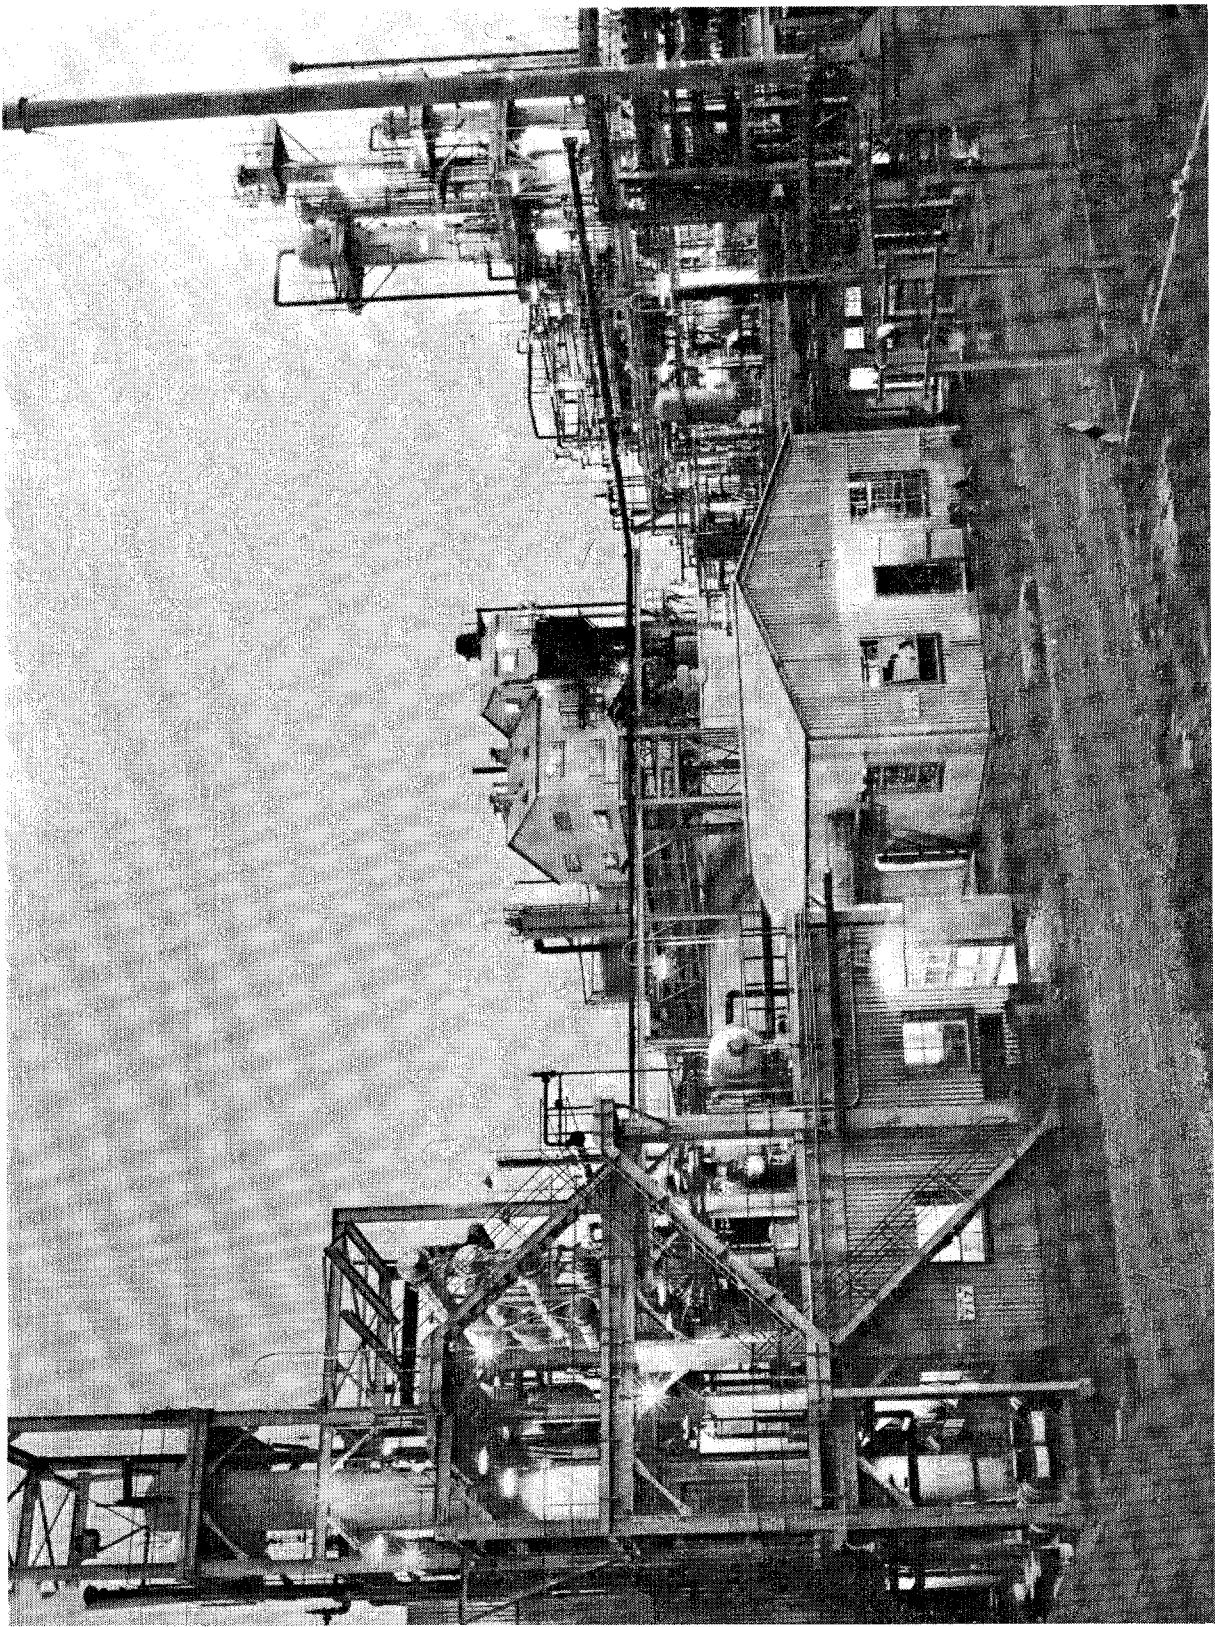

Figure 1. - Gas-Synthesis Demonstration Plant, Louisiana, Mo. (view looking east).
