

THE SYNTHESIS OF HYDROCARBONS

(REPORT OF THE IMPERIAL FUEL RESEARCH INSTITUTE OF JAPAN,
JULY 25, 1935)

by

Shigeru Tsutsumi ^{1/}

(Revised and edited by Robert C. Grass ^{2/})

With Preface by Robert C. Grass

CONTENTS

	<u>Page</u>
Preface.....	1
Introduction.....	2
Experimental.....	2
Apparatus.....	2
Method of yield determination.....	4
Synthesis gas.....	4
Catalysts.....	4
Hydrocarbon yield as a function of operating variables....	5
Effects of the reaction temperature.....	5
Experimental methods and results.....	7
Discussion.....	9
Effects of the gas velocity.....	10
Experimental methods and results.....	11
Discussion.....	13
Effects of the synthesis gas composition.....	14
Experimental methods and results.....	15
Discussion.....	17
Studies of catalysts for the hydrocarbon synthesis.....	17
Effects of the carrier.....	19
Amount of carrier.....	19
Type of carrier.....	21
Effect on raw materials used in catalyst preparation.....	25
Nickel catalysts.....	26
Experimental procedure.....	27
Results.....	27
Cobalt-copper catalysts.....	32
Experimental procedure.....	33
Results.....	33

^{1/} Chemist, Imperial Fuel Research Institute of Japan,
Kawaguchi City, Saitama, Japan.

^{2/} Research chemist, Synthetic Liquid Fuels Branch, Bureau
of Mines, Bruceton, Pa.

CONTENTS (Continued)

	<u>Page</u>
Studies of catalysts for the hydrocarbon synthesis (Cont'd.)	
Cobalt-nickel-copper catalysts.....	42
Results.....	42
Catalysts containing silver.....	46
Results.....	46
Mechanism of the hydrocarbon synthesis.....	48
Formation of carbides.....	49
Formation of free radicals.....	51
Production of liquid hydrocarbons from carbon dioxide and hydrogen.....	52
Summary.....	53
A review of international research on the hydrocarbon synthesis.....	53
Germany.....	53
Laboratory research.....	54
Pilot-plant work.....	56
Japan.....	57
Britain.....	59
The United States.....	60
France.....	60

ILLUSTRATIONS

<u>Fig.</u>	<u>Follows</u>
	<u>page</u>
1. Laboratory-scale apparatus (6 m. ³ /hr. throughput) used in studies of the hydrocarbon synthesis.....	2
2. Steam stripping of light-oil fraction from activated charcoal adsorption tube.....	4
3. Effect of reaction temperature on hydrocarbon synthesis.....	6
4. Effect of reaction temperature on hydrocarbon synthesis.....	6
5. Effect of synthesis gas velocity on hydrocarbon synthesis.....	10
6. Effect of synthesis gas velocity on hydrocarbon synthesis.....	10
7. Effect of synthesis gas composition on hydrocarbon synthesis.....	16
8. Effect of synthesis gas composition on hydrocarbon synthesis.....	16
