

ANNUAL REPORT OF RESEARCH AND TECHNOLOGIC WORK ON COAL
FISCAL YEAR 1950

by

Arno C. Fieldner^{1/} and Sidney Gottley^{2/}

CONTENTS

	Page
Introduction	1
Summary	2
Acknowledgments	4
Origin, composition, and properties of coal	5
Inspection, sampling, and analysis	5
Analyses of miscellaneous materials	7
Constitution, properties, and analytical methods	7
Coal classification	7
Petrographic studies of coal	8
Electron microscopy of coal	8
Extractable waxes from American lignites	9
Coal mining	10
Coal investigations	10
Alaska	10
Greek lignite	10
Georges Creek, Md.	10
Study of coking-coal reserves	12
Mining methods and practices	12
Bull Mountain, Mont.	12
Iowa	12
Mechanical mining studies	13
Anthracite mechanical mining research	13
Compressed-air receivers	14
Studies on the use of Diesel engines underground	14
Coal-mining practices in Germany and Japan	15
Control of coal-mine fires	15
Decreasing explosive hazards underground	16
Toxic mine atmospheres	16
Roof control	18
Anthracite flood prevention	18
Preparation of coal	19
Coal washing	19
Cyclone thickener performance tests	19
Coal-preparation bibliography	19
Preparation characteristics of Illinois coals	20
Preparation characteristics of Cumberland Plateau, Tenn., coal	20
Upgrading marginal coking coals by coal-preparation methods	20
Coal preparation for synthetic fuels	21
Brigetting of coal	22
Drying low-rank coals	22
Rocky Mountain coals	22
Lignite	23

^{2/} Assistant to the chief, Fuels and Explosives Division, Bureau of Mines, Washington, D. C.

CONTENTS (Cont'd.)

	<u>Page</u>
Preparation of coal (Cont'd.)	
Storage of coal	25
Low-rank Rocky Mountain coals	23
Lignite	23
Storage of dried lignite	24
Utilization of coal for combustion	24
Fuel-engineering service	24
Boiler feed-water conditioning	25
Boiler-water research	27
Smoke abatement	28
Combustion	28
Corrosion of wall tubes in steam generators	28
Factors affecting heat absorption in furnaces	29
Steam-dried lignite	29
Carbonization of coal	30
Coke production	30
Survey of carbonizing properties of American coals	30
Methods of testing	33
Coals tested	34
Sewell-bed coal	34
British Columbia, Alaska, and Western Coals	35
Lower Banner coal, Russell County, Va.	35
Thick Freepport and Pittsburg coals, Pennsylvania; Elk-horn coal, Kentucky; and America and Mary Lee coals, Alabama	36
Testing Alabama Coals in the 17-inch test oven	36
Foundry cokes from Sunnyside coal, Utah	36
Low-temperature carbonization of noncoking coals	37
Desulfurization during carbonization with added gases	39
Ammonium sulfate yields	39
Expanding properties of coal during coking	40
Plasticity of coals	43
Coke properties	43
Oxidizing properties of bituminous coals	43
Gasification of coal, coke, and lignite	45
Lignite	45
Underground gasification	45
Second field-scale experiment at Gorgas, Ala.	46
Research on the production of synthesis gas	48
Gasification of pulverized coal	48
Pulverized-fuel-gasification pilot plant	48
High-pressure gasification	49
Purification pilot plant	49
Laboratory-scale experimentation	49
Production of synthesis gas	51
Gas treating and testing	51
Vortex combustion studies for powdered-coal gasification	52
Oxygen production by multistage fractional permeation	53
Synthesis-gas production	54
Liquefaction of coal by direct hydrogenation; Research and development	55
Function of solvents and catalysts in early stages of coal hydrogenation	55
Action of solvents	55
Catalysts for coal hydrogenation; reaction mechanism	56

CONTENTS (Cont'd.)

	<u>Page</u>
Liquefaction of coal by direct hydrogenation; Research and development (Cont'd.)	
Bench-scale process development	58
Dependence of coal hydrogenation on operating variables	58
Hydrogenation of coal in the absence of solvents	59
Pilot-plant operations	59
Separation and identification of products of coal hydrogenation	60
Phenols in coal-hydrogenation oils	60
Characterization of coal	61
Liquefaction of coal by hydrogenation of carbon monoxide;	
Research and development	62
Reaction mechanism studies	62
Metallic carbides; The magnetic balance	62
Reaction-rate studies	63
Effect of reduction on metal oxide catalysts	64
Separation and identification of products of hydrogenation of carbon monoxide	65
Homologation of alcohols	66
Study of fundamental properties of fixed and fluidized beds	67
Pilot-plant synthesis of hydrocarbons from carbon monoxide and hydrogen	67
Synthetic liquid fuels demonstration plants	68
Coal-hydrogenation plant	68
Gas-synthesis plant	72
Oxygen production	72
Koppers powdered-coal gasifier	72
Zerpely gas producer	73
Engineering studies and cost estimates	73
Technical reports and foreign document work	80
Abstracts and bibliographies	80
Foreign documents	80

ILLUSTRATIONS

<u>Fig.</u>		<u>Follows</u>
		<u>page</u>
1.	Typical coal sections of drill cores from the Georges Creek and north part of the Upper Potomac Basins of Allegany and Garrett Counties, Md.	8
2.	Electron micrograph of a Formvar replica of microspores in attrital coal. (X4,500.)	8
3.	Photomicrographs of thin sections of lignitic coal and ingredients isolated from attrital lignite	8
4.	Map of an Iowa longwall mine, Centerville district	12
5.	Integrated pilot plant for fluidized drying and briquetting of coal	22
6.	No. 5 pilot plant for drying coal at Golden, Colo.	22
7.	Occurrence of lignite beds in the powerhouse excavation at Garrison Dam, N. Dak.	24
8.	View of the lignite-removal operations at the Garrison Dam, N. Dak.	24
9.	Conditions of temperature and concentration of sodium hydroxide under which cracking of steel container may readily occur	28
10.	Coke from 100 percent Lower Sunnyside coal, showing typical fingery structure	36

ILLUSTRATIONS (Cont'd.)

Fig.		Follows <u>Page</u>
11.	Coke from 70 percent Lower Surryside coal, plus 30 percent medium-volatile coal from Oklahoma, showing blocky structure obtained	36
12.	Modified distillation assay apparatus	38
13.	Site of second experiment in underground gasification of coal	45
14.	Effect of steam:coal ratio on the ratio of hydrogen to carbon monoxide	48
15.	Gas-purification pilot plant	48
16.	Flow diagram of pneumatic feeding system and generator for powdered-fuel gasification in laboratory-scale pilot unit	48
17.	Flow diagram of generator and synthesis-gas-purification train for powdered-fuel gasification in laboratory-scale pilot unit	48
18.	Laboratory-scale pilot unit (upper floor) for powdered-fuel gasification	50
19.	Laboratory-scale pilot unit (lower floor) for powdered-fuel gasification	50
20.	Electron micrograph of extremely fine carbonaceous residue at high magnification. ($\times 41,000$.)	50
21.	Absorptive capacity of GW carbon for CO ₂ in H ₂ -CO ₂ mixtures	50
22.	Flow sheet of vortex gasifier	52
23.	Vortex reaction chamber	52
24.	Variable contact-time unit for hydrogenation of coal ...	58
25.	Schematic flow diagram of coal-oil experimental plant ..	58
26.	Separation of xylenols	60
27.	Separation of ethyl phenols	60
28.	Magnetic balance	62
29.	Thermomagnetic curves showing the presence of the Hägg and hexagonal iron carbides in copper-promoted Fischer-Tropsch catalyst, and the reversibility of the Hägg carbide curve	62
30.	Gas-Synthesis Demonstration Plant, Louisiana, Mo.	72
31.	Gas-Synthesis Demonstration Plant, Louisiana, Mo.	72
32.	Relation of gasoline manufacturing cost to coal prices for 30,000 bbl./day coal-hydrogenation plants	74
33.	Cost of byproduct city gas from synthetic liquid fuels plants vs. cost of coal at the plant site	78
34.	Process units in synthetic liquid fuels plants making byproduct city gas	78
35.	Flow sheet for 30,000 bbl./day coal-to-oil plant using Alaskan subbituminous coal	78
