

ANNUAL REPORT OF RESEARCH AND TECHNOLOGIC WORK ON COAL
FISCAL YEAR 1951

by

R. L. Brown^{1/} and E. P. Carman^{2/}

CONTENTS

	<u>Page</u>
Introduction and summary.....	1
Acknowledgments.....	4
Origin, composition, and properties of coal.....	6
Inspection, sampling, and analysis.....	6
Analyses of miscellaneous materials.....	7
Constitution, properties, and analytical methods.....	8
Coal classification.....	8
Petrographic studies of coal.....	8
Extractable waxes from American lignites.....	9
Methods of analyzing coal and coke.....	10
Investigation of abrasiveness of coal.....	10
Coal mining.....	11
Development of the South American coal industry.....	11
Estimate of coking-coal reserves.....	12
Cambria County, Pa.	13
Indiana County, Pa.	14
Pike County, Ky.	14
Mining methods and practices.....	15
Anthracite mechanical mining research.....	15
Bituminous-coal mining studies.....	16
Studies on the use of Diesel engines underground.....	16
Control of coal-mine fires.....	18
Coal-mine explosions and fires.....	18
Causes of fatalities in mines.....	18
Toxic mine atmospheres.....	19
Electrical equipment for mines.....	21
Roof control.....	21
Anthracite flood prevention.....	22
Preparation of coal.....	22
Coal washing.....	22
International conference on coal preparation.....	22
Evaluating coal-washery performance.....	23
Cleaning and recovery of fine coal.....	25
Preparation characteristics of coking coal.....	26
Cambria County, Pa.	26
Indiana County, Pa.	26
Armstrong County, Pa.	26

Bureau of Mines, Washington, D. C.

^{2/} Chemical engineer, Office of Coal Technology Coordinator, Fuels
and Explosives Division, Bureau of Mines, Washington, D. C.

CONTENTS (Cont.)

	<u>Page</u>
Preparation of coal (Cont.)	
Float-and-sink control tests.....	27
Research pilot plant.....	28
Coal preparation for synthetic fuels.....	28
Drying low-rank coals.....	28
Fluidized drying.....	28
Modified Fleissner process.....	29
Storage of lignite.....	29
Utilization of coal and other fuels for combustion.....	30
Fuel-engineering service.....	30
Boiler feed-water conditioning.....	31
Boiler-water research.....	33
Smoke abatement.....	34
Coal and energy in the western States.....	35
Combustion characteristics of packaged fuels.....	35
Factors affecting heat absorption in furnaces.....	35
Disposal of radioactive wastes by incineration.....	36
Carbonization of coal.....	36
Survey of carbonizing properties of American coals.....	36
West Virginia coals.....	41
Pennsylvania coals.....	42
Virginia coals.....	43
Tennessee coals.....	43
Washington coals.....	43
Alabama coals.....	43
Columbia, South America, coals.....	43
Comparison of BM-AGA and slot-oven experimental methods of carbonization.....	44
Small-scale laboratory carbonization tests.....	44
Plasticity of coals.....	44
Expanding properties of coals during carbonization.....	46
Spontaneous heating tendencies of coals and refuse.....	48
Physical properties of coke: Size and its measurement.....	48
Methods of making coke.....	50
Low-temperature carbonization of noncaking coals.....	50
Desulfurization of coal during carbonization.....	51
Phenol and cresols in coal tar.....	51
Gasification of coal and lignite.....	51
Lurgi process.....	51
Lignite gasification.....	52
Underground gasification.....	52
Research on the production of synthesis gas.....	55
Gasification of pulverized coal.....	55
Laboratory-scale experimentation.....	55
Gasification by the vortex principle.....	56
Atmospheric pressure pilot-plant gasifier.....	56
High-pressure pilot-plant gasifier.....	57
Pneumatic transportation and feeding of pulverized coal.....	57
Synthesis-gas purification.....	57

CONTENTS (Cont.)

	<u>Page</u>
Synthetic liquid fuels by gas synthesis: Research and develop- ment.....	59
Mechanism of the synthesis.....	59
Studies of catalysts.....	59
Metallic carbides.....	59
Analysis of iron catalysts.....	60
Nitrided iron catalysts.....	61
Surface area and pore volume studies.....	61
Pilot-plant developments.....	62
Oil-circulation processes.....	62
Slurry-phase operation.....	62
Fixed and fluidized-bed studies.....	63
Production of alcohols... ..	64
Oxygen exchange between nitrates and water.....	64
Synthetic liquid fuels by coal hydrogenation: Research and development.....	65
Batch autoclave studies.....	65
Mechanism of coal hydrogenation.....	65
Catalysts for coal hydrogenation.....	66
Pilot-plant construction: Vapor-phase hydrogenation unit.....	66
Separation and identification of products of coal hydro- genation.....	66
X-ray diffraction analysis.....	66
Studies of phenols in coal-hydrogenation oils.....	67
Partition studies.....	67
Organic syntheses.....	68
Permeation of gases through membranes.....	69
Synthetic liquid fuels demonstration plants.....	70
Coal-hydrogenation plant.....	70
Gas-synthesis plant.....	75
Vertical gasifier.....	75
Pebble-type steam superheater.....	76
Kerpely gas producer.....	76
Gas-purification unit.....	76
Synthesis reactor and distillation unit.....	76
Catalyst preparation and reduction.....	77
Engineering studies and cost estimates.....	77
Synthetic liquid fuels publications.....	79
Books.....	79
Reviews and abstracts.....	81
Bibliographies.....	81
Foreign documents.....	81

ILLUSTRATIONS

<u>Fig.</u>	<u>Follows</u> <u>page</u>
1. Charles R. Robertson Lignite Research Laboratory of the Bureau of Mines, Grand Forks, N. Dak.	2
2. Bureau of Mines Anthracite Research Laboratory, Schuylkill Haven, Pa.	2
3. Free-swelling index of American coals as a function of percent volatile matter.....	3
4. Petrographic descriptions and solvent extraction yields of different varieties of American lignite.....	3
5. New apparatus for estimating abrasiveness of coal.....	10
6. The Capivari central preparation plant, Brazil.....	12
7. Distribution of roof load in vicinity of coal face.....	14
8. Relation between proportion of natural gas reacting, concentration of gas in intake, and liquid fuel-air ratio in tests of a CFR diesel engine.....	16
9. Kerosine-flotation cells in an Alabama coal-preparation plant.....	24
10. Float-and-sink sampling characteristics of four sizes of a western Pennsylvania bituminous coal.....	26
11. New sole-heated expansion oven.....	46
12. Pilot plant for fluidized carbonization of noncoking coal; capacity, 250 to 300 pounds per hour.....	50
13. Coal consumed and area of burned-out region, underground gasification test, Gorgas, Ala.	52
14. Gas turbine installation, underground gasification test, Gorgas, Ala.	54
15. Flow diagram of apparatus for testing fuels for synthesis-gas production.....	54
16. Simplified flow-sheet for pressure gasification.....	56
17. Apparatus for study of transporting and feeding powdered coal under pressure.....	56
18. Effect of operating pressure on the amount of coal conveyed by air or other gases.....	56
19. Isothermal decomposition of fully carburized Ni ₃ C at 323° C.	58
20. The variation of catalyst composition, activity, and temperature with time.....	60
21. Large catalyst-oil slurry unit.....	62
22. Flow diagram of oil slurry process.....	62
23. Flow diagram of vapor-phase hydrogenation unit.....	66
24. Simplified flow diagram of a three-stage permeation process for the separation of gases.....	70
25. Small modern refinery and storage vessels, Synthetic Fuels Demonstration Plant, Louisiana, Mo.	70
26. Morgantown-type vertical coal gasifier and steam-coal preheater, Gas-Synthesis Demonstration Plant, Louisiana, Mo.	74
27. Gas-purification unit, Synthetic Fuels Demonstration Plant, Louisiana, Mo.	76
28. Predicted payout time for a 10,000 p.s.i. residual oil-hydrogenation plant for various cost and realization values.....	78
