

LABORATORY-SCALE WORK ON SYNTHESIS-GAS PRODUCTION ^{1/}

by

J. J. S. Sebastian, ^{2/} P. W. Edeburn, ^{3/} F. Bonar, ^{2/}
L. W. Bonifield, ^{2/} and L. D. Schmidt ^{4/}

CONTENTS

	<u>Page</u>
Development of process in laboratory unit operating on entrained powdered coal.....	1
Introduction.....	1
Theoretical.....	2
Apparatus and operating procedure.....	5
Gasification in a 3-inch tube with wet purification.....	5
Gasification in a 6-inch tube with dry residue recovery system.....	5
Gasification in improved larger-capacity unit with pneumatic coal-feeding and dry-residue recovery system.....	7
Life of silicon carbide generator lining, repairs, and replacements.....	10
Coals charged.....	11
Results.....	12
Operating data and results.....	12
Residues of gasification.....	18
Material and heat balances.....	20
Translation of operating results to gasification on commercial scale.....	23
Conclusions.....	32
Experimental pilot unit for underground gasification studies with highly superheated steam and oxygen.....	33
Introduction.....	33
Apparatus and operating procedure.....	33
Operating data and results.....	35
Conclusions.....	36
Appendix.....	38

^{1/} Presented in part before the Gas and Fuel Chemistry Division of the American Chemical Society, St. Louis, Mo., September 1948. Work done in cooperation with West Virginia University.

^{2/} Chemical engineer, U. S. Bureau of Mines, Morgantown, W. Va.

^{3/} Chemist, U. S. Bureau of Mines, Morgantown, W. Va.

^{4/} Chief, Synthesis-Gas Production Branch, U. S. Bureau of Mines, Morgantown, W. Va.

TABLES

	<u>Page</u>
1. Heats evolved or absorbed in gasification reactions..	2
2. Analysis of coals charged.....	12
3. Typical operating data and results.....	14
4. Typical operating data and results.....	16
5. Typical operating data and results.....	17
6. Size consist of residues.....	19
7. Typical material balances.....	21
8. Typical heat balances.....	21
9. Typical heat balances.....	22
10. Typical water balances.....	22
11. Translation of operating results to conditions in large-scale production - Run 33A.....	29
12. Translation of operating results to conditions in large-scale production - Run 46.....	30
13. Translation of operating results to conditions in large-scale production - Run 49.....	31
14. Operating data and results in underground gasifi- cation studies with highly superheated steam and oxygen.....	37

ILLUSTRATIONS

<u>Fig.</u>		<u>Follows page</u>
1.	Flow diagram of laboratory unit in second stage of development.....	4
2.	Gas sampling and testing arrangement in laboratory unit.....	6
3.	Laboratory unit (upper floor) in second stage of development.....	6
4.	Laboratory unit (lower floor) in second stage of development.....	6
5.	Generator head and mixing chamber in third stage of development.....	8
6.	Flow diagram of pneumatic feeding system and generator in third stage of development.....	8
7.	Flow diagram of generator and residue-recovery system in third stage of development.....	8
8.	Laboratory unit (upper floor) in third stage of development.....	10
9.	Laboratory unit (lower floor) in third stage of development.....	10
10.	Generator head in third stage of development.....	10
11.	Silicon carbide generator lining before and after use in pulverized fuel gasification.....	10
12.	Internal construction of generator lining for pulverized fuel gasification.....	10

ILLUSTRATIONS (Continued)

<u>Fig.</u>		<u>Follows</u> <u>page</u>
13.	Photomicrographs of carbonaceous residues obtained in pulverized-coal gasification.....	18
14.	Electron micrograph of finest carbonaceous residue at high magnification (44,000 X).....	18
15.	Electron micrographs of carbonaceous residue from pulverized-coal gasification.....	18
16.	Cemented coke block of inferior strength. Method of building coke wall by layers.....	34
17.	Cemented coke block of superior strength.....	34
18.	Flow diagram of pilot unit for study of underground gasification of coke walls.....	34
19.	Pilot unit for study of underground gasification of coke walls.....	34
20.	Flame test with burner and steam superheater used for study of underground gasification of coke walls.....	34
21.	Middle section of generator after run made for underground gasification studies.....	34
