

## CONTENTS

|  | <u>Page</u> |
|--|-------------|
| Summary.....   | 1           |
| Introduction.....                                    | 2           |
| Acknowledgments.....                                 | 4           |
| Description of coal-fired gas turbine.....           | 4           |
| Installation of turbine and accessory equipment..... | 5           |
| Repairs and modifications.....                       | 6           |
| Turbine rotor.....                                   | 6           |
| Turbine blades.....                                  | 12          |
| Air compressor.....                                  | 13          |
| Coal-handling equipment.....                         | 13          |
| LDC system.....                                      | 15          |
| Alternate system.....                                | 16          |
| Discussion.....                                      | 17          |
| Bibliography.....                                    | 18          |

## ILLUSTRATIONS

### Fig.

|  |    |
|--|----|
| 1. Gas turbine with exhaust-heat recovery.....                   | 2  |
| 2. Gas turbine with supercharged boiler.....                     | 2  |
| 3. Cross-section of coal-fired gas turbine plant.....            | 4  |
| 4. Schematic diagram of coal-fired gas turbine plant..           | 4  |
| 5. Cutaway view of combustor.....                                | 5  |
| 6. Dunlab ash separator.....                                     | 6  |
| 7. View of partly assembled coal-fired gas turbine<br>plant..... | 7  |
| 8. Rotor of air compressor.....                                  | 8  |
| 9. Turbine shell and compressor rotor.....                       | 8  |
| 10. Removing regenerator from the turbine.....                   | 9  |
| 11. Coal-fired gas turbine plant.....                            | 10 |
| 12. Inlet to air compressor.....                                 | 10 |
| 13. Turbine rotor and blades.....                                | 11 |
| 14. Cracks in rotor row 2.....                                   | 11 |
| 15. Original arrangement of blades.....                          | 13 |
| 16. New arrangement of blades.....                               | 13 |
| 17. Cracks in compressor casing.....                             | 14 |
| 18. Coal-handling equipment.....                                 | 15 |
| 19. Coal pump.....   | 16 |
| 20. Coal-pulverizing equipment.....                              | 17 |
| 21. Coal pulverizer.....   | 17 |
