Tailored to Your Needs!

Selected Research In Microfiche

SRIM[®] is a tailored information service that delivers complete microfiche copies of government publications based on your needs, automatically, within a few weeks of announcement by NTIS.

SRIM[®] Saves You Time, Money, and Space!

Automatically, every two weeks, your SRIM[®] profile is run against all *new* publications received by NTIS and the publications microfiched for your order. Instead of paying approximately \$15-30 for each publication, you pay only \$2.50 for the microfiche version. Corporate and special libraries love the space-saving convenience of microfiche.

NTIS offers two options for SRIM[®] selection criteria:

Standard SRIM[®]—Choose from among 350 pre-chosen subject topics.

Custom SRIM[®]—For a one-time additional fee, an NTIS analyst can help you develop a keyword strategy to design your Custom SRIM[®] requirements. Custom SRIM[®] allows your SRIM[®] selection to be based upon *specific subject keywords*, not just broad subject topics. Call an NTIS subject specialist at (703) 605-6655 to help you create a profile that will retrieve only those technical reports of interest to you.

SRIM[®] requires an NTIS Deposit Account. The NTIS employee you speak to will help you set up this account if you don't already have one.

For additional information, call the NTIS Subscriptions Department at 1-800-363-2068 or (703) 605-6060. Or visit the NTIS Web site at <http://www.ntis.gov> and select SRIM[®] from the pull-down menu.

TRI-STATE SYNFUELS PROJECT REVIEW
PROCESS EVALUATION, SELECTION AND DESIGN
VOLUME 3

TABLE OF CONTENTS

- 1.0 GASIFICATION
 - 1.1 Process Description
 - 1.2 Flow Sheets
 - 1.3 Unit Material Balances
 - 1.4 Accomplishments and Decisions
 - 1.5 Current Status
 - 1.6 Licensors and Evaluations
- 2.0 SULFUR RECOVERY
 - 2.1 Process Description
 - 2.2 Flow Sheets
 - 2.3 Unit Material Balances
 - 2.4 Accomplishments and Decisions
 - 2.5 Current Status
 - 2.6 Licensors and Evaluations
- 3.0 METHANOL SYNTHESIS
 - 3.1 Process Description
 - 3.2 Flow Sheets
 - 3.3 Unit Material Balances
 - 3.4 Accomplishments and Decisions
 - 3.5 Current Status
 - 3.6 Licensors and Evaluations
- 4.0 MTG, FRACTIONATION, ALKYLATION, HEAVY GASOLINE TREATER
 - 4.1 Process Description
 - 4.2 Flow Sheets
 - 4.3 Unit Material Balances
 - 4.4 Accomplishments and Decisions
 - 4.5 Current Status
 - 4.6 Licensors and Evaluations

TABLE OF CONTENTS (CONTINUED)

5.0 SNG PRODUCTIONS and H₂ PURIFICATION

- 5.1 Process Description
- 5.2 Flow Sheets
- 5.3 Unit Material Balances
- 5.4 Accomplishments and Decisions
- 5.5 Current Status
- 5.6 Licensors and Evaluations

6.0 METHANOL PURIFICATION

- 6.1 Process Description
- 6.2 Flow Sheets
- 6.3 Unit Material Balance
- 6.4 Accomplishments
- 6.5 Current Status
- 6.6 Licensors and Evaluations

7.0 TANK FARM and PRODUCT HANDLING

- 7.1 System Description
- 7.2 Accomplishments and Decisions
- 7.3 Current Status

8.0 STEAM SYSTEM

- 8.1 Process Description
- 8.2 Flow Sheets
- 8.3 Material Balance
- 8.4 Accomplishments and Decisions
- 8.5 Current Status
- 8.6 Licensors and Evaluations

9.0 OXYGEN PLANT

- 9.1 Process Description
- 9.2 Flow Sheets
- 9.3 Unit Material Balances
- 9.4 Accomplishments and Decisions
- 9.5 Current Status
- 9.6 Licensors and Evaluations

10.0 FLUE GAS DESULFURIZATION

- 10.1 Process Description
- 10.2 Flow Sheets
- 10.3 Unit Material Balances
- 10.4 Accomplishments and Decisions
- 10.5 Current Status
- 10.6 Licensors and Evaluations
