

## CONTENTS

LIST OF FIGURES . . . . .	xv
LIST OF TABLES . . . . .	xxi
1. PROLOGUE TO VOLUME II. . . . .	1
A. Introduction. . . . .	1
B. Objectives. . . . .	2
C. Study Approach. . . . .	3
D. Basic Information . . . . .	5
E. Critical Factors. . . . .	5
F. Complementing Work. . . . .	6
G. Applicability . . . . .	6
2. AUTOMOTIVE FUEL SUPPLY AND DEMAND FORECASTS. . . . .	8
References . . . . .	21
Appendix . . . . .	22
3. REFERENCE SUPPLY CASE. . . . .	24
A. Introduction. . . . .	24
1. Content of Reference Case. . . . .	24
2. Scenarios: Bases for Projections of Supply and Demand . . . . .	25
3. Summary of Conclusions . . . . .	28
B. Projected Domestic Oil Supply and Imported Oil Requirements. . . . .	30
C. Projected Resource Requirements for Production of Domestic Oil . . . . .	37
1. Drill Rigs, Labor, and Steel . . . . .	37
2. Capital Investment . . . . .	42

D.	Projected Environmental Impacts . . . . .	47
1.	Impact Scaling Factors . . . . .	48
a.	Crude Oil Production. . . . .	48
b.	Crude Oil Distribution and Oil Imports. . . . .	56
c.	Refineries. . . . .	60
2.	Environmental Impacts. . . . .	65
a.	Onshore Production. . . . .	65
b.	Alaska Production . . . . .	70
c.	Offshore Production with Attendant Transport and Refining Operations . . . . .	75

APPENDICES

A.	QUANTITIES OF OIL RESOURCES AND RESERVES. . . . .	85
B.	METHOD FOR HG3 REGIONAL SUPPLY PROJECTION . . . . .	90
C.	TRENDS IN PAST U.S. PRODUCTION AND THEIR IMPLICATIONS FOR FUTURE PRODUCTION. . . . .	93
1.	A Brief History of U.S. Oil Production and Oil Exploration. . . . .	93
2.	A Brief History of U.S. Crude Oil Supply and Demand. . . . .	98

REFERENCES. . . . . 102

4.	SYNTHETIC LIQUID FUELS: THE TECHNOLOGY, RESOURCE REQUIREMENTS, AND POLLUTANT EMISSIONS. . . . .	106
A.	Introduction and Overview . . . . .	106
B.	Discussion of Technologies. . . . .	111
1.	Liquid Fuels from Coal . . . . .	111
a.	Extraction. . . . .	111
b.	Conversion. . . . .	112
c.	Distribution. . . . .	123
2.	Oil Shale. . . . .	127
a.	Extraction. . . . .	127
b.	Conversion. . . . .	128
c.	Distribution. . . . .	135

C.	Material and Energy Flow. . . . .	138
1.	Energy Efficiency. . . . .	139
a.	Methanol from Coal. . . . .	139
b.	Syncrude from Coal. . . . .	142
c.	Syncrude from Oil Shale . . . . .	143
2.	Resource Consumption . . . . .	147
a.	Coal and Oil Shale. . . . .	148
b.	Water . . . . .	149
c.	Land. . . . .	152
d.	Labor . . . . .	155
e.	Steel . . . . .	157
f.	Other . . . . .	158
3.	Byproducts and Residuals . . . . .	160
a.	Saleable Byproducts . . . . .	162
b.	Solid Waste . . . . .	163
c.	Effluents to Water. . . . .	165
d.	Effluents to Air. . . . .	170
e.	Trace Elements. . . . .	173
4.	Costs and Dollar Flows . . . . .	177
a.	Investment and Operating Costs. . . . .	177
b.	Dollar Flow for Plant Construction and Operation . . . . .	180
	REFERENCES. . . . .	184
5.	NET ENERGY ANALYSIS OF SYNTHETIC LIQUID FUELS PRODUCTION . . . . .	187
A.	Introduction. . . . .	187
B.	Methodology . . . . .	191
C.	Analysis of Synthetic Fuel Processes. . . . .	198
1.	Coal Liquefaction (H-Coal Process) . . . . .	198
2.	Methanol from Coal . . . . .	200
3.	Oil Shale. . . . .	205
D.	Coal-to-Refined Products System . . . . .	207
E.	Summary . . . . .	211
	REFERENCES. . . . .	214

6.	MAXIMUM CREDIBLE IMPLEMENTATION SCENARIO FOR SYNTHETIC LIQUID FUELS FROM COAL AND OIL SHALE. . . . .	210
A.	Introduction . . . . .	216
B.	Implementation Schedule. . . . .	216
C.	Comparison with the National Academy of Engineering Scenarios. . . . .	219
D.	Scenarios and Scaling Factors. . . . .	221
E.	Resources. . . . .	227
	REFERENCES. . . . .	229
7.	LEGAL MECHANISMS FOR ACCESS TO COAL AND OIL SHALE . . . . .	230
A.	Introduction: Principles. . . . .	230
B.	Federal Lands. . . . .	234
	1. Licenses. . . . .	242
	2. Permits . . . . .	244
	3. Leases. . . . .	247
	4. Federal Requirements in Pricing . . . . .	260
C.	Indian Lands . . . . .	260
D.	Access to Oil Shale on Public Lands. . . . .	265
E.	Summary of Federal Oil Shale Leases. . . . .	268
F.	State Lands. . . . .	274
	1. Colorado. . . . .	274
	2. Montana . . . . .	277
	3. Wyoming . . . . .	278
	4. West Virginia . . . . .	281
G.	Vetoed Strip Mine Act. . . . .	282
H.	Existing Environmental Regulations . . . . .	294
I.	State Reclamation Statutes and Regulations . . . . .	301
J.	Other Regulations. . . . .	301

8.	FINANCING THE SYNTHETIC LIQUID FUELS INDUSTRY BY THE U.S. CAPITAL MARKETS. . . . .	302
A.	Introduction . . . . .	302
B.	Outlook for Total Business Fixed Investment and Other Related Macroeconomic Variables. . . . .	303
C.	Investment in the Energy Industry. . . . .	306
D.	Capital Availability in the Petroleum Industry . . .	311
E.	Conclusions. . . . .	316
APPENDICES		
A.	PROJECTIONS OF GNP, AND SOURCES AND USES OF FUNDS. .	318
B.	PROJECTIONS OF CAPITAL INVESTMENT IN THE OIL AND GAS INDUSTRY . . . . .	328
C.	PROJECTIONS OF CASH FLOW FOR THE PETROLEUM AND GAS INDUSTRY . . . . .	333
	REFERENCES. . . . .	341
9.	MARKET PENETRATION OF SYNTHETIC LIQUID FUELS-- KEY ROLE OF THE DECISION-MAKING PROCESS LEADING TO DEPLOYMENT . . . . .	342
A.	Introduction . . . . .	342
B.	Synthetic Liquid Fuels and the Natural Petroleum System . . . . .	342
C.	Common Misconceptions About the Petroleum Industry .	347
D.	Example of the Decision-Making Process . . . . .	349
E.	Comparison of the Risks. . . . .	354
F.	Comparison of the Economic Risk. . . . .	358
G.	The Decision-Making Climate for Synthetic Liquid Fuels . . . . .	362
	REFERENCES. . . . .	363

10.	GOVERNMENT POLICIES TO ENCOURAGE THE PRODUCTION OF SYNTHETIC LIQUID FUELS. . . . .	364
	A. Introduction . . . . .	364
	B. Required Features of Federal Policy. . . . .	365
	C. Incentive Policy Options . . . . .	366
	1. Removal of Constraints. . . . .	367
	2. Tax Incentives. . . . .	368
	3. General Price Support . . . . .	370
	4. Special Price Supports. . . . .	371
	5. Government Participation. . . . .	374
	a. Government Ownership. . . . .	374
	b. Grants-in Aid . . . . .	376
	c. Loan Guarantees . . . . .	377
	D. Conclusions. . . . .	379
	REFERENCES. . . . .	382
11.	NATIONAL ECONOMIC IMPACTS OF THE SYNTHETIC FUELS INDUSTRY. . . . .	383
	A. Introduction . . . . .	383
	B. Interindustry Relationships. . . . .	384
	C. Materials and Purchased Services Used by the Coal Industry. . . . .	387
	1. MEC Task Force Projections. . . . .	387
	2. Overview. . . . .	393
	D. Conversion Facilities. . . . .	394
	E. Transportation . . . . .	395
	1. Railroad Equipment. . . . .	396
	2. Coal Slurry Pipelines . . . . .	398
	F. Geographical Distribution Sectors Supplying Synthetic Liquid Fuels Industry. . . . .	398
	1. Mining and Construction Equipment . . . . .	398
	2. Explosives. . . . .	400
	3. Railroad Equipment. . . . .	400
	4. Steel . . . . .	401
	5. Summary . . . . .	402

APPENDIX

A	ESTIMATION OF DEMAND FOR WALKING DRAGLINES . . . . .	404
	REFERENCES . . . . .	407
12.	ECONOMIC IMPACTS IN RESOURCE DEVELOPMENT REGIONS . . . . .	408
A.	Introduction . . . . .	408
B.	Regional Employment Growth . . . . .	410
1.	Background Theory . . . . .	410
2.	Population Estimates for Coal Development . . . . .	410

4-2	Production of Methanol From Coal. . . . .	116
4-3	Coal Liquefaction Via Dissolution and Hydrogenation . . . . .	120
4-4	Crude Oil Pipeline Network. . . . .	124
4-5	Oil Retorting and Upgrading . . . . .	134
4-6	Existing Crude Oil Pipelines in Relation to Oil Shale Areas . . . . .	136

4-7	Methanol From Coal Energy Balance . . . . .	140
4-8	H-Coal Liquefaction Process Energy Balance. . . . .	144
4-9	TOSCO II Oil Shale Retorting and Upgrading Energy Balance. . . . .	145
4-10	Typical Construction Labor Profile for Large Proposed Fuel Conversion Projects . . . . .	156
4-11	River Water Utilization (50,000-B/D TOSCO II Oil Shale Plant) . . . . .	166
4-12	Emissions of Air Pollutants From Synthetic Fuels Production. . . . .	181
4-13	Concentration of Toxic Trace Elements in Oil Shale. .	183
5-1	Flow Diagram for Definition of Net Energy Ratio . . .	189
5-2	Annual Energy Inputs for Construction and Operating a 5 Million Ton/Year Surface Coal Mine in the Southwestern United States. . . . .	195
5-3	Annual Energy Inputs for Construction and Operation of a 100,000-B/D H-Coal Process Coal Liquefaction Plant . . . . .	199
5-4	Annual Energy Inputs for Construction and Operation of an 81,433-B/D Coal-to-Methanol Plant . . . . .	202
5-5	Annual Energy Inputs for Construction and Operation of a 50,000-B/D Oil Shale Mining, Retorting, and Upgrading Complex . . . . .	204
5-6	Annual Energy Inputs for Converting Western Surface- Mined Coal to Refined Products in the Midwest . . . .	209
7-1	Mechanisms of Legal Access to Mineral Estates . . . .	235
8-1	Projected Cash Flow for Domestic Oil and Gas Industry--No Synthetic Liquid Fuels--at a Zero Rate of Annual Inflation. . . . .	312
8-2	Projected Cash Flow for Domestic Oil and Gas Industry--Conventional Activities Plus Synthetic Liquid Fuels--at a Zero Rate of Annual Inflation. . .	312
8-3	Projected Cash Flow for Domestic Oil and Gas Industry--No Synthetic Liquid Fuels--at a Five Percent Annual Rate of Inflation. . . . .	314

8-4	Projected Cash Flow for Domestic Oil and Gas Industry--Conventional Activities Plus Synthetic Liquid Fuels--at a Five Percent Annual Rate of Inflation . . . . .	314
8-5	Projected Cash Flow for Domestic Oil and Gas Industry--No Synthetic Liquid Fuels--at an Eight Percent Annual Rate of Inflation, . . . . .	315
8-6	Projected Cash Flow for Domestic Oil and Gas Industry--Conventional Activities Plus Synthetic Liquid Fuels--at an Eight Percent Annual Rate of Inflation, . . . . .	315
9-1	Synthetic Liquid Fuels Production System. . . . .	343
9-2	Natural Petroleum Products Production System. . . . .	343
9-3	Early 1973 Perception of a Hypothetical Syncrude Plant Beginning to Produce in 1973. . . . .	350
9-4	Early 1973 Perception of a Syncrude Plant Brought on Stream in 1980 . . . . .	350
9-5	Early 1973 Perception of the 1985 Status of a Syncrude Plant Brought on Stream in 1980. . . . .	350
9-6	Late 1973 Perception of the Hypothetical Syncrude Plant Producing in 1973 . . . . .	350
9-7	Mid-1974 Perception of a Hypothetical 1974 Syncrude Plant, After Examination of Investment Costs . . . . .	350
9-8	Late 1974-Early 1975 Perception of Syncrude Plant on Stream in 1980 . . . . .	350
11-1	Future Coal Production Levels for Project Independence Scenarios and the SRI Maximum Credible Implementation Scenario. . . . .	388
11-2	Primary Concentration of Major Industrial Sectors Expected to Supply the Coal and Oil Shale Industry. . . . .	403
12-1	Counties Used for Economic Impact Discussions . . . . .	409
13-1	Northern Great Plains Province. . . . .	428
13-2	Interior Province . . . . .	428
13-3	Eastern Province . . . . .	428

13-4	Typical Cross-section (Dents Run Watershed, Monongalia Co., W. Virginia . . . . .	431
13-5	Diagram of a Contour Mine . . . . .	432
13-6	Contour Strip Mining. . . . .	432
13-7	Auger Hole Section and Spacing. . . . .	433
