

Development of Precipitated Iron Fischer-Tropsch Catalysts

Quarterly Technical Progress Report
for the Period 1 January 1995 – 31 March 1995

Texas Engineering Experiment Station Project 32525-44580

Prepared by: Dragomir B. Bukur

Contributors: X. Lang
B. Reddy

Texas A&M University
Department of Chemical Engineering
College Station, Texas 77843-3122

May 23, 1995

Prepared for the Pittsburgh Energy Technology Center,
the United States Department of Energy Under Contract No. DE-AC22-94PC93069
Richard E. Tischer, Project Manager (PETC)

RECEIVED
USDOE/PETC

NOTICE

This report was prepared as an account of work sponsored by an agency of the United States Government. Neither the United States nor any agency thereof, nor any of their employees, makes any warranty, expressed or implied, or assumes any legal liability or responsibility of any third party's results of such use of any information, apparatus, product or process disclosed in this report, or represents that its use by such a third party would not infringe privately owned rights.

PATENT STATUS

U.S./DOE Patent Clearance is not required prior to the publication of this document.

TABLE OF CONTENTS

I.	Executive Summary.....	1
II.	Detailed Description of Technical Progress	2
II-1.	Testing of Previously Synthesized Catalysts	2
II-2.	Reproducibility of Catalyst Preparation	10
II-3.	The Effect of Source of Potassium and Basic Oxide Promoters	10
II-4.	Catalyst Characterization	11
	Plans for the Next Quarter	13
	Tables.....	14
	Figures.....	24
