

COMPARISON OF TRANSPORT FUELS

**FINAL REPORT
(EV45A/2/F3C)**

to the

AUSTRALIAN GREENHOUSE OFFICE

on the Stage 2 study of

Life-cycle Emissions Analysis of Alternative Fuels for Heavy Vehicles

By

Table of Contents

Acronyms.....	ix
Glossary of Terms	xii
Executive Summary.....	xv

Part 1

1. Background.....	1
1.1 Introduction	1
1.2 Life-Cycle Analysis (LCA)	2
1.3 Structure of the Report.....	7
1.4 Sources of Quantitative Information.....	9
1.5 Emissions from Diesel Engines	10
1.6 Greenhouse Gases and Other Emissions	11
2. Ultra Low Sulfur Diesel Summary	15
2.1 Background.....	15
2.2 Results	15
2.3 Viability and Functionality	18
2.4 Health Effects	18
2.5 Environmental Issues.....	19
2.6 ADR Compliance.....	19
2.7 Summary.....	19
3. Fischer-Tropsch Diesel	21
3.1 Introduction	21
3.2 Results	21
3.3 Viability and Functionality	24
3.4 Health Issues.....	24
3.5 Environmental Impact and Benefits	24
3.6 ADR Compliance.....	24
3.7 Summary.....	24
4. Biodiesel	27
4.1 Introduction	27
4.2 Full Fuel-Cycle Analysis of Emissions	27
4.3 Viability, Functionality and Health Issues.....	30
4.4 Environmental Issues.....	30
4.5 ADR Compliance.....	31
4.6 Summary.....	31
5. Canola.....	33
5.1 Background.....	33
5.2 Results	33
5.3 Viability and Functionality	33
5.4 Health Issues.....	33
5.5 Environmental Impact and Benefits	33
6. Hydrated Ethanol	35
6.1 Background.....	35
6.2 Results	35
6.3 Viability and Functionality	38
6.4 Health and OH&S.....	38
6.5 Environmental Issues.....	39
6.6 Expected Future Emissions.....	39
6.7 Summary.....	40
7. Diesohol	41
7.1 Background.....	41
7.2 Full Fuel-Cycle Analysis of Emissions	41
7.3 Viability and Functionality	44

7.4	Health and OH&S.....	44
7.5	Environmental issues.....	44
7.6	ADR Compliance.....	45
7.7	Summary.....	45
8.	Compressed Natural Gas (CNG)	47
8.1	Background.....	47
8.2	Results	47
8.3	Viability and Functionality	50
8.4	Health Issues.....	51
8.5	Environmental Impact and Benefit.....	51
8.6	ADR Compliance.....	51
8.7	Summary.....	51
9.	Liquefied Natural Gas (LNG).....	53
9.1	Background.....	53
9.2	Results	53
9.3	Viability and Functionality	56
9.4	Health Issues.....	56
9.5	Environmental Impact and Benefit.....	56
9.6	ADR Compliance.....	57
9.7	Summary.....	57
10.	Liquefied Petroleum Gas (LPG) - Autogas	59
10.1	Background.....	59
10.2	Full Fuel Cycle Results.....	59
10.3	Viability and Functionality	62
10.4	Health Issues.....	63
10.5	Environmental Issues.....	63
10.6	ADR Compliance.....	63
10.7	Summary.....	63
11.	Liquefied Petroleum Gas (LPG) – HD5	65
11.1	Background.....	65
11.2	Results	65
11.3	Viability and Functionality	68
11.4	Health Effects	69
11.5	Environmental Issues.....	69
11.6	ADR Compliance.....	69
11.7	Summary.....	70
12.	Premium Unleaded Petrol Summary	71
12.1	Introduction	71
12.2	Results	71
12.3	Viability and Functionality	71
12.4	Health Issues.....	71
12.5	Environmental Impact and Benefits	71
13.	Anhydrous Ethanol	73
13.1	Background.....	73
13.2	Results	73
13.3	Viability and Functionality	76
13.4	Health and OH&S.....	76
13.5	Environmental Issues.....	76
13.6	Expected Future Emissions.....	77
13.7	Summary.....	77
14.	Petrohol.....	79
14.1	Background.....	79
14.2	Results	79
14.3	Viability and Functionality	82
14.4	Health and OH&S.....	82

14.5	Environmental Issues.....	83
14.6	ADR Compliance.....	83
14.7	Summary.....	83
15.	Hydrogen	85
15.1	Introduction	85
15.2	Full Fuel Cycle Analysis Results.....	85
15.3	Viability and Functionality	88
15.4	Health Issues.....	88
15.5	Environmental Impact and Benefits	88

Part 2

1.	Low Sulfur Diesel.....	89
1.1	Diesel National Environment Protection Measures.....	89
1.2	Diesel Fuel and the Diesel Engine.....	89
1.3	Upstream and Tailpipe Emissions	90
1.4	Full Fuel-Cycle Analysis of LSD Emissions.....	97
1.5	Viability and Functionality	101
1.6	Health and OHS.....	102
1.7	Environmental Impact	103
1.8	Process trees	104
2.	Ultra-Low Sulfur Diesel	107
2.1	Background.....	107
2.2	Upstream and Tailpipe Emissions	108
2.3	Results	115
2.4	Viability and Functionality.....	121
2.5	Health Effects	122
2.6	OHS Issues	123
2.7	Vapour Pressure Issues.....	123
2.8	Summary.....	123
2.9	Environmental Issues.....	123
3.	Fischer-Tropsch Diesel.....	125
3.1	Introduction	125
3.2	Full Fuel Cycle Analysis	126
3.3	Results	130
3.4	Emissions per unit distance travelled	132
3.5	Viability and functionality.....	135
3.6	Health Issues.....	136
3.7	Use.....	136
3.8	OHS Issues	136
3.9	Vapour Pressure Issues.....	137
3.10	Summary.....	137
3.11	Environmental Impact and Benefits	137
3.12	ADR Compliance	137
4.	Biodiesel	139
4.1.	Biodiesel from Vegetable Oils.....	139
4.2.	Biodiesel	139
4.3.	National Standardisation of Biodiesel	141
4.4.	Tailpipe Emissions.....	142
4.5.	Comparison of Tailpipe Emissions.....	144
4.6.	Upstream Emissions of Canola and Rapeseed.....	145
4.7.	Soybean	155
4.8.	Tallow.....	158

4.9.	Recycled Waste Cooking Oil.....	160
4.10.	European Work.....	161
4.11.	By-Products.....	162
4.12.	Full Fuel-Cycle Analysis of Emissions.....	162
4.13.	Viability, Functionality and Health Issues.....	184
4.14.	Environmental Issues.....	190
4.15.	Expected Future Emissions.....	191
5.	Canola.....	193
5.1	Background.....	193
5.2	Full Fuel-Cycle Analysis.....	193
5.3	Viability and Functionality.....	194
5.4	Health Issues.....	196
5.5	Environmental Impact and Benefits.....	196
6.	Hydrated Ethanol.....	197
6.1	Background.....	197
6.2	Full Fuel-Cycle Emissions.....	202
6.3	Results.....	210
6.4	Viability and Functionality.....	221
6.5	Health and OHS.....	223
6.6	OHS Issues.....	224
6.7	Vapour Pressure Issues.....	225
6.8	Environmental Issues.....	225
6.9	Expected Future Emissions.....	225
6.10	Summary.....	226
7.	Diesohol.....	227
7.1	Background.....	227
7.2	Characteristics of Diesohol.....	228
7.3	Production and Distribution.....	228
7.4	Diesohol Emissions.....	232
7.5	Full Fuel-Cycle Analysis of Emissions.....	234
7.6	Viability and Functionality.....	241
7.7	Health and OHS.....	242
7.8	Environmental Issues.....	244
7.9	Expected Future Emissions.....	244
7.10	Summary.....	245
7.11	Appendix to Diesohol Fuel Chapter.....	245
8.	Compressed Natural Gas.....	247
8.1	Background.....	247
8.2	Full Fuel Cycle.....	249
8.3	Results.....	259
8.4	Viability and Functionality.....	268
8.5	CNG conversions.....	271
8.6	Health Issues.....	271
8.7	OHS Issues.....	272
8.8	Vapour Pressure Issues.....	272
8.9	Environmental Impact and Benefit.....	273
8.10	Expected Future Emissions.....	273
8.11	Summary.....	273
9.	Liquefied Natural Gas.....	275
9.1	Background.....	275
9.2	Full Fuel-Cycle.....	276
9.3	Results.....	284
9.4	Viability and Functionality.....	287
9.5	Health Issues.....	289
9.6	OHS Issues.....	290

9.7	Vapour Pressure Issues	290
9.8	Environmental Impact and Benefit	290
9.9	Expected Future Emissions.....	291
9.10	Summary.....	291
10.	Liquefied Petroleum Gas — Autogas	293
10.1	Background.....	293
10.2	Exbodied Emissions.....	295
10.3	Results	298
10.4	Viability and Functionality	304
10.5	Health Issues.....	305
10.6	Environmental Issues.....	307
10.7	Expected Future Emissions.....	307
10.8	Summary.....	308
11.	Liquefied Petroleum Gas — HD5.....	309
11.1	Background.....	309
11.2	Exbodied Emissions.....	312
11.3	Results	313
11.4	Dual fuel and converted vehicles.....	319
11.5	Viability and Functionality	321
11.6	Health Effects	321
11.7	Environmental Issues.....	322
11.8	Expected Future Emissions.....	323
11.9	Summary.....	323
12.	Premium Unleaded Petrol.....	325
12.1	Introduction	325
12.2	Full Fuel-Cycle Analysis	325
12.3	Results	327
12.4	Viability and Functionality	332
12.5	Health Issues.....	333
12.6	OHS Issues	334
12.7	Vapour Pressure Issues.....	334
12.8	Environmental Impact and Benefits	334
13.	Anhydrous Ethanol	337
13.1	Background.....	337
13.2	Full Fuel-Cycle Emissions.....	337
13.3	Results	338
13.4	Viability and Functionality	343
13.5	Health and OHS	343
13.6	Environmental Issues.....	343
13.7	Expected Future Emissions.....	343
13.8	Summary.....	344
14.	Petrohol.....	345
14.1	Background.....	345
14.2	Full Fuel-Cycle Emissions.....	345
14.3	Results	346
14.4	Viability and Functionality	351
14.5	Health.....	353
14.6	OHS Issues	354
14.7	Vapour Pressure Issues.....	354
14.8	Environmental Issues.....	355
14.9	Expected Future Emissions.....	356
14.10	Summary.....	356
15.	Hydrogen	357
15.1	Introduction	357
15.2	Full Fuel-Cycle Analysis	358

15.3	Results	362
15.4	Viability and Functionality	365
15.5	Health Issues	367
15.6	OHS Issues	368
15.7	Vapour Pressure Issues	369
15.8	Environmental Impact and Benefits	369

Part 3

1.	Weighting Methodologies for Emissions from Transport Fuels.....	371
1.1	Introduction	371
1.2	Background	371
1.3	Greenhouse Gases	372
1.4	Air Quality	372
1.5	Air Toxics	377
1.6	ADR and Fuel Quality Review Method.....	379
1.7	Discussion	381
2.	Modelling Emission Standards and Driving Conditions.....	383
2.1	Modelling the Influence of Future Emission Standards.....	383
2.2	Modelling the Influence of Driving Conditions.....	393
2.3	Vehicle Data.....	394
3.	References.....	403

Appendices

1.	Terms of reference	419
2.	The GREET model and the SIMAPRO model	427
3.	Uncertainty Analysis.....	431
4.	Stakeholder Consultation.....	433
5.	Emissions per tonne-kilometre and per passenger-kilometre	437
6.	Diesohol information	449
7.	Euro Standards.....	457
8.	Carbon dioxide emission factors.....	461
9.	Nitrogen emissions from vehicles.....	463
