Continued from reel 039

8. True volume of Pressure vessels
9. Polymerization of Pentenes and Hexenes
10. Lowering of Octane Number by Peroxide formation on storage
11. Catalytic polymerization of Unsaturated Hydrocarbons
12. Preparation of Isobutene
13. Preparation of Alcohols and Ethers from Gasol
14. Inhibitors for Polymer - benzines
15. Preparation of alcohols from Gasol
16. Calculations of Wall thickness of ovens
17. Active carbon for scrubbing residual gas
18. Drawings and tables (Serial No. D.V.A.) from medium - pressure reports
19. Lub. oil researches with Gasol (brief note)
20. Graphs comparing properties of cracked spirit and Co recirculation spirit
21. Distillation curve for Fe cat. spirit before and after purification
22. Octane No. of mixtures of polymer spirit and residual spirit from lub. oil synthesis
23. Lub. oils from medium pressure product - a series of reports
24. Do. Do. Do. - other reports (inc. spirit refining)
25. Do. Do. Do. Product analyses and polymerisation expts. for oven control Fe cat.
26. Lub. oils from medium pressure product - product analyses and polymerisation expts. for oven control Co cat.
27. M.S. index (German) covering 3453-30/5.01-22 to 26
