

CONFIDENTIAL

THE WESSELING SYNTHETIC FUEL PLANT

SUMMARY

This report describes the inspection trip of the U. S. Naval Technical Mission in Europe to the Wesseling Synthetic Oil Plant, 17 March to 19 March 1945.

It describes the present condition of the plant and includes a detailed account of the processes used. There is also an operating summary, giving the yields produced during the period in which the plant operated and other facts of interest concerning its construction. There is also a product analysis.

May 1945
