CONTENTS

	Page
Preface.....	1
Introduction.....	1
Experimental part.....	3
Apparatus.....	3
Preliminary tests.....	3
Experiments with various one-component catalysts.....	5
Thoria one-component catalyst.....	6
Effect of synthesis temperature.....	6
Effect of synthesis pressure.....	6
Effect of pressure versus contact time upon conversion.....	8
Effect of two-stage and recycling operations.....	8
Effect of promoters and carrier on the activity of thorium oxide.....	9
Effect of alumina.....	9
Coprecipitated $\text{ThO}_2\text{-Al}_2\text{O}_3$	10
Separate ThO_2 and Al_2O_3 layers in the same reactor.....	10
$\text{ThO}_2\text{-Al}_2\text{O}_3$ precipitated separately and mixed in wet state.....	11
$\text{ThO}_2\text{-Al}_2\text{O}_3$ -kieselguhr.....	11
Summary of $\text{ThO}_2\text{-Al}_2\text{O}_3$ experiments.....	11
Effect of alkali.....	11
On ThO_2 catalyst.....	11
On $\text{ThO}_2\text{-Al}_2\text{O}_3$ catalyst.....	13
Effect of zinc oxide.....	13
On ThO_2 catalyst.....	13
On Al_2O_3	13
On $\text{ThO}_2\text{-Al}_2\text{O}_3$	15
Effect of chromium oxide.....	15
On ThO_2	15
On Al_2O_3	15
Effect of other promoters on ThO_2	15
Phosphoric acid.....	15
Iron.....	16
Copper.....	16
Conversion of dimethylether.....	17
Analytical part.....	18
Description of techniques.....	18
Gas analysis.....	18
Determination of dimethylether.....	18
Study of gasol fraction.....	19
Distillation of liquid hydrocarbons.....	19
Determination of unsaturated liquid hydrocarbons.....	20
Determination of aromatic compounds.....	20
Determination of acids, esters, alcohols, aldehydes, ketones, and phenols.....	20
Determination of the gasoline knock rating.....	21
Investigation of lubricant properties of the high-boiling oil fractions.....	21
Composition of liquid products from a life test over $\text{ThO}_2\text{-Al}_2\text{O}_3$ catalyst at 300 atmospheres.....	21
Description of durability experiment.....	21
Analysis of the gasol fraction.....	23
Investigation of liquid hydrocarbon fraction obtained at synthesis temperature of 425°C	23
Analysis of liquid hydrocarbon fraction obtained at synthesis temperature of 375°C	28
Composition of liquid products obtained under various synthesis conditions.....	30
ThO_2 catalyst, 150 atmospheres, 375°C	30
ThO_2 catalyst, 30 atmospheres, 475°C	30
Composition of alcohol fraction.....	30
Antiknock rating of the hydrocarbons.....	31
Nature of the isosynthesis reaction.....	33
Comparison with other catalytic procedures for the hydrogenation of carbon monoxide.....	33
Essential features of the isosynthesis.....	33
The catalyst.....	33
Synthesis conditions.....	33
Products.....	33
Possible mechanisms of the reaction.....	34
Isomerization of primary n-paraffins.....	34
Intermediate alcohol production.....	35
Oxygenated byproducts of the isosynthesis.....	35
Effect of the catalyst.....	35
Intermediate dimethylether production.....	36
Isomerization equilibria of olefins obtained by dehydration of alcohols.....	37
Polymerization, alkylation, and cyclization reaction in the production of higher hydrocarbons (C_5+).....	38

ILLUSTRATIONS

Fig.	Page
1. Schematic diagram of isosynthesis apparatus.....	3
2. Low-temperature distillation of C ₂ -C ₄ fractions from various catalysts.....	4
3. Composition of products of the isosynthesis obtained over thoria catalyst at 150 atmospheres.....	5
4. Influence of pressure upon the nature and quantity of the products of the isosynthesis (ThO ₂ catalyst, 450° C.).....	6
5. Pressure apparatus for recycling experiments.....	7
6. Influence of alkali content of a thoria catalyst in the isosynthesis (30 atmospheres, various temperatures, equal throughput).....	9
7. Distillation curve of the product from experiment 35 (Al ₂ O ₃ +10 percent Cr catalyst, 30 atmospheres, 500° C.).....	12
8. Course of a durability test (No. 250) with ThO ₂ +20 percent Al ₂ O ₃ catalyst at 300 atmospheres.....	15
9. Composition of the product from experiment 250 (one-stage test), grams per normal cubic meter (CO-H ₂).....	21
10. Distillation curves of gasol fraction from experiment 250.....	23
11. Distillation of hydrogenated liquid hydrocarbons from experiment 250.....	23
12. Analysis of liquid hydrocarbons (290 cc.) from experiment 250a (ThO ₂ +20 percent Al ₂ O ₃ catalyst, 300 atmospheres, 425° C.).....	23
13. Precise distillation of fractions 12, 13, 14 (144 cubic centimeters) of experiment 250a.....	24
14. Precise distillation of fractions 15, 16, 17 (145 cubic centimeters) of experiment 250a.....	26
15. Distillation of hydrogenated liquid hydrocarbons obtained under special isosynthesis conditions.....	26
16. Distillation curve of water-soluble -100° C. fraction from experiment 250.....	30
17. Distillation curve of water-soluble -100° C. fraction from experiment 159 (150 atmospheres, 370° C.).....	31
18. Isomerization equilibria of butane and pentane.....	34
19. Isomerization equilibria of hexane and heptane.....	34
