Summary.....	1	Reactions catalyzed by the cobalt carbonyls—Con.	
Introduction.....	3	The oxo reaction—Continued	
Acknowledgments.....	4	Other reactions occurring under oxo	
Structure and properties of metal carbonyls.....	5	conditions.....	49
Composition and effective atomic number		Hydrogenation of olefins.....	50
of metal carbonyls and the nature of the		Polymerization of olefins.....	50
metal-carbon-oxygen bond.....	5	Hydrogenation of aldehydes.....	50
Spectra and structures of cobalt carbonyls.....	8	Acetal formation.....	50
Dicobalt octacarbonyl, $\text{Co}_2(\text{CO})_8$	8	Aldol formation.....	50
Tetracobalt dodecacarbonyl, $\text{Co}_4(\text{CO})_{12}$	12	Ketone formation.....	51
Cobalt hydrocarbonyl, $\text{HCo}(\text{CO})_4$, and		Kinetics.....	51
cobalt deutero carbonyl, $\text{DCo}(\text{CO})_4$	12	Effect of partial pressures of carbon	
Proton magnetic resonance of $\text{HCo}(\text{CO})_4$	13	monoxide and hydrogen.....	51
Cobalt carbonyl anion, $[\text{Co}(\text{CO})_4]^-$	14	Effect of temperature.....	52
Dicobalt octacarbonyl.....	15	Effect of solvent.....	52
Preparation.....	15	Effect of bases.....	52
Analysis.....	16	Kinetics at low pressures (under	
Reactions with bases.....	16	100 atm.).....	53
Formation of cobalt carbonyl anion		Mechanism of hydroformylation.....	54
by electron transfer.....	18	Function of carbonyls.....	54
Mechanism of the reaction.....	20	Early postulations as to mechan-	
Reaction with alkynes.....	21	ism.....	56
The infrared spectra of acetylenic		Later work.....	57
dicobalt hexacarbonyls.....	23	Nature of the olefin in the inter-	
Structure of acetylenic dicobalt		mediate complexes.....	60
hexacarbonyls.....	23	Hydrogenation of organic compounds with	
Physical constants of diphenyl-		synthesis gas.....	61
acetylene dicobalt hexacarbonyl.....	25	Homogeneous character of the hydro-	
Stability of acetylenic dicobalt		genation.....	61
hexacarbonyls.....	26	Hydrogenation of double bonds in con-	
Cobalt hydrocarbonyl.....	26	jugated systems.....	62
Preparation.....	26	α,β -Unsaturated aldehydes and ke-	
Stability.....	27	tones.....	62
Reactions of $\text{HCo}(\text{CO})_4$	30	Conjugated diolefins and styrenes..	62
Dissociation of iron pentacarbonyl in		Polynuclear aromatic compounds..	63
amines.....	30	Reduction of aromatic alcohols and	
Dissociation in piperidine.....	30	ketones.....	64
Effect of amine structure on the dis-		Hydrogenation of thiophene and sub-	
sociation of $\text{Fe}(\text{CO})_5$	31	stituted thiophene.....	68
Mechanism.....	31	Lengthening the carbon chain (homologa-	
The iron pentacarbonyl-aqueous alkali sys-		tion) of alcohols.....	69
tem.....	32	Rearrangements under hydroformylation	
The iron carbonyl-acetylene complex		conditions.....	71
$\text{Fe}_2\text{C}_{10}\text{H}_4\text{O}_8$	35	The reaction of acetylenes.....	73
Structure.....	35	Polymerization of acetylenes by dico-	
Preparation and properties.....	38	balt octacarbonyl.....	73
Iron hydrocarbonyl, $\text{H}_2\text{Fe}(\text{CO})_4$	41	Reactions of acetylenes under hydro-	
Preparation.....	41	formylation conditions.....	74
Decomposition in the gas phase.....	41	Reaction of 1-pentyne under hy-	
Decomposition in solution.....	42	droformylation conditions.....	74
Reaction with acetone and 1-hexene..	42	Alkynes as inhibitors of hydrofor-	
Reactions catalyzed by the cobalt carbonyls.....	44	mylation reactions.....	74
The oxo reaction.....	44	Reaction of diphenylacetylene un-	
Introduction.....	44	der hydroformylation conditions..	75
The principal reaction.....	45	Stoichiometric reaction of acety-	
Commercial charge stocks and		lene with cobalt hydrocarbonyl..	75
products.....	45	Reaction of allenes with dicobalt octacar-	
Scope and limitations of the reac-		bonyl.....	75
tion.....	45	Some catalytic properties of iron carbonyls.....	76
		Bibliography.....	79

ILLUSTRATIONS

Fig.	Page
1. Infrared spectra of cobalt carbonyls in the gaseous state.....	7
2. Infrared spectra of cobalt carbonyls in solution.....	9
3. Ultraviolet spectra of cobalt carbonyls in the gaseous and solution states.....	11
4. Infrared spectra illustrating complex formation in dimethylamine.....	20
5. Infrared spectra illustrating complex formation in pyridine.....	21
6. Infrared spectra of dicobalt octacarbonyl and acetylenic dicobalt hexacarbonyls.....	24
7. Potentiometric titration at 26° C. of 25 ml. of aqueous $\text{HCo}(\text{CO})_4$ with 0.1 <i>N</i> NaOH.....	29
8. Potentiometric titration of 0.0181 molar $\text{Fe}_2\text{C}_{10}\text{H}_4\text{O}_8$ with 0.50 <i>N</i> KOH; initial volume 75 ml.....	37
9. Potentiometric titration of 0.00145 molar $\text{Fe}_2\text{C}_{10}\text{H}_4\text{O}_8$ with 0.050 <i>N</i> KOH; initial volume 100 ml.....	38
10. Infrared spectra of $\text{Fe}_2\text{C}_{10}\text{H}_4\text{O}_8$	39
11. Rates of hydroformylation of olefins at 110° C. and 233 atm. with $1\text{CO} + 1\text{H}_2$	47
12. Rate of hydroformylation of cyclohexene at varying total pressures of $1\text{CO} + 1\text{H}_2$; 2.7 percent $\text{Co}_2(\text{CO})_8$, 110° C.....	51
13. Rates of hydroformylation of cyclohexene as a function of CO and H_2 pressures.....	53
14. Rate constants for oxo reaction of cyclohexene at 110° C. fitted to Martin's equation.....	58
15. Use of Martin's equation and experimental points to determine effect of composition of synthesis gas on rate of oxo reaction; cyclohexene at 110° C.....	58
16. Rates of reduction of aromatic alcohols.....	67
17. Hydroformylation of pinacol.....	72

TABLES

1. Monomeric and polymeric metal carbonyls.....	5
2. Some substituted carbonyls.....	5
3. Volatilities of metal carbonyls.....	6
4. Bond distances and force constants of carbonyl groups.....	6
5. Infrared spectra of cobalt carbonyls.....	10
6. Vibrations of $\text{Co}_2(\text{CO})_8$	10
7. Vibrations of $\text{HCo}(\text{CO})_4$	13
8. Infrared-active carbonyl stretching frequencies (cm.^{-1}) of metal carbonyls; nearest combination band with frequency interval (Δ) from the lowest terminal carbonyl frequency.....	15
9. Products from reactions of $[\text{Co}(\text{CO})_4]_2$ with bases.....	16
10. Acetylenic dicobalt hexacarbonyls.....	22
11. Physical constants for diphenyl-acetylene dicobalt hexacarbonyl in benzene solutions at 30° C.....	25
12. Specific reaction rate constant for the decomposition k , $10^3 x/t a(a-x)$	28
13. Specific reaction rate constants of $\text{HCo}(\text{CO})_4$ decomposition.....	28
14. Conductivities of 0.161-molar solutions of $\text{Fe}(\text{CO})_5$	31
15. Analysis of a mixture of $\text{H}_2\text{Fe}_2(\text{CO})_8$ and $\text{NaHFe}_2(\text{CO})_8$	33
16. Potentiometric titration of 0.0181 molar $\text{Fe}_2\text{C}_{10}\text{H}_4\text{O}_8$ with 0.50 <i>N</i> KOH; initial volume, 75 ml.....	35
17. Potentiometric titration of 0.00145 molar $\text{Fe}_2\text{C}_{10}\text{H}_4\text{O}_8$ with 0.050 <i>N</i> KOH; initial volume, 100 ml.....	36
18. Solubility of the iron carbonyl-acetylene complex and its monohydrate at 25° C., g./100 ml. of solvent.....	40
19. Products and yields from the reaction between $\text{NaHFe}(\text{CO})_4$ and C_2H_2	40
20. Spontaneous decomposition of iron hydrocarbonyl in heptane solution at 25° C.....	42
21. Reactions of $\text{H}_2\text{Fe}(\text{CO})_4$ and $\text{HCo}(\text{CO})_4$ at atmospheric pressure and room temperature.....	43
22. Free energy and equilibrium values for the hydroformylation of ethylene.....	46
23. Rates of hydroformylation of olefins at 110° C.....	48
24. Distribution of hydrogenated products from the cobalt-carbonyl-catalyzed reaction of isobutylene and <i>t</i> -butyl alcohol with synthesis gas.....	49
25. Variation in rate of hydroformylation of diisobutylene with composition of synthesis gas.....	52
26. Effect of bases on the rate of hydroformylation of cyclohexene.....	53
27. Product distribution from hydroformylation of isomeric pentenes.....	60
28. Hydrogenation of polynuclear aromatic hydrocarbons with $1\text{H}_2 + 1\text{CO}$ and $\text{Co}_2(\text{CO})_8$ as catalyst.....	63
29. Reaction of aromatic alcohols and ketones with synthesis gas and cobalt catalyst at 180°-185° C.....	65
30. Decarbonylation experiments (185° C. for 3 hours).....	65
31. Specific reaction-rate constants, k , for reduction of aromatic alcohols.....	66
32. Effect of solvent on specific reaction-rate constant, k , of reduction of benzhydrol.....	68
33. Apparent heats and entropies of activation for hydrogenation of benzhydrols under oxo conditions.....	68
34. Reduction of thiophene compounds with synthesis gas ($2\text{H}_2:1\text{CO}$) and a cobalt catalyst at 180°-190° C.....	70
35. Reaction of substituted benzyl alcohols with $2\text{H}_2 + 1\text{CO}$	70
36. Relative rates of reaction of substituted benzyl alcohols.....	71
