

I. C. 7322,  
May 1945.

INFORMATION CIRCULAR

UNITED STATES DEPARTMENT OF THE INTERIOR - BUREAU OF MINES

ANNUAL REPORT OF RESEARCH AND TECHNOLOGIC WORK ON COAL

Fiscal Year 1944<sup>1</sup>

By A. C. Fieldner,<sup>2</sup> P. L. Fisher,<sup>3</sup> and R. E. Brewer<sup>4</sup>

CONTENTS

	<u>Page</u>
Introduction .....	1
Acknowledgments .....	2
Origin, composition, and properties of coals .....	4
Inspection, sampling, and analyses .....	4
Fundamentals of coal sampling .....	5
Analyses of Kentucky coals .....	5
Analyses of Pennsylvania anthracitic coals .....	6
Constitution, analytical methods, and standardization .....	6
Rare and uncommon chemical elements in coal .....	7
Yields of primary tar and light oil from coals of various ranks and types .....	7
Comparison of standard test sieves .....	8
Application of the Rosin-Rammler law for screening coal .....	8
Precision of the volatile matter determination .....	9
Standardization of proximate analysis .....	9
Cooperative investigation on fusibility of coal ash .....	9
Coal mining .....	9
Experimental mine and dust explosions .....	9
Studies of coal-mine roof .....	9
Application of rock dust in coal mines .....	10
Increase in charge limit of permissible explosives .....	10
Explosibility of North Dakota lignite dust in air .....	11
Inflammability and explosibility of industrial dusts .....	11
Explosibility of powders from the plastics industry .....	12
Precision measurements of minimum static electric sparks .....	12

<sup>1</sup>/ The Bureau of Mines will welcome reprinting of this paper, provided the following acknowledgment is used: "Reprinted from Bureau of Mines Information Circular 7322."

<sup>2</sup>/ Chief, Fuels and Explosives Branch, and chief, Coal Division, Bureau of Mines, Washington, D. C.

<sup>3</sup>/ Technologist (Coal), Office of the chief, Fuels and Explosives Branch, Bureau of Mines, Washington, D. C.

<sup>4</sup>/ Chemical engineer, Coal Carbonization Section, Fuels and Explosives Branch, Bureau of Mines, Pittsburgh, Pa.

## CONTENTS (Cont'd.)

	<u>Page</u>
Mining methods and practices .....	13
Pillar extraction .....	13
Coal strip mining .....	14
Control of sulfur and ash in mine-run metallurgical coal .....	14
Roof control .....	14
Use of Diesel engines underground .....	15
Grounding electrical equipment in coal mines .....	15
Ground-resistance measurements of drill-hole casings .....	16
Air flow at fan-pipe lines discharge .....	16
Mine-fan signal alarms and power releases .....	17
Construction of mine ventilating doors .....	17
Precautions for old mine workings .....	17
Permissible mine equipment .....	17
Gas explosions and use of explosives .....	17
Burning rate of fuse .....	18
Inflammability and ignition temperatures of acetic anhydride ...	18
Acetylene-generator explosions .....	18
Hazards from common gases and vapors .....	19
Coal-mine explosions and fires during the fiscal year 1943 .....	19
Use and misuse of flame safety lamps .....	20
Accidents due to misuse of explosives .....	20
Exploration for new coals .....	20
Coking coals .....	20
Coal reserves in areas of critical fuel supplies .....	21
Examinations and reports for the Smaller War Plants Corporation.	21
Preparation of coal .....	22
Improvement of coals for special purposes .....	22
Preparation of coal for production of synthetic liquid fuels ...	22
Low-ash coke for carbon electrodes .....	22
Marginal special-purpose coals .....	23
Miscellaneous preparation studies .....	23
Development of improved methods of coal preparation .....	23
Characteristics of coal and its associated impurities .....	24
Washability studies .....	24
Mechanical cleaning .....	25
Concentrating tables .....	25
Screening of coals .....	25
Methods for loading coals .....	26
Storage of coal .....	26
Action of coal in storage .....	26
Pointers on the storage of coal .....	26
Preventing spontaneous combustion in stored coal .....	27
Storage of subbituminous coal .....	27
Influence of storage on caking and coking properties of coal .....	28
Spontaneous heating of stored coal .....	30
Utilization of coal .....	32
Combustion .....	32
Fuel-engineering service .....	32

## CONTENTS (Cont'd.)

	<u>Page</u>
Boiler feed-water conditioning .....	32
Smoke abatement .....	33
How to save fuel .....	34
National Fuel Efficiency Program .....	34
Mixtures of coal and oil .....	35
Utilization of small-size anthracite .....	36
Supplementing anthracite with other fuels for home heating ...	37
Studies of packaged fuel .....	37
Automatic stoker for heating water .....	38
Properties of coal ash as related to clinkering and slagging .	38
Thermal conductivity of coal-ash slags .....	39
External corrosion of furnace-wall tubes .....	39
Burning solid fuels on traveling grates .....	40
Reactivity of solid fuels by the ignition-point method .....	40
Stability and structure of burner flames .....	40
Carbonization and gasification .....	41
Carbonizing properties of American coals .....	46
Coke from blends of coal and its coke breeze .....	53
Coke from blends of coal and low-temperature coke .....	54
Laboratory tests of coking properties of western coals .....	54
Byproduct coke-oven tests of Washington coals .....	57
Tests of the Heliopore coal-carbonization power-plant process.	61
Effect of acids and alkalis on carbonization products .....	62
Influence of resins on coking properties .....	62
Plasticity of coals .....	63
Swelling properties of coal during the coking process .....	66
Problems of metallurgical coke for western furnaces .....	68
Beehive-coke production .....	69
Effect of compression of coal charge on coke production .....	70
Producer-gas investigations .....	72
Liquefaction .....	72
Bureau of Mines research .....	72
Mechanism of coal-hydrogenation processes .....	73
Catalysts for primary liquefaction of coal by hydrogenation ..	75
Synthesis of liquid fuels by hydrogenation of carbon monoxide - catalysts and reaction mechanism .....	75
Effect of pressure and dilution of synthesis gas with nitrogen	77
Research on water-gas production .....	78
Development work on the Fischer-Tropsch process .....	78

## ILLUSTRATIONS

<u>Fig.</u>		<u>Following</u> <u>page</u>
1.	Variation of minimum energies of single static sparks for ignition of mixtures of varying composition using fixed spark gaps .....	12

## ILLUSTRATIONS (Cont'd.)

<u>Fig.</u>	<u>Following page</u>
2. Variation of minimum energies of single static sparks for ignition of mixtures of 8 percent natural gas, using 1/2-inch spheres and varying spark gaps .....	12
3. Effects of storage (accelerated) of coal on strength index of coke .....	28
4. Self-heating of dry, 0- to 1/4-inch coal in an atmosphere of 85 + percent oxygen .....	28
5. Viscosity of coal-ash slags in the liquid state as a function of composition and temperature .....	38
6. Flame of natural gas and air, partly drawn into burner tube at gas flow just exceeding critical flow for flash-back: A, Photograph with particle tracks in vertical center plane; B, diagram of flow pattern and velocity distribution .....	40
7. Expansion oven, open .....	68
8. Expansion oven, closed .....	68
9. Beehive-coke ovens before rehabilitation .....	70
10. Beehive-coke ovens after rehabilitation .....	70
11. Improvised coke-drawing machine .....	70
12. Three-stage experimental Fischer-Tropsch unit .....	78
13. Single-stage Fischer-Tropsch unit .....	78
14. Synthesis-gas generator .....	78
15. Catalyst-preparation equipment .....	78
16. Pelleting machine and granulators .....	78
17. Ruhrchemie Fischer-Tropsch converter .....	78
18. Internally cooled experimental converter .....	78
