

GASIFICATION OF LIGNITE IN A COMMERCIAL-SCALE PILOT PLANT

Progress Report for 1947-48

by

A. C. Burr,^{1/} J. C. Holtz,^{2/} A. W. Koth,^{3/} and W. H. Oppelt^{4/}

CONTENTS

	<u>Page</u>
Summary.....	1
Introduction.....	2
Acknowledgments.....	2
Objectives of tests.....	2
General.....	2
Specific.....	2
Description of commercial-scale pilot plant.....	3
General.....	3
Flow diagram and description of operations.....	3
The retort unit.....	3
Fuel-handling equipment.....	4
Fuel-charging mechanism.....	5
Char discharge and blow-over dust receiver.....	5
Recuperator.....	5
Instrumentation and methods of obtaining data.....	6
Method of test.....	7
Accuracy of results.....	7
Results of tests.....	8
General.....	8
Lignite tested.....	9
Operating results.....	10
Analyses of product gas.....	11
Analyses of char.....	11
Discussion of results.....	12
Operating results.....	12
Hydrogen-carbon monoxide ratio.....	13
Hydrogen.....	14
Heat and material balances.....	14
Rates of heat transfer.....	17

 - ^{2/} Chief, Chemistry and Physics Section, Lignite Branch, Bureau of Mines, Grand Forks, N. Dak.
 - ^{3/} Head, Dept. of Mining Engineering and Professor of Metallurgy, University of North Dakota, and consultant chemical engineer. Lignite Pilot Plant, Bureau of Mines, Grand Forks, N. Dak.
 - ^{4/} Chief, Utilization Section, Lignite Branch, Bureau of Mines, Grand Forks, N. Dak.

CONTENTS (Cont.)

	<u>Page</u>
Behavior of retort tubes.....	17
General.....	17
Spray-coated retort tube.....	17
Alloy-clad retort tube.....	17
Cast-alloy retort tube.....	19
Flame guard.....	19
Inner retort tube.....	20
Flow of lignite in simulated annulus.....	20
Conclusions.....	20
Literature cited.....	22
Appendix.....	22

TABLES

1. Summary of operation of commercial-scale pilot plant, February 1945 to May 1948.....	9
2. Typical analyses of natural lignite gasified in commercial-scale pilot plant.....	10
3. Typical results on gasification of natural lignite in commercial-scale pilot plant.....	10
4. Typical analyses of product gas from commercial-scale pilot plant.....	11
5. Analyses of chars from commercial-scale pilot plant.....	12
6. Operating results on commercial-scale pilot plant.....	13
7. Heat and material balances for period 8E of commercial-scale pilot plant (ratio $H_2/CO = 2.30$).....	15
8. Heat and material balances for period 6A of commercial-scale pilot plant (ratio $H_2/CO = 4.04$).....	16
9. Heat and material balances for period 7E of commercial-scale pilot plant (ratio $H_2/CO = 5.59$).....	16
10. Heat and material balances for period 5B of commercial-scale pilot plant (ratio $H_2/CO = 7.21$).....	17
11. Proximate and ultimate analyses of natural lignite used in commercial-scale pilot plant, runs 5 through 8.....	23
12. Summary data on gasification of natural lignite in commercial-scale pilot plant, runs 5 through 8.....	24
13. Static pressures, retort dimensions, and steam flow in reaction zones of commercial-scale pilot plant, runs 5 through 8.....	26
14. Analyses of product gas from natural lignite in commercial-scale pilot plant, runs 5 through 8.....	27
15. Proximate and ultimate analysis of chars and residues from commercial-scale pilot plant, runs 5 through 8.....	28

ILLUSTRATIONS

<u>Fig.</u>	<u>Follows</u> <u>page</u>
1. Plan view of Government property and commercial-scale pilot plant, Grand Forks, N. Dak., 1945.....	2
2. Commercial-scale pilot plant for gasifying lignite, Grand Forks, N. Dak.....	2
3. Flow diagram of commercial-scale pilot plant for gasifying lignite.....	2
4. Arrangements of retort unit.....	4
5. Reciprocating feeder and rotary-valve charger.....	4
6. Drive mechanism for reciprocating feeder and rotary-valve charger.....	4
7. Char and blow-over dust receivers.....	6
8. Instrument panel in control room.....	6
9. Relation between ratio of hydrogen to carbon monoxide and excess steam at 60 to 70 percent gasification of carbon in lignite.....	12
10. Relation between ratio of hydrogen to carbon monoxide and percentage of reducing gases.....	12
11. Relation between ratio of hydrogen to carbon monoxide and gas composition.....	14
12. Corrosion, scale, and ash deposits on inside alloy-clad retort tube after run 5.....	18
13. Scale and ash deposits at a vertical weld before cleaning and corroded areas revealed by cleaning on inside of alloy-clad retort tube after run 5.....	18
14. Blisters and scale on outside of alloy-clad retort tube after run 5.....	18
15. Growth of magnetite scale over vertical weld on outside of alloy-clad retort tube after run 5.....	18
16. Deformation of alloy-clad retort tube along axial plane 1-3 during 3,310 hours of service.....	18
