UNITED STATES DEPARTMENT OF THE INTERIOR
Douglas McKay, Secretary
BUREAU OF MINES
J. J. Forbes, Director

Work on manuscript completed June 1953. The Bureau of Mines will welcome reprinting of this paper, provided the following footnote acknowledgment is made: "Reprinted from Bureau of Mines Report of Investigations 5030."

The work upon which this report is based was done under a cooperative agreement between the Bureau of Mines, United States Department of the Interior, and West Virginia University.

February 1954

GASIFICATION OF PULVERIZED COAL WITH STEAM AND OXYGEN AT ATMOSPHERIC PRESSURE

by

G. R. Strimbeck,^{1/} J. B. Cordiner, Jr.,^{2/} N. L. Baker,^{2/} J. H. Holden,^{2/}

K. D. Plants,^{2/} and L. D. Schmidt^{3/}

CONTENTS

	<u>Page</u>
Summary and conclusions	1
Introduction	2
Acknowledgments	2
Design of gasifier and its effect on experimental program	2
Description of pilot plant	4
Reactant and product flows	4
Gasifier construction details	5
Slag-removal equipment	5
Primary reaction zone	5
Secondary reaction zone	6
Heat trap or cooling zone	6
Modifications in gasifier construction	6
Reactant-injection-burner designs	7
Coal-feeding system	10
Dust-removal and gas-cooling equipment	11
Test procedures used	12
Operability of plant	13
Methods of measuring reactant and product quantities	14
Stability of refractory linings	14
Results	16
Principal results	16
Coals charged	24
Types of residues recovered	26
Moisture tests and steam-decomposition results	26
Data on sulfur content of gas	28
Data on dust content of gas	29
Reactant-injection-burner-design data	30
Accuracy of results	32
Probable accuracy of measurements	32
Product-gas measurements	32
Residue measurements	32
Comparison of product-gas data and residue data	33
Other measurements	33
Discussion of results	34
Effect of oxygen-carbon ratio	34
Effect of steam-carbon ratio	35
Process heat balance	35
Process cost evaluation	36
Development of experimental program	37

TABLES

	<u>Page</u>
1. Principal results on pilot-plant atmospheric gasifier 4, runs 4 through 34	17
2. Ultimate analyses, calorific values, and ash fusibilities of Sewickley-bed coal used for runs 1 through 34 on atmospheric gasifier 4	25
3. Weights, analyses, and calorific values of residues recovered ..	26
4. Comparison of experimentally determined moisture content of product gas with values calculated from flow and residue data.	28
5. Sulfur content of coal and H ₂ S and organic sulfur contents of product gas for runs 13 through 20 and 30 through 34	29
6. Dust concentration leaving scrubber for test runs on atmospheric gasifier 4	30
7. Reactant-injection-burner design data	31
