SUMMARY OF CONTENTS

PART 1. SURVEY OF ADVANCES IN CATALYSIS

INTRODUCTION

MULTIMETALLIC CATALYSTS

EFFECTS OF CATALYST-SUPPORT INTERACTION, PARTICLE SIZE,
AND SURFACE MORPHOLOGY

CHARACTERIZATION

CATALYST PREPARATION

POISONING AND REGENERATION

MECHANISM AND SURFACE CHEMISTRY

PART 2. ADVANCES IN SUPPORTING DISCIPLINES

INTRODUCTION

REACTOR ENGINEERING AND CATALYST TESTING

INORGANIC CHEMISTRY

MATERIALS SCIENCE

SURFACE SCIENCE

PART 3. SPECIFIC COAL CONVERSION PROCESSES

INTRODUCTION

PREFACE TO SECTIONS III AND IV - AN OVERVIEW OF PERTINENT
PETROLEUM REFINING OPERATIONS

UPGRADING OF HYDROCARBONIZATION LIQUIDS FROM THE COALCON PROCESS

REFINING COAL LIQUIDS FROM THE COED, H-COAL AND SYNTHOIL
PROCESSES TO HIGH-OCTANE GASOLINE, JET FUEL AND DIESEL FUEL

CONVERSION OF SRC TO LOW SULFUR, LOW NITROGEN LIQUID BOILER
FUELS

CATALYTIC HYDROCRACKING OF COAL OR LIGNITE TO LOW SULFUR, LOW
NITROGEN LIQUID BOILER FUELS

COMBINATION SHIFT CONVERSION AND CATALYTIC METHANATION OF
SYNTHESIS GAS TO SNG

CATALYTIC GASIFICATION OF COAL OR LIGNITE TO SYNTHESIS GAS
AND/OR SNG

ADVANCED SYNTHESIS OF SELECTED FEEDSTOCKS, DIESEL FUEL AND
LPG FROM CO AND H₂

SUMMARY OF CONTENTS	iii
TABLE OF CONTENTS	iv
LIST OF TABLES	xii
LIST OF FIGURES	xv
ACKNOWLEDGMENT	xvi
ABSTRACT	xvii
PART 1. SURVEY OF ADVANCES IN CATALYSIS	
I. INTRODUCTION	1
II. MULTIMETALLIC CATALYSTS	4
A. Introduction	4
B. General Nature of Bimetallic Catalysts	6
C. Physical Properties of Bimetallic Catalysts	8
1. Thermal Stability	9
2. Chemical Stability	10
D. Catalytic Properties	12
1. Activity	13
2. Activity Maintenance	14
3. Selectivity	16
E. The Application of Bimetallic Catalysts for the Catalytic Conversion of Coal	19
1. Hydrogenation/Dehydrogenation	21
2. Hydrogenolysis	23
3. Water-Gas Shift	24
F. Summary	24
G. References	26
III. EFFECTS OF CATALYST-SUPPORT INTERACTION, PARTICLE SIZE, AND SURFACE MORPHOLOGY	30
A. Introduction	30
B. General Comments	30
C. Catalyst-Support Interaction and Stabilization	31
1. Addition of Stabilizing Compounds to Catalyst Systems	32
2. Catalyst-Support Interactions	34
a. Thermal Stability	34
b. Surface Chemistry	37
D. Effects of Surface Structure and Particle Size	39
1. General Concept	39
2. Specific Examples of Particle Size Effects	41
E. Practical Implications	43
1. Catalyst Support Interaction and Stabilization	43
2. Effect of Structure and Particle Size	44
F. References	46

	<u>Page</u>
IV. CHARACTERIZATION	50
A. Introduction	50
B. General Discussion	51
C. Surface Area by Chemisorption	52
1. Metals	53
2. Oxides	56
D. Surface Acidity	57
E. Impact of Characterization in Catalysis	58
F. References	60
V. CATALYST PREPARATION	63
A. Introduction	63
B. Metallic Catalysts	64
1. Unsupported Metal Catalysts	67
2. Supported Metal Catalysts	68
a. The Support	68
b. The Metal	74
C. Nonmetallic Catalysts	78
1. Unsupported Catalysts	79
2. Supported Systems	80
D. Practical Implications	82
1. Dispersed Materials	82
2. Supported Catalysts	83
3. Controlled Physical Property Supports	84
4. Stabilized Supports	85
5. Stabilized Supported Metals	85
6. Multimetallic Catalysts	86
E. References	87
VI. POISONING AND REGENERATION	91
A. Introduction	91
B. General Aspects of Poisoning	92
C. Sulfur	93
1. General	93
2. Kinetics and Mechanism	96
3. Regeneration	97
4. Activity Maintenance	97
D. Carbon	98
1. General	98
2. Modeling of Deactivation	99
3. Regeneration	101
E. Other Poisons	102
F. Concluding Remarks	103
G. References	104
VII. MECHANISM AND SURFACE CHEMISTRY	107
A. Introduction	107
B. CO/H ₂ Synthesis	108
1. General Comments	108
2. Methanation	110
3. Liquid Hydrocarbons	113
4. Implications of Kinetic Studies	116

	<u>Page</u>
C. Water-Gas Shift Reaction	118
1. Summary of Kinetics	118
2. Technical Implications	120
D. Hydrodenitrogenation	122
1. General Remarks	122
2. Single Ring Heterocycles	123
3. Multi-Ring Heterocycles	126
4. Interaction of HDN and HDS Reactions	129
5. Implications for Further Research	130
E. Hydrodesulfurization	131
1. General Remarks	131
2. General Kinetic Effects	131
a. Effects of the Sulfur Compound	132
b. Effects of Hydrogen	133
c. Effects of Additives	133
d. Bond Activation	134
3. HDS of Single Ring Compounds	134
4. Multi-Ring Heterocycles	135
5. Implications for Further Research	138
F. Polynuclear Aromatic Cracking	139
1. General Comments	140
2. Naphthalene	141
3. Anthracene	141
4. Phenanthrene	143
5. Pyrene	145
6. Effects of Catalyst Composition	145
7. Perspective for Further Research	147
G. Carbon/Coal Gasification	148
1. General Description of Gasification Chemistry	148
2. Devolatilization	149
3. Gasification	151
a. Steam Gasification	152
b. Hydrogasification	154
4. Perspective for Further Research	156
H. References	158

PART 2. ADVANCES IN SUPPORTING DISCIPLINES

INTRODUCTION TO PART 2	165
I. REACTOR ENGINEERING AND CATALYST TESTING	166
A. Introduction	166
B. General Review of Test Reactors	168
1. Description of Reactor Types	168
a. Integral Reactors	171
b. Differential Reactors	174
c. Pulsed Microreactors	176
2. Applicability of Test Reactors	176
3. Tests for Kinetic Control	179
C. Analysis of Selected Reactor Systems	180
1. Batch Three Phase Reactors	181
2. Flow Three Phase Reactor	184

	<u>Page</u>
3. Counter-Current Liquid Phase Reactors	185
4. Supercritical-State Reactors	186
5. High Pressure Thermobalances	190
D. Concluding Remarks	191
E. References	193
II. INORGANIC CHEMISTRY	197
A. Introduction	197
B. Scope of Inorganic Chemistry	198
1. Oxides	198
a. Thermal Stability	204
b. Chemical Stability	204
c. Other General Properties of Catalytic Interest	205
d. Zeolites	207
2. Sulfides	210
a. Thermal Stability	211
b. Chemical Stability	212
c. Compositions of Interest	214
3. Carbides and Nitrides	215
a. Thermal Stability	215
b. Chemical Stability	215
c. Structures and Compositions of Interest	216
4. Borides, Silicides, and Phosphides	217
a. Thermal Stability	218
b. Chemical Stability	218
c. Structure and Stoichiometry	219
5. Organometallic Compounds	220
a. Polynuclear Organometallic Complexes	221
b. Anchoring of Homogeneous Catalysts	222
c. Potential Applications	223
6. Molten Salts	224
C. Implications for Coal Conversion	226
1. Thermal Stability	227
2. Chemical Stability	228
3. Structures and Compositions of Interest	231
D. Conclusions	233
E. References	235
III. MATERIALS SCIENCE	240
A. Introduction	240
B. Monolithic Supports	241
1. General Properties	241
2. Catalytic Applications	245
C. Intermetallic Compounds	246
1. General Properties	247
2. Supporting Data	250
3. Catalytic Applications	252
4. Future Directions	254
D. Miscellaneous Materials	256

	<u>Page</u>
E. Sintering	258
1. Theoretical Aspects	259
2. Experimental Data	262
3. Future Directions	265
F. References	267
IV. SURFACE SCIENCE	271
A. Introduction	271
B. Concepts Relevant to Catalysis on Metals and Alloys	271
1. Surface Overlayers	272
2. Structural Effects	273
3. Theoretical Aspects	276
C. Physical Techniques	279
1. Electron Spectroscopies	279
a. Description of Techniques	279
b. Applications to Catalysis	286
2. Ion Spectroscopies	290
a. Description of Techniques	290
b. Applications to Catalysis	292
D. Summary and Conclusions	294
E. References	297
PART 3. SPECIFIC COAL CONVERSION PROCESSES	
I. INTRODUCTION	301
II. PREFACE TO SECTIONS III AND IV - AN OVERVIEW OF PERTINENT PETROLEUM REFINING OPERATIONS	304
A. Fuel Products From Coal Liquids	304
1. Motor Gasoline	304
2. Jet Fuel	305
3. Gas Turbine Fuels	306
4. Diesel Fuels	306
5. Heating Oils	308
6. Residual Fuels	309
B. Petroleum Processing	310
III. UPGRADING OF HYDROCARBONIZATION LIQUIDS FROM THE COALCON PROCESS	313
A. Introduction	313
B. Process Description	314
C. Nature of the Product	316
1. Heavy Liquid Fraction	317
2. Light Liquid Fraction	330
D. Summary of Constraints and Process Requirements for Upgrading Coalcon Liquids	333
1. Upgrading of the Heavy Liquid Fraction: General Problems	333
2. Upgrading of the Heavy Liquid Fraction: Specific Applications	335
3. Light Liquid Fraction	337
E. Impacting Areas and Recent Research Developments	338

	<u>Page</u>
1. Short Term Developments	338
a. Activity and Selectivity	339
b. Activity Maintenance	342
2. Long Term Developments	344
a. New Synthesis Procedures	344
b. New Materials	345
c. Reaction Studies	345
3. Supporting Research	347
F. Conclusions	347
G. References	350
 IV. REFINING COAL LIQUIDS FROM THE COED, H-COAL AND SYNTHOIL PROCESSES TO HIGH-OCTANE GASOLINE, JET FUEL AND DIESEL FUEL	 352
A. Introduction	352
B. COED Liquids	353
1. Nature of COED Liquids	353
2. Refining Problems	363
a. High-Octane Gasoline	364
b. Jet Fuel	366
c. Diesel Fuel	368
C. H-Coal Liquids	370
1. Nature of H-Coal Liquids	370
2. Refining Problems	378
a. High-Octane Gasoline	378
b. Jet Fuel	380
c. Diesel Fuels	380
D. Synthoil Liquids	380
1. Nature of Synthoil Liquids	381
2. Refining Problems	388
a. High-Octane Gasoline	389
b. Jet Fuel	390
c. Diesel Fuels	391
E. Impacting Areas and Recent Research Developments	392
1. Selective Hydrocracking of Polynuclear Aromatics	392
2. Hydrotreating Processes	398
a. Hydrodesulfurization	399
b. Hydrodenitrogenation	401
3. Activity Maintenance	404
F. Conclusions	408
1. Selective Hydrocracking of Polynuclear Aromatics	409
a. Short Range Programs	409
b. Long Range Programs	409
2. Hydrotreating Processes	410
a. Short Range Programs	410
b. Long Range Programs	411
3. Activity Maintenance	411
a. Long Range Programs	411
G. References	412

	<u>Page</u>
V. CONVERSION OF SRC TO LOW SULFUR, LOW NITROGEN LIQUID BOILER FUELS	416
A. Introduction	416
B. Catalyst Constraints and Process Requirements for SRC Upgrading	418
1. Activity	418
2. Selectivity	419
3. Activity Maintenance	420
C. Important Research Developments	421
1. Short Term Developments	421
a. Activity and Selectivity	422
b. Activity Maintenance	426
2. Long Term Developments	427
a. New Synthesis Methods	427
b. New Materials	428
3. Supporting Research	430
D. Summary and Conclusions	432
E. References	435
VI. CATALYTIC HYDROCRACKING OF COAL OR LIGNITE TO LOW SULFUR, LOW NITROGEN LIQUID BOILER FUELS	437
A. Introduction	437
B. Summary of Major Constraints and Objectives	439
C. Impacting Areas and Recent Research Developments	440
1. Short Term Developments	441
a. Activity and Selectivity	441
b. Stability	445
2. Long Term Developments	446
a. Novel Preparative Procedures	446
b. New Catalytic Materials	447
c. Novel Concepts and Techniques	448
3. Supporting Research	449
a. Activity and Selectivity	450
b. Stability	451
D. Conclusions	451
E. References	453
VII. COMBINATION SHIFT CONVERSION AND CATALYTIC METHANATION OF SYNTHESIS GAS TO SNG	456
A. Introduction	456
B. Summary of Major Problem Areas and Catalyst Development Objectives	459
1. Sulfur Poisoning	459
2. Other Poisons	463
3. Catalyst Thermal Stability	463
4. Carbon Deposition	466
5. Summary	468
C. Impacting Areas and Recent Research Developments	468
1. Short Term Programs	469
a. Poison Resistant Catalysts	469
b. Thermally Stable Catalysts	471
c. Engineering Developments	472

	<u>Page</u>
2. Long Term Research and Development	474
a. Mechanism of Sulfur Tolerance	474
b. New Catalytic Materials	475
c. Regeneration of Synthesis Catalysts	476
d. Homogeneous Methanation Catalysts	477
3. Supporting Research	478
D. Conclusions	480
E. References	483
VIII. CATALYTIC GASIFICATION OF COAL OR LIGNITE TO SYNTHESIS GAS AND/OR SNG	486
A. Introduction	486
B. Major Constraints	487
1. Catalyst-Coal Contacting	489
2. Catalyst Deactivation	492
3. Catalyst Recovery	495
C. Important Research Developments	495
1. Short Term Programs	496
a. Testing	496
b. New Catalytic Materials	498
c. Preparative Procedures	501
d. Mechanism of Gasification Reactions	505
2. Long Term Research Areas	506
a. Intercalation	507
b. Volatile Catalysts	510
D. Conclusions	510
E. References	513
IX. ADVANCED SYNTHESIS OF SELECTED FEEDSTOCKS, DIESEL FUEL AND LPG FROM CO AND H ₂	516
A. Introduction	516
B. Summary of Major Problem Areas and Catalyst Development Objectives	520
1. Selectivity	521
2. Sulfur Poisoning	529
3. Carbon Deposition	532
4. Activity Maintenance	533
5. Synthesis of Diesel Fuel and LPG	534
C. Research and Development Areas Pertinent to Fischer- Tropsch Synthesis	536
1. Short-Term Programs	537
a. Examination of Common Catalytic Materials	537
b. Poison Resistant Catalysts	540
2. Long-Term Research and Development	543
a. New Catalytic Materials	543
b. Bifunctional Catalysts	551
c. Isosynthesis	553
d. Homogeneous Hydrocarbon Synthesis	555
3. Supporting Research	557
D. Conclusions	559
E. References	562

LIST OF TABLES

PART 1

<u>Table</u>		<u>Page</u>
I-1	Catalytic Reactions in Coal Conversion	2
II-1	Examples of Metal-Catalyzed Reactions	20
IV-1	Surface Area Measurement of Metal Catalysts	54
V-1	Concepts in Catalyst Preparation	65
VII-1	Heterocyclic Nitrogen Compounds	124

PART 2

I-1	Limiting Conditions of Reactor Operation	169
I-2	Condensed Summary of Catalyst Test Reactors and Their Primary Areas of Application	170
I-3	Critical Properties of Selected Compounds	189
II-1	Scope of Inorganic Chemistry Pertinent to Coal Conversion Catalysis	199
II-2	Representative Reactions Catalyzed by Oxides	203
II-3	Minimum Concentration of H ₂ S Required for Bulk Sulfidation	213
III-1	Comparison of Properties of HC-Catalysts with Particulate Types	243
IV-1	Techniques for Materials Analysis	280

PART 3

I-1	Advances of Importance to the Catalytic Conversion of Coal	302
II-1	Specifications for Gas Turbine Fuels	307
III-1	Product Summary	318
III-2	Postulated Hydrocarbon Type Compound Distribution in Reactor Product	319
III-3	Crude Gas Product From Reactor	320
III-4	Crude LPG Compounds From Reactor	320
III-5	Light Liquid Hydrocarbon Compounds From Reactor	321
III-6	Heavy Liquid Hydrocarbon Compounds From Reactor	321
III-7	Material Balance Hydrocarbonization Reactor Product	322
III-8	Material Balance - Pipeline	323

LIST OF TABLES

PART 3 (Cont.)

<u>Table</u>		<u>Page</u>
III-9	Material Balance - LPG	324
III-10	Material Balance - Heavy Oil Product	325
III-11	Material Balance - Light Oil Product	326
III-12	Properties of Common Petroleum Fractions	327
III-13	Summary of Pertinent Data for Heavy Liquid Hydrocarbon Compounds from Coalcon Process	328
III-14	Summary of Pertinent Data for Light Oil Product Hydrocarbon Compounds from Coalcon Process	331
III-15	Blending Research Octane Number for Pure Hydrocarbon Constituents in the Light Oil Fraction from the Coalcon Process	332
IV-1	Typical Properties of COED Pyrolysis Liquids	354
IV-2	Typical Hydrotreating Conditions for Illinois No. 6-Seam COED Pyrolysis Liquids	355
IV-3	Typical Data for COED Syncrudes Derived from Western and Eastern Coals	356
IV-4	Analysis of COED Syncrude Derived from Illinois No. 6-Seam Coal	358
IV-5	Analysis of the IBP-390 ^o F Fraction of COED Syncrude for Two Different Samples Derived from Illinois No. 6-Seam Coal	360
IV-6	Analysis of the 390-650 ^o F Fraction of COED Syncrude for Two Different Samples Derived from Illinois No. 6-Seam Coal	361
IV-7	Analysis of the 650 ^o F+ Fraction of COED Syncrude for Two Different Samples Derived from Illinois No. 6-Seam Coal	362
IV-8	Comparison of COED Jet Fuel Fraction with JP-5 Jet Fuel Specifications	367
IV-9	Comparison of a COED Diesel Fuel Fraction with ASTM Specifications	369
IV-10	Product Distribution for H-Coal Liquids Derived from Illinois No. 6-Seam Coal	371
IV-11	Product Yield for H-Coal Liquids Derived from Illinois No. 6-Seam Coal	372
IV-12	Product Inspection of C ₄ ⁺ Liquids from H-Coal Processing of Illinois No. 6-Seam Coal	373
IV-13	Composition of C ₄ -400 ^o F Fraction for H-Coal Liquids from Illinois No. 6-Seam Coal	375

LIST OF TABLES

PART 3 (Cont.)

<u>Table</u>		<u>Page</u>
IV-14	Composition of 400-650 ^o F Fraction for H-Coal Liquids from Illinois No. 6-Seam Coal	376
IV-15	Composition of 650-919 ^o F Fraction for H-Coal Liquids from Illinois No. 6-Seam Coal	377
IV-16	Comparison of Distillates of Similar Boiling Range Fractions for Three Syncrudes Produced by the Synthoil and COED Processes	383
IV-17	Physical-Property Data for Three Distillates from West Virginia Coal Liquid	385
V-1	Typical Analysis of Coal Samples	417
VI-1	Typical Compositions of Coal	438
VII-1	Composition of Exit Gas from Various Gasification Processes	457
VII-2	Expected Catalyst Lifetime in Sulfur Containing Streams	461
VII-3	Ni Surface Areas of Supported Ni Catalysts After Pilot Scale Methanation Test	465
VIII-1	Typical Composition of Mineral Matter in Bituminous Coals	494
VIII-2	Selected Intercalation Compounds of Graphite	509
IX-1	Sulfur Poisoning of Fe Catalysts	530
IX-2	Synthesis of Ethane, Ethylene and Dimethyl Ether on Pt/Al ₂ O ₃	538
IX-3	Synthesis of Hydrocarbons on Supported RhFe Catalysts	548

LIST OF FIGURES
