

FINAL REPORT

**NOVEL EXPERIMENTAL STUDIES
FOR COAL LIQUEFACTION**

**Principal Investigators
Gerald D. Holder
John W. Tierney**

**Chemical and Petroleum Engineering Department
University of Pittsburgh
Pittsburgh PA 15261**

**Prepared for the Department of Energy
Contract No. DE-FG22-84PC71257**

June 15, 1989

CONTENTS

	<u>PAGE</u>
1.0 Introduction.....	i
2.0 Summary.....	1
2.1 Objectives and Accomplishments.....	1
2.1.1 Task 1.....	1
2.1.2 Task 2.....	1
2.2 Personnel.....	2
2.3 Published Papers and Presentations.....	2
2.3.1 PhD Dissertations.....	2
2.3.2 Publications.....	3
2.3.3 Presentations and Papers in Preparation.....	4
3.0 Task 1. Use of Slurry Reactors for Indirect Liquefaction of Coal.....	5
3.1 Background.....	5
3.1.1 Methanol Synthesis.....	5
3.1.2 The Synthesis of Methanol via Methyl Formate.....	6
3.1.3 Carbonylation of Alcohols.....	7
3.1.4 Hydrogenolysis of Methyl Formate.....	8
3.1.5 Two-Step Synthesis in Two Reactors (Type I).....	9
3.1.6 Concurrent Synthesis (Type II).....	9
3.2 Experimental.....	10
3.2.1 Process Flow Diagram.....	10
3.2.2 Equipment.....	12
3.2.3 Carbonylation Experiments.....	12
3.2.4 Hydrogenolysis Reaction.....	13
3.2.5 Concurrent Reactions.....	14
3.3 Study of Individual Reactions.....	15
3.3.1 The Carbonylation Reaction.....	15
3.3.2 Hydrogenolysis Reaction.....	22

CONTENTS (CONTINUED)

	<u>PAGE</u>
3.4 Concurrent Synthesis.....	27
3.4.1 Operating Conditions.....	27
3.4.2 Effect of Temperature.....	29
3.4.3 Effect of H ₂ /CO Ratio.....	32
3.4.4 Effect of Total Pressure.....	35
3.4.5 Effect of CO ₂	35
3.4.6 Effect of Reduction Method on Concurrent Synthesis.....	38
3.5 Concluding Remarks--Methanol Synthesis.....	40
3.6 Modelling of Fischer-Tropsch Synthesis in a Slurry Reactor.....	41
3.7 Notation.....	42
3.8 References.....	43
4.0 Task 2. Coal Liquefaction under Supercritical Conditions.....	44
4.1 Liquefaction of Coal in Supercritical Fluids.....	44
4.2 Mass Transfer at Supercritical Conditions.....	45
4.2.1 Experimental Design.....	46
4.2.2 Results.....	51
4.2.3 Mass Transfer Correlations.....	54
4.2.4 Correlations.....	61
4.2.5 Mixing Effects.....	69
4.2.6 Conclusions.....	72
4.2.7 Notation.....	75
4.3 References (Task 2).....	77
4.4 Appendix to Task 2.....	81
Appendix: Modelling of Fischer-Tropsch Synthesis in a Slurry Reactor.....	87
