ATTENTION

AS NOTED IN THE NTIS ANNOUNCEMENT,
PORTIONS OF THIS REPORT ARE NOT LEGIBLE.
HOWEVER, IT IS THE BEST REPRODUCTION
AVAILABLE FROM THE COPY SENT TO NTIS.

Table of Contents

	Page
Summary	1
1 Problem definition	1
2 Structure of the laboratory installation	3
2.1 Laboratory systems with liquid phase reactors	4
2.2 Laboratory systems with fixed-bed reactors	8
3 Evaluation of the experiments	9
3.1 Composition of the make-up gas and of the residual gas	9
3.2 Calculation of the conversion and product palette	10
3.3 EDP tables with experimental results	19
4 Experimental results using different catalysts	33
4.1 Iron precipitation catalysts after H. KÜbel	33
4.2 Special Catalysts from Sasol	
4.2.1 The Sasol catalyst 1	35
4.2.2 The Sasol catalyst 2	36
4.2.3 The Sasol catalyst 3	36
4.3 Catalysts from Ruhrchemie	36
4.3.1 Ruhrchemie catalyst LP 5/76	36
4.3.2 The Ruhrchemie catalyst LP 5/77	37
4.3.3 The Ruhrchemie catalyst LP 14/77	37
4.3.4 The Ruhrchemie catalyst LP 8/78	38
4.4 Iron whisker catalysts	39
4.4.1 The iron whisker catalysts for the liquid phase reactor	40
4.4.2 The iron whisker catalysts for the fixed-bed reactor	40
4.5 Manganese-iron catalysts	41
4.5.1 Manganese-iron catalysts from Berlin Technical University	41
4.5.1.1 The Mn-Fe catalyst 1 (Berlin)	41
4.5.1.2 The Mn-Fe catalyst 2 (Berlin)	41
4.5.1.3 The Mn-Fe catalyst 3 (Berlin)	42
4.5.1.4 The Mn-Fe catalyst 4 (Berlin)	42
4.5.1.5 The Mn-Fe catalyst 5 (Berlin)	43
4.5.1.6 The Mn-Fe catalyst 6 (Berlin)	43
4.5.1.7 The Mn-Fe catalyst 7 (Berlin)	44
4.5.2 Manganese-iron catalysts of our own production	45
4.5.2.1 The Mn-Fe catalyst 1 (Bergkamen)	45
4.5.2.2 The Mn-Fe catalyst 2 (Bergkamen)	46
4.5.2.3 The Mn-Fe catalyst 3 (Bergkamen)	46
4.5.2.4 The Mn-Fe catalyst 4 (Bergkamen)	47
4.6 The influence of the reaction parameters on conversion, yield, and product palette	47
4.7 Comparison of the catalysts	49
5 The composition of the condensed phases	132
5.1 Hydrocarbon condensate	132
5.2 Water-soluble oxygen compounds	136
6 The EDP program FT 540	144
