Table of Contents

Executive Summary	v
1. Alternative-Fuels Policy	1
1.1 Policy Perspective	1
1.2 Role of Alternative Motor Fuels	1
1.3 Long-Term Plan for Commercialization of Alternative Motor Fuels	1
1.4 The National Energy Strategy	2
1.4.1 Incentive for Production of Alternative-Fuel Vehicles	2
1.4.2 Larger Federal Alternative-Fuel Fleet	3
1.4.3 Alternative-Fuel Fleets	3
1.4.4 Increased Research and Development on Alternative-Fuel Vehicles	3
1.4.5 Advanced Biofuels Technology	4
1.5 Effect of National Energy Strategy Initiatives on Oil Use	5
Reference	5
2. Progress Report on the Implementation of Programs Required by the Alternative Motor Fuels Act of 1988	7
2.1 Introduction	7
2.2 Requirements of the AMFA	7
2.3 Program Status	7
2.3.1 Alternative-Fuel Federal Light-Duty Vehicle Program—Section 400AA	7
2.3.2 Truck Commercial Application Program—Section 400BB	8
2.3.3 Alternative Fuels Bus Testing Program—Section 400CC	9
2.3.4 Alternative Fuels Data Center	10
2.3.5 Interagency Commission on Alternative Motor Fuels	10
2.3.6 U.S. Alternative Fuels Council	11
2.3.7 Studies and Reports	11
2.3.8 Program Plan	11
3. Potential Alternative-Fuel Use Scenario	15
Fuel Utilization	15
3.1 Input Assumptions	15
3.1.1 Target	15
3.1.2 Oxygenates	15
3.1.3 Alternative-Fuel Vehicles: Fuel-Volume and Vehicle-Production Constraints	17
3.1.4 Alternative-Fuel Vehicles: Vehicle Types and Markets	20
3.1.5 Alternative-Fuel Vehicles: Vehicle Operation	22
3.1.6 Alternative-Fuel Vehicles: Vehicle-Specific Fuels	22
3.2 The Scenario	22
3.2.1 Summary	22
3.2.2 Vehicle Totals	23
3.2.3 Fuel Totals	25
3.2.4 Concluding Note	26

CONTENTS

Evolution of the Vehicle and Fuel-Distribution Infrastructure	26
3.3 Scenario Description	26
3.4 Conclusions	30
References	30
4. Understanding the Potential Impact of Alternative-Fuel Use	33
4.1 Introduction	33
4.2 The AFTM as a Tool for Analyzing Market Behavior	33
Notes	35
References	35
5. Interactions Between AMFA Goals, the Clean Air Act Amendments of 1990, and California's Low-Emission Vehicles and Clean-Fuels Program	37
5.1 The 1990 CAAA Requirements	37
5.1.1 Reformulated Gasoline and Oxygenated Gasoline (Sec. 219)	37
5.1.2 Clean-Fuel Centrally Fueled Fleets (Sec. 229)	38
5.1.3 California Pilot Test Program (Sec. 229)	38
5.1.4 Low-Polluting Fuel Requirement for Urban Buses (Sec. 227)	39
5.1.5 Phase II Standards (Sec. 203)	39
5.2 California's Low-Emission Vehicles and Clean-Fuels Program	40
5.3 Technologies Available to Meet Stringent Vehicle Emission Standards	40
5.3.1 Light-Duty Vehicles	40
5.3.2 Other Vehicle Types	43
5.4 Alternative-Fuel Use and Oil-Displacement Potential	43
References	44
6. Research Needs for Alternative-Fuel Vehicles	47
6.1 Status of Alternative-Fuel Vehicle Technology	47
6.2 Considerations for Market Acceptance	52
6.3 Research, Development, and Demonstration Needs	55
6.4 Key Research Needs	61
6.4.1 Basic Engine and Combustion Phenomena	61
6.4.2 Gaseous-Fuel Storage	64
6.4.3 Gaseous-Fuel Injection	64
6.4.4 Gaseous-Propulsion Equipment	64
6.4.5 Fuel Additive(s) for Alcohols	64
6.4.6 Emissions and Environment	64
6.4.7 Global Warming Implications	65
6.4.8 Professional Education	65
References	65
Appendixes	
A. Reformulated Gasoline	A-1
B. Members of the Interagency Commission on Alternative Motor Fuels	B-1
C. Members of the U.S. Alternative Fuels Council	C-1
