HYDROGEN AND OTHER SYNTHETIC FUELS

**A Summary of the Work
of the Synthetic Fuels Panel**

September 1972

Reproduced by
**NATIONAL TECHNICAL
INFORMATION SERVICE**
U.S. Department of Commerce
Springfield, VA. 22151

Prepared for the Federal Council on Science and Technology R&D Goals Study
Under the Cognizance of the U.S. Atomic Energy Commission
Division of Reactor Development and Technology

CONTENTS

1.	INTRODUCTION.....	1
2.	SUMMARY AND CONCLUSIONS.....	5
2.1	Major Findings.....	6
2.2	Critical Related Issues.....	7
2.3	Conclusions.....	10
2.4	Summary of Recommended Research and Development.....	15
3.	PRODUCTION OF SYNTHETIC FUELS.....	18
3.1	Hydrogen.....	18
3.1.1	Water electrolysis.....	18
3.1.2	Thermochemical and radiolytic means for production of hydrogen as a fuel.....	29
3.1.3	Biological production of hydrogen and other synthetic fuels.....	37
3.1.4	Combination production systems.....	38
3.2	Other Synthetic Fuels.....	39
3.2.1	Ammonia.....	41
3.2.2	Methanol.....	42
3.2.3	Hydrazine.....	45
3.2.4	Methane and mixed hydrocarbons from wastes.....	48
3.2.5	Fuels via intensive agriculture.....	51
3.3	Use of Coal as an Interim Source of Synthetic Fuels.....	52
3.3.1	Hydrogen.....	52
3.3.2	Methanol.....	64
4.	STORAGE AND TRANSPORTATION OF SYNTHETIC FUELS.....	68
4.1	Storage of Fuels.....	68
4.2	Transportation of Fuels.....	73
4.3	Safety.....	76
4.4	Research and Development.....	77

5. USE OF SYNTHETIC FUELS.....	78
5.1 Hydrogen.....	78
5.1.1 Industrial uses of hydrogen.....	78
5.1.2 Urban uses of hydrogen.....	83
5.1.3 Use of hydrogen fuel for transportation systems.....	84
5.1.4 Use of hydrogen for electrical generation.....	90
5.2 Potential for Utilization of Synthetic Fuels Other Than Hydrogen.....	100
5.2.1 Utilization as a transportation fuel.....	101
5.2.2 Battery vehicles as a reference standard.....	103
5.2.3 Residential and industrial fuels.....	105
5.2.4 Fuels for electricity generation.....	105
6. SYSTEMS ANALYSIS.....	108
6.1 Unit Energy Cost Comparisons.....	110
6.2 Hydrogen for Peak Shaving.....	117
6.3 Resource, Economic, and Environmental Perturbations for Hydrogen System Implementation.....	119
REFERENCES.....	126
APPENDIX.....	131

LIST OF FIGURES

Fig. 1. U.S. petroleum demand and supply.

Fig. 2. U.S. gas demand and supply.

Fig. 3. Projection of rate of production of fluid fuels with and without coal conversion (Ref. 2).

Fig. 4. Performance of water electrolysis cells compared to theoretical relationships. (See Table 2 for identification of A to L.)

Fig. 5. Total cost of hydrogen production.

Fig. 6. Schematic flow sheet of combined water electrolysis, coal gasification, hydrogen production facility for ammonia synthesis.

Fig. 7. Composite flow sheet for the steam-oxygen and CO₂-acceptor processes for producing hydrogen from coal.

Fig. 8. Cost of hydrogen production from natural gas and from lignite.

Fig. 9. Fuel storage investment (1972 basis).

Fig. 10. Fuel cell efficiency compared to other prime movers.

Fig. 11. Vehicle requirements and motive power sources. (Assumes 2000-lb vehicle, 500-lb motive power source, and steady driving. Power and energy taken at output of conversion device.)

Fig. 12. Reference energy system, year 2000.

Fig. 13. Three general types of energy system alternatives.

Fig. 14. Emissions for Case 2000-III with 50% of the aircraft fuel being supplied by hydrogen.
