

Bay 2170

Target 30/4.03

F. G. Farbenindustrie A. G.

Ludwigshafen

BAG 2170 - TARGET 30/4.03
I.G.FARBEN - LUDWIGSHAFEN.

Bag 2170 continued from reel 030.

16. Details of preparation of various catalysts.

image 0010

17. Chlorine production by HCl oxydation - Oppau process. image 0057
18. Correspondence on polymerization at Rauxel. 0067
19. Experimental crotone-aldehyde plant. 0109
20. Identification of contaminating hydrocarbons in T.T.H. (Brabag-Zeitz) paraffin - Report. 0130
21. "Rikol". 0147
22. Correspondence on "Renal" process for producing hydrogen peroxide. 0148
23. Edible fat from paraffine - Report. 0172
24. Report on Hygas cracking processes of Koppers and I.G. 0186
25. Studies on ultraviolet absorption (coronen and derivatives), Raman spectre and other subjects at Ammoniaklaboratorium, Oppau. 0195

(a) Production and Engineering Data on
the Manufacture of Butanediol and
Butenediol.

1. Summary of the heats of reaction for compounds entering into the Butadiene Synthesis.
2. Monthly Report of Diol separation and Butanediol Distillation Plant - December 1944 and January 1945.
3. Influence of diffusion on the reaction rate in Butynediol Hydrogenation.
4. ~~Report on the removal of silicic acid from the raw Butynediol Solution.~~
5. ~~Measurement of the concentration of Butanediol Solutions.~~
6. Solubility of silicic acid in water, Butanediol and Butynediol.
7. ~~Average retention time of a carbon particle in the Butadiene Plant.~~
8. Heat of formation of Butynediol.
9. First, Second, Third and Ninth Reports on Butynediol Manufacture.
10. Monthly Report on Butanediol Manufacture.
11. Monthly utility requirements for Butynediol, Butanediol and Butadiene production.
12. Distillation equipment in Lu 392.
13. Visit of Dr. Steinhofer and Dr. Adam in Huls on May 20, 1943.
14. Monthly Reports for October 1942 on Butadiene, Butynediol, Aldol Hydrogenation, Aldol Manufacture, Butynediol Hydrogenation, Butol Distillation, Aldehyde Manufacture and Catalyst Manufacture.
15. Butadiene Distillation at Schkopau.

16. The reaction Butynediol and Propargyl Alcohol with Alkalies.
17. Byproducts of Butynediol Hydrogenation in the Reppe process.
18. Use of Socol B for esterifying Colophonium.
19. Testing of Socol DB as a Softening Agent for paper.
20. Conference on the use of Butanediol bottoms as core oil.
21. Excerpts from the record of the conference on Sucols of February 25, 1944.
22. Utilization of 1.4 - Butanediol bottoms.
23. Conference on Sucols February 25, 1944.
24. Further discussion on Sucols conference - February 25, 1944.
25. Results of experiments to determine the constitution of the lighter fractions of Butanediol bottoms
26. Letter giving properties and designations of the various Sucols.
27. Memorandum on Core Oils.
28. The constitution of Asfluidols and Karboresins.
29. Toxicity of Diols.
30. Purity of technical Butanediol - 1.4 for special purposes.
31. Tests of a glycerine substitute.
32. Glycerine substitute 5641.
33. By-product from the Butanediol - 1.4 distillation.
34. Cutting oil.
35. Plasticizer solution.

36. Plasticizer for Polyamide.
37. Method for obtaining 4-4 Dioxydibutyl Ether.
38. Polyurethane.
39. Production of polyurethanes from the residue of 1.4 Butanediol distillation.
40. Polyurethane from Butanediol residues, testing of products.
41. Utilization of 1.4 Butanediol bottoms.
42. Testing of 4.4 - Dioxydibutyl Ether as a glycerine substitute.
43. Ammonium chloride for alkaline (core oil).
 - (b) Plant design for Butanediol and Butanediol Manufacture.
44. Plant data on Butanediol, etc.
45. Butanediol Plant Storage and Pumping Diagram.
46. Flowsheet of Butanediol Hydrogenation.
- ~~47. Impurities in acetylene in Month of May, 1943.~~
48. Layout and construction details of Tetrahydrofuran Plant.
49. Flowsheet of Tetrahydro Furan Plant.
50. Chemical requirements for Buna Manufacture.
51. Cost estimate for the Butanediol Plant.
52. Time schedule for starting up Ludwigshafen Buna Plant.
53. Flowsheet for 1-3 Butol.
54. Instrument flowsheet for Tetrahydro Furan.

Images
0459-0554

55. Flowsheet for hydrogenation of Butanediol.
56. Building layout for Tetrahydro Furan Plant.
57. Production and chemical consumption for Butanediol Plant 1943.
58. Flowsheet for hydrogenation of Butanediol.
59. Flow sheet for hydrogen purification.
60. Hydrogenation flow sheet.
61. General plan of hydrogen works.
62. Instrument flow sheet.
- ~~63. Flow sheet of Butadiene reactor section.~~
64. Recovery of residues from Butanediol Manufacture.
65. Material balance on Butanediol hydrogenation.
66. Memorandum on Thermal Cracking of 1.3 Butanediol diacetate.
67. Butadiene from mixtures of 1.3 and 1.4 Butylene Glycol.
68. Experiments on splitting water from 2 methyl Butanediol 1.3.

(c) Flow sheets and drawings of
Butadiene Manufacture.

Images
0555-0613

69. Table of flow sheet symbols.
70. Tankage flow sheet for Butadiene manufacture.
71. Flow sheet of Butadiene distillation. (Inert gas recovery system).
72. Flow sheet of Butadiene Distillation. (Wash tower and degasification).

73. Flow diagram for aldehyde destruction, pressure washing, and Measuring Vessels.
74. Piping diagram (Operation No. 2).
75. Butadiene distillation (equipment layout)
76. Butadiene Plant building layout
77. Building layout - Continued.
78. Flow sheet for Butadiene distillation.
79. Electrical heating circuit of Butadiene reactors.
80. Apparatus and piping layout for Butadiene distillation refrigeration plant.

81. Arrangement of entire Butadiene distillation.
82. Flow sheet of Butadiene Reactor System.
83. Butadiene Reactor System, Pipe and Instrument Layout for high pressure steam system.
84. Flow sheet for Butyraldehyde destruction.

(d) Isobutylene Manufacture. Images 0614-0622

85. Operating description of the ET 100 Plant (Isooctane).
86. Operating description of Isobutyl oil distillation.
87. Isobutyl oil distillation flow sheet.
88. Separation of Methyl alcohol and Isobutyraldehyde.

(e) Oxo Process, etc.

89. Production of Aldehydes in the Oxo Synthesis.
90. Synthesis of Adipic Acid through the reaction of carbon monoxide on cyclic ethers, lactones, and diols.

91. Synthesis of acetic acid through the reaction of carbon monoxide and methanol.
92. Reaction of carbon monoxide with olefins and alcohols.

Item 92 ends reel 031. Bag 2078 continued on reel 32 part I.
