

Index of Documents

Bag 3440
C.I.O.S. Target No. 30/5.01
Ruhrchemie A.G.
Sterkrade-Holtien

3440 - 30/5.01

1. Reports on Motor and other Tests of Lub. Oils (with index)
2. Antiknock properties of synthetic benzine
3. Evolution of Catalyst for F-T process (a general paper)
4. Medium Pressure Synthesis (summary of a paper by Pichler, 1937)
5. Methods of working up primary products (a paper)
6. Synthesis with Iron Catalysts (a general paper)
7. Summary of behaviour of various Fe catalysts
8. Summary of sintered Fe catalyst patents (Aug. 1940)
9. Danger of fire in Gatsch storage tanks
10. Iron carbonyl - explosions in converters (a letter)
11. Importance of steady gas input (a letter)
12. Output of various licensee firms, 1938-42
13. Discussions with Licensee firms a) Essener Steinkohle on general synthesis topics.
14. -do.- -do.- b) Hoesch Benzin
15. -do.- -do.- c) Krupp, Wanne-Eickel
16. -do.- -do.- d) Rheinpreussen
17. -do.- -do.- e) Schaffgotsch-Benzin
18. -do.- -do.- f) Brabag, Schwarzheide
19. -do.- -do.- g) Viktor, Castrop-Rauxel
20. Ruhrchemie reports on visits to licensee plants
21. Various runs with Co. catalysts at medium pressure
22. Examination of the black wax
23. Normal pressure synthesis characteristic data
24. Medium pressure synthesis - examination of products
25. Lub. oil production from recirculation products (cf. 3454 - 30/5.01 - 33)
26. Iron catalyst synthesis - examination of products
27. Oven 11 Charge 11 (Fe)- results (cf. 3453 - 30/5.01 - 25)
28. Analyses and lub. oil results for Co. catalyst (cf. 3453 - 30/5.01 - 26)
29. Official Test of Six Iron Catalysts
30. Experimental Results for methyl alcohol and hydrocarbon Synthesis from water gas, using high pressures and copper catalysts
31. Experimental Results for Iron Catalyst Synthesis Nos. 629 to 750 6.12.43 - 3.6.44
