

## Index of Documents

Bag 3440  
C.I.O.S. Target No. 30/5.01  
Ruhrochemie A.G.  
Sterkrade-Holten

3440 - 30/5.01

30. Experimental Results for methyl alcohol and hydrocarbon Synthesis from water gas, using high pressures and copper catalysts
31. Experimental Results for Iron Catalyst Synthesis Nos. 629 to 750 6.12.43 - 3.6.44
32. Additions to Miscellaneous Ruhrchemie Patents
33. Specifications for the quality of Treibgas
34. Low Temperature Boiling Analyses
35. Action of Superheated Steam on Alkaside Solution
36. Catalyst Composition and Activity
37. Determination of Sulphur in Gases by various methods
38. Comparison of catalysts prepared from Luxmasse and Läutmasse for organic sulphur removal
39. Removal of Organic Sulphur by the Cold Luxmasse
40. The Method of working at the Rheinpreussen Works
41. Production shown graphically April 1940 - December 1944
42. Calculation of Yields of individual Fractions
43. Gas Rate for Medium Pressure Synthesis
44. The Position 6.12.41 in the Normal and Medium Pressure plants.
45. Calculation of Monthly Yields

46. Theoretical Yields from Gas Analysis
47. Works Conference 23.11.39
48. Fine Purification of Water Gas with "Minette"
49. Developments and Analytical Methods for the Oxo  
Synthesis
50. Patent Position of the Iron Catalyst Synthesis 4.1.41
51. The P- Gas Plant
52. Diesel Oil Analyses
53. Oils with high Olefins Contents
54. Use of Luxmase in Catalyst Preparation
55. Dehydrogenation
56. Reduction of Catalysts
57. Oil for the Liquid Phase Synthesis
58. Gasol Synthesis
59. Iron Catalyst Synthesis
60. Diesel Oils with exceedingly high cetane numbers
