

Index of Documents

Bag 3440
C.I.O.S. Target No. 30/5.01
Ruhrchemie A.G.
Sterkrade-Holtzen

3440 - 30/5.01

1. Reports on Motor and other Tests of Lub. Oils (with index)
2. Antiknock properties of synthetic benzine
3. Evolution of Catalyst for F-T process (a general paper)
4. Medium Pressure Synthesis (summary of a paper by Pichler, 1937)
5. Methods of working up primary products (a paper)
6. Synthesis with Iron Catalysts (a general paper)
7. Summary of behaviour of various Fe catalysts
8. Summary of sintered Fe catalyst patents (Aug. 1940)
9. Danger of fire in Gatsch storage tanks
10. Iron carbonyl - explosions in converters (a letter)
11. Importance of steady gas input (a letter)
12. Output of various licensee firms, 1938-42
13. Discussions with Licensee firms a) Essener Steinkohle on general synthesis topics
14. -do.- -do.- b) Hoesch Benzine
15. -do.- -do.- c) Krupp, Wanne-Eickel
16. -do.- -do.- d) Rheinpreussen
17. -do.- -do.- e) Schaffgotsch-Benzine
18. -do.- -do.- f) Brabag, Schwarzheide
19. -do.- -do.- g) Viktor, Castrop-Rauxel
20. Ruhrchemie reports on visits to licensee plants
21. Various runs with Co. catalysts at medium pressure
22. Examination of the black wax
23. Normal pressure synthesis characteristic data
24. Medium pressure synthesis - examination of products
25. Lub. oil production from recirculation products (cf. 3454 - 30/5.01 - 33)
26. Iron catalyst synthesis - examination of products
27. Oven 11 Charge 11 (Fe) results (cf. 3453 - 30/5.01 - 25)
28. Analyses and lub. oil results for Co. catalyst (cf. 3453 - 30/5.01 - 26)
29. Official Test of Six Iron Catalysts
- ~~30. Experimental Results for methyl alcohol and hydrocarbon Synthesis from water gas, using high pressures and copper catalysts~~
31. Experimental Results for Iron-Catalyst Synthesis Nos. 629 to 750. 6.12.43 - 3.6.44
32. Additions to Miscellaneous Ruhrchemie Patents
33. Specifications for the quality of Treibgas
34. Low Temperature Boiling Analyses
35. Action of Superheated Steam on Alkoxide Solution
36. Catalyst Composition and Activity
37. Determination of Sulphur in Gases by various methods
38. Comparison of catalysts prepared from Luxmasse and Lautmassen for organic sulphur removal
39. Removal of Organic Sulphur by the Cold Luxmasse
40. The Method of working at the Rheinpreussen Works
41. Production shown graphically April 1940 - December 1944
42. Calculation of Yields of individual Fractions
43. Gas Rate for Medium Pressure Synthesis
44. The Position 5.12.41 in the Normal and Medium Pressure plants.
45. Calculation of Monthly Yields

46. Theoretical Yields from Gas Analysis
47. Works Conference 23.11.39
48. Fine Purification of Water Gas with "Minette"
49. Developments and Analytical Methods for the Ox
Synthesis
50. Patent Position of the Iron-Catalyst Synthesis 4.1.41
51. The P- Gas Plant
52. Diesel Oil Analyses
53. Oils with high Olefins Contents
54. Use of Luxemburg in Catalyst-Preparation
55. Dehydrogenation
56. Reduction of Catalysts
57. Oil for the Liquid Phase Synthesis
58. Gasol Synthesis
59. Iron Catalyst Synthesis
60. Diesel Oils with exceedingly high cetane numbers
61. Determination of Cetane Numbers
62. Oxidation of Aldehydes
63. Soap Production
64. Patent Applications by Metallgesellschaft
65. A research programme 6.8.42
66. Monthly Reports 1942 - 4
67. Benzin in the Waste Gas from the Synthesis
68. Production of Propylene
69. Purification of Synthesis Gas
70. Content of C_4 hydrocarbons in Synthesis Products
71. Composition of Ruhrchemie's "Mixed Benzin"
72. Curves showing Physical Properties of Products
73. Iron Carbonyl in water gas
74. Data for Medium Pressure Oven
75. A general account of the synthesis
76. Instructions for working an analytical control
77. The Effect of Inerts in Synthesis Gas
78. Composition of the total product
79. Reduction Experiments
80. Program for work in Oven-House
81. Possible use of used caustic soda solution
82. Synthesis with Iron Catalysts
83. Yields calculated from Gas Analyses
84. Temperature distribution in Normal Pressure Synthesis
85. Ease of Emptying Ovens
86. Revivification in Normal Pressure Synthesis
87. Sieve Analysis of Catalysts
88. Paraffin production in medium pressure Synthesis
89. Gas Rate at Medium Pressure
90. Coupling Medium and Normal Pressure Synthesis in stages
91. Commercial Calculations for the production of town's gas
from water gas.
92. Chlorination, Dechlorination and Oxidation of Wax.
