

Index of Documents
Bag No. 3441
C.I.O.S. Target No. 30/5.01
Ruhrchemie A.G.
Sterkrade - Holtern

3441 - 30/5.01

1. Paraffin Wax - Commercial Correspondence etc. 1941-44
2. Peroxide formation and stabilisation of spirit
3. Deutsche Luft-fahrts forschung. Bericht 1697
Effect of peroxides in the engine and their determination
4. Medium - pressure wax
5. Wax cracking
6. Paraffin wax - commercial correspondence etc. 1935-42
7. Preparation of High M.Wt compounds from lower olefines
('Oxo'-Dicköl - a patent 1944)
8. Sulphonation of Fatty Acids - a patent
9. New processes for soap production (brief outlines)
10. Fatty acids in primary product
11. Fatty acids and soaps by oxidation of 'Oxo' products
12. Analyses of primary Diesel oils for 'Oxo' synthesis
13. Sulphonates of 'Oxo' alcohols' (a letter)
14. 'Oxo' process - development 1939-42
15. Wax acids and Emulsifiers. H. Velde
16. Oxo-Process. Research Results
17. Iron Catalyst Experiments
18. Iron Catalyst Synthesis, I.G. Jan-May
19. Iron Catalyst Synthesis, Lurgi 1944
20. Detailed Account of Large Scale Atmospheric Pressure Synthesis/
21. Revivification before synthesis Period described in 20 above.
22. Medium Pressure Synthesis, Hoesch Benzin, Data for
Synthesis 1944
23. Pressure Condensation Plant Diagrams, Hoesch Benzin
24. State of the Active Carbon Plant 1943-4
25. Iron Catalyst as First Stage, Cobalt as Second.
26. Fortnightly Plant Reports 1-9-37 - 1941
27. Yields in the Two Stage Synthesis
28. Production and Properties of Gasol
29. Influence of the Inerts and of Two Stage Working
on the Oven Volume Required
30. Synthesis Gas - Steam mixtures
31. The Carbon Balance
32. Solvent Extraction
33. Hydrogen Revivification at Medium Pressure
34. Effect of the Purity of the Synthesis Gas
35. Effect of Rate of Gas flow
36. High methane and Carbon dioxide formation
37. Effect of Resin - forming material in the synthesis gas.
38. Medium Pressure Synthesis with varying rate of gas flow
39. Analysis of Primary Product into individual hydrocarbons
40. Water Gas Recirculation. Diluted Catalyst, High temperature.
41. Life Test at Medium Pressure
42. Pressure Drop through the Plant
43. Paraffin Wax
44. Conclusions from Medium Pressure work Full Scale
45. Influence of Pressure on the Synthesis
46. Comparisons of the Benzin from Stages I and II
47. Investigation of the Primary Product from the Medium
Pressure Synthesis - Benzin range
48. Up running

49. Medium Pressure Synthesis with large heat conducting surfaces
50. Second Lurgi Experiment
51. Gas formation with Eirichkorn mixed Catalyst
52. Medium Pressure Ovens Constructional Details
53. Synthesis Gas Measurement on the Medium Pressure Plant
54. Results up to June 1939 on the Medium Pressure Synthesis
55. Calculation of Theoretical Yield from Gas Analysis
56. Enriching the gas for the second stage
57. Oven - Paraffin from the medium Pressure Synthesis
58. General Synthesis Problems
59. Hydrogen Sulphide in Residual Gases
60. Results at 7 atms. in the Drucklamellen - oven
61. The Residual Gas before the actual Charcoal Scrubber
62. Acids in the Primary Product
63. Residual Gas Composition and Yields of Products from H₂Sch-Benzin
64. Determination of Ethylene in the Gas from the Active Carbon Plant
65. Connecting Medium and Normal pressure stages
66. Low Temperature Distillation
67. Variation of liquid products during the course of a medium pressure experiment
68. Results in the small reduction apparatus
69. Removing Carbon Dioxide by refrigeration
70. Solvent Extraction
71. Analyses of Miscellaneous soap and fatty acid samples
72. Fatty Acids from Oxo aldehydes
73. Soaps from the fatty acids washed out of Primary Products
74. ~~Process for Producing Fatty acids from alkali washings~~
75. Sensitivity of Various Petrols to Lead
76. Use of Tar Oils in Gas Turbines for Aircraft
77. Propyl Aldehyde Program of work
78. Oxo Synthesis
79. Production of Alcohol
80. Iso - Synthesis
81. Iron Catalyst for Olefine Production
82. Fatty Acids from Waste Alkali liquours
83. Cooling and Condensation Plant
84. Large Scale Researches 1935
85. Effect of the Length of the Catalyst Bed
86. Revivification with hydrogen
87. Total Life of a Catalyst
88. Progress of the reaction down the Catalyst bed
89. Residual Gas Composition when the synthesis gas contains much carbon dioxide
90. Formation of Propylene
91. Avoiding Wax formation
92. Effect of adding Naphthalene to the Synthesis gas
93. Formation of Carbon Dioxide
94. The effect of adding Ammonia
95. The Mechanism of the Synthesis
96. Synthesis at low temperatures
97. Results in Ovens 23 and 59
98. Synthesis from Deuterium and Carbon Monoxide
99. Effect of putting an active carbon scrubber between the two stages
100. Olefines in Product from MgO / ThO₂ Catalyst
101. Theoretical Yields
102. Catalysts of varying composition
103. Water Soluble Synthesis Products
104. The Synthesis Position 1938-1939
105. Separation of Carbon on the Catalyst

106. Incorporation of Aromatics
107. Iron Catalyst Experiments
108. Comparison of Iron and Cobalt Catalyst Synthesis
109. Comparison of Recirculation and direct synthesis
110. Water Gas Conversion
111. Methanization
112. Increasing the amount of Paraffin Wax
113. Concentrated Cobalt Catalysts
114. Iron Contact Synthesis. Schwarzheide
115. Comments on a Metallgesellschaft Patent
116. Influence of the Reaction Products on the Synthesis
117. Calculation of the Amount of Residual Gas
118. Low Temperature Tar from Synthesis Gas Generation
119. Additions of Esters, Acids and Soaps to Lubricating Oils
120. Alkyl benzole
121. Transformer Oil
122. Diesel Oil Analysis
123. Nitration of Diesel and Lubricating Oils
124. Conference on the Synthesis, 3. X. 1941
125. Octane Number Measurements on Synthetic Petrols
126. Determination of Activity of Catalysts
127. Calculations from Residual Gas Analyses for Medium Pressure Synthesis
128. Alcohols from Medium Pressure Synthesis
129. List of Sections of Ruhrchemie
130. Monthly Summaries of Data for all the German Plants 1938 - 1940
131. Preparation of Mechanically Strong Cobalt Catalysts
132. Polymerization of Diesel Oil Fractions
