

DOCUMENTS OF AUTOMOTIVE RESEARCH & DEVELOPMENT

GROUP I

Several Ungsteins not included in the regular Ungstein Series.

Report No.

L. 4	11C15	High strength aircraft steels.	15. 5. 40.
L. 5	111B17	Instructions for the testing of component parts and equipment of power plant housings of airplanes.	13. 5. 40.
L. 7	11C21	Synthetic materials and their use in aircraft construction.	31. 1. 41.
L. 8	111A21	Piston rings.	Oct. 1939.
L. 9	111A22	The basic form and working principles of injection pumps and jets for diesel and Otto aero-engines.	16. 2. 40.
L.10	111A24	Aero-dynamic jet cooling of liquid-cooled aero-motor with radiators.	1. 4. 40.
L.11	111A26	The design of combustion chambers in aero-engines.	12. 4. 40.
L.12	111A27	Supplement to the construction of exhaust-monifold and exhaust pipes on aero-engines.	31. 10. 40.
L.14	111A29	Aero-carburetor.	
L.15	111A30	The principles of design and construction of in-line aero engines.	15. 5. 40.
L.17	111A32	Fuel supply pumps.	15. 5. 40.
U. 6		Research work on Pistons by Dr. Ing Erich Koch VDI Stuttgart.	1942.
U.22		German research installation for aviation. Description and installation of an automatic coolant temperature control shutter for aero-engines.	

DOCUMENTS ON AUTOMOTIVE RESEARCH IN SWITZERLAND.

SECTION 2

DOCUMENTS COLLECTED FROM F.K.F.S. UNIVERSITY OF KARLSRUHE, F.K.F.S.
KIRCHHEIM AND FROM I.M.T. STUTTGART.

CICS NO.	REF. NO.	TITLE	AUTHORS (C)	DATE
		<u>Common Aviation Research by the Research Institute for Automotive Transport and Vehicle Engines at the Technical College, Stuttgart.</u>		
SA1	1697	The Effect of Peroxides in the engine and their determination	Widmier	16.12.42
SA2	1742	The Effect of aldehydes in the Engine and their quantitative determination	Widmier	5. 2.43
SA3	1905	Evaluation of Fuels for their tendency to form Vapour Bubbles (Vapour lock)	Widmier	10. 2.44
SA4	1815	F.K.F.S. Method of estimating the Bromine Content of Aviation Fuels	Widmier	19. 6.43
SA5	5011	Load and Lubrication Ratios of Modern German and Foreign 12-Cylinder in-line Aero Engines	Rieckert, Hampf & Dorflinger	10. 1.44
SA6	5013	Principle tests on the Sliding Bearing Test Rig of an Aero Engine Main Big End Bearing (Interim Report)	Kamm et al Hellinger, et al.	10. 3.44 10. 3.44
SA7	5018	Testing of Lubricant Additives in a single-cylinder Engine	Rieckert Rossenbeck & Handschuh	24. 5.44
SA8	5019	Measuring the Temperature Distribution of a Main Big End Bearing on the Sliding Bearing Principle Test Rig	Hampf et al	19. 5.44
SA9	5025	Tests on the running-in behaviour of Piston Rings with protective coatings in Pearlite Cast (Iron) Cylinders	Rossenbeck	20. 6.44

ZMB-REPORTS

by F.K.F. Technical School, Stuttgart

SB1		Flying Mechanics of Jet Motors II Interim Report.	Weinig	15. 5.43
		Method of Working of a Jet Motor consisting of a Compressor and a Turbine		
SB2		Widening (the scope) of the F.J.F.S. Quick Method of estimating the TEL content of Fuels.	Widmier	15. 8.43
SB3		Test on the running behaviour of Electro Plated Silver Bearings in an Engine	Rossenbeck and Stork	16. 8.43

<u>CODE</u>	<u>REF.</u>	<u>TITLE</u>	<u>AUTHOR(S)</u>	<u>DATE</u>
SE6		Controlling an Aero Engine Blower by a Tap	Weinig	15.10.43
SE5		Axial Flow Compressor	Eckert and Weinig	3.4.44
SE6		The Economic Limit of High load of the 2-stroke engine without utilizing Exhaust Gas	Foxer and Schmitz	11.4.44
SE7		Power Increase of Combustion engines by Swept Volume Sub-Division	v.Dorner	4.9.44
<u>F.K.F. Technical School, Stuttgart</u>				
SC1	274	The 2-stroke - ball Valve Engine with Uni-Flow Scavenging, Power and Characteristics	Kuhn	6.9.38
SC2	382	Position of the Performance of the Rieseler-method.	Rieseler and	16.12.40
SC3	363	Tests on a 1.09 L - high load single Cylinder Engine (1st report)	Berndorfer and Gussmann	14.12.40
SC4	392	Investigation of the Performance of self ignition operation in a mixture Compression Engine	Ernst and Weinig	29.5.41
SC5	395	Calculation of a Seven-Stage Axial Compressor	Eckert and Weinig	3.4.41
SC6	405	Rapid Starting Tests on a Piston with various protective coatings on the Running Surfaces	Rossenbeck and Platz	12.11.41
SC7	412	Testing protective coatings on Piston running surface in the quick starting test	Rossenteck and Platz	3.3.42
SC8	423	Engine investigation on the thermal relation of Aero Engine Piston Crowns with various running surface protective coatings.	Rossenteck and Speer	18.5.42
SC9	424	Tests on a 1.09L - high load single-cylinder Engine (2nd report)	Berndorfer and Gussman	10.6.42
SC10	427	Clarification of the Rieseler working method in a single-cylinder test engine	Kamm	14.7.42
SC11	429	Quick starting tests with a BMW 132 Piston with various running face protective coatings.	Rossenbeck and Speer	28.8.42

CIOC No.	Rept. No.	<u>TITLE</u>	AUTHOR(S)	DATE
SCL2	444	Pressure and Temperature measurement in the lubrication system and in the Main Bearings of a DB 603 engine.	Hausp	22. 6. 43

SC13		Improvement of the Lubricating behaviour of Oil by Chemical additives.	Clocke	20. 1. 45
------	--	--	--------	-----------

F.K.F. Technical School, Stuttgart

SD1		Operating Instructions for the Fuel Test Engine	Gross	
SD2		Apparatus for measuring Ignition Delay	Staiger	30. 3. 43
SD3		Institute Progress Report	(various)	20. 6. 40
SD4		10th Annual Report		1939/40
SD5		11th Annual Report		1940/41

Diploma Theses.

SE1		The starting behaviour of Fuels with the use of various Chemical Ignition Accelerators is to be investigated and evaluated on the FKFS Test Engine	Demmer	
SE2		The influence of the operating conditions on the knock intensity of Fuels is to be investigated by use of various measuring apparatus.	Kessler	1943?
SE3		The ignition behaviour of Hydrocarbon Air mixtures in the Diesel Engine and the influence of Ethyl Nitrate	Schutze	
SE4		Investigation on the influence of the Chemical pre-reaction on the starting behaviour in Diesel Operation	Gerschler	20. 10. 43
SE5		Investigation of the Precipitated Deposits in the Lubricating oil formed by running-in an Engine		

Engineering Laboratory for Heat Engines and Compressors.

SE6		Investigation of Cylindrical Sliding Bearings for High Rotational Speeds	Weverka, Dollhopf and Stephan	15. 8. 39
-----	--	--	--	-----------

C106 NO	REFD. NO	TITLE	AUTHOR(S)	DATE
SE7		<u>Public Material Testing Installation.</u> Wear behaviour of Cromac running surfaces (on Al base) by running against Aluminium alloy with Oil Lubrication containing added wear material.	Brockstedt and Sietel	10. 6. 41
SE8		The influence of the grain size of the Quartz Dust as wearing material in engine oil on the wear behaviour of different pairs of bearing material.	Wellinger and Brockstedt	7. 6. 44
SE9		The influence of the surface pressure and the sliding velocity, as well as the hardness of bearing material, on the wear behaviour with Quartz Dust as wearing material in Engine Oil.	Wellinger and Brockstedt	20. 2. 45

German Automotive Research.

By the Laboratory for Lubrication Research
of the Technical College, Dresden.

SF1	71	Interim report on comparative test on Bearing Shell materials.	Doring	May 1939
SF2	76	Interim report on the running test of a Truck Engine with Synthetic Resin Bonded Crankshaft	Doring	
SF3	83	Interim Report on new Methods of Evaluating the lubricating ability of Oils and Fats	Pietsch	Apl 1940
SF4	104/1941	Interim report. Methods of determining the Technical Lubricating ability of Lubricants.	Heidebrook	Oct. 1941
SF5		Hydrogen as Motor Fuel.	Oehmichen	1942.

By the Institute for Brown Coal - and Mineral Oil Research of the Technical College,
BERLIN

SF6	109	Interim report on the production of lubricating Oils from Brown Coal Tar.	Marder and Feichtinger	1942
SF7	120	-ditto-	Heinze	1944
SF8	92	-ditto-	Marder and Hertz	1941
SF9	93	Usability of Ignition Accelerators for Diesel Fuels.	Heinze Marder Veidt.	1941

SF10 85 Interim Report on Investigations on
Dust Filters for Combustion Engines Schmidt June '40

SF11 78 Public Material Testing Station
Interim Report. Testing the effect Schikorr
of Fuel additives and their Combustion Alex
products on the Metals used in Engine
construction.

Department for Industrial Construction,
BERLIN.

Four Year's Plan Institute for Road
Transport at the Technical College,
Berlin.

SF12 Interim Report on the Testing of a
Fibrous material Oil Cleaner. Schwarz Mar '44

German Automotive Research
By F.K.F. of the Technical College,
Stuttgart.

SG1 74 Interim Report. Test on the Engine Auber
behaviour of Synthetic Otto Fuels. and
Lichtmaier 12.6.39.

SG2 99 Interim Report. Tests on a Carburettor
Engine with Self Ignition.

By Working Group for questions of
Engine Combustion for the Trade
Ministry.

SG3 91 Interim Report. Mixture formation and
Burning. The position of the research
on the sphere of Diesel Engine type Various 1.10.40
working methods.

SG4 111 Interim Report. 2nd Meeting of the
working group for questions of engine Various 1942
combustion.

SG5 118 Interim Report. 3rd Meeting of the
working group for questions of engine Various 1943
combustion.

SG6 Research Plan 1939/40.

D.V.L. BERLIN

S HI Instructions for use of the D.V.L. Broicher
Exhaust Gas tester for combustion engines Aug. '42

SH2 Investigation of the running properties
of Radial Loaded Segment Bearings with
lead bronze and light metal surfaces. Siedenturg 4.11.42.
