

REPORT NO.

INDEX - MICROFILM - REEL 104
(Orig. Ident. AD1(K) 48A - C 65)

R. 5	Physical data of iron carbonyls and nickel carbonyls	
R. 6	The "Egersdorf" heavy oil installation	
M. 1. Tl 147-503	Specification for delivery of aviation fuel "E4" in connection with the use of domestic aviation petrol	June 1939
M. 6	Testing of lubricating oil additive 13 (I.G.-891) to 14 DB 605 W and X and connection with 10 as engine in work Genshagen	17.12.43
M. 7	Assorted reports, various dates 1943, on lead removal of aviation fuel B 4. (Using hydrochloric acid, Aluminum chloride, activated charcoal	
M. 10	Test report No. 4, August 20th 1943. Lubrication test on Almen-Hieland machine	20.8.43
M. 15	17 April 1943. Report on investigations of corrosion by leaded aviation fuels B 4 on valve steel. Part II	17.4.43
M. 17	Specification of Military lubricant - Pents Lubricating Oil	4.2.43
M. 19	Report No. 99 by Intava on lubricant Z 2 1016; (synthetic) aviation engine lubricant (in BMW 1 cylinder). 28 March 1941. (Chemical and physical data on test runs)	28.3.41
M. 20	Test report. May 21st 1940. Secret. Dilution of lubricants with fuels in DB601M engine	21.3.40

REPORT NO.

M. 26	Testing report. August 20th, 1940. Dilution of lubricant with fuel in DE601N engine	20.8.40
Q. 2	Graph-Vapour tension of "Aminen" Aliphatic Hydrocarbons	27.9.44
Q. 4	Investigations of captured English and American fuels	20.3.44
Q. 5	Technical orders of the general of the technical command. Fuels for aero engines	9.6.44
Q. 10	The "Siebel and Kehl" wear test machine (Improved model). (Drawings 2 sheets photographic reproduction)	3.4.44
Q. 11	German research installation for aviation, E. V. institute for fuel research. Contribution on non-fluid lubrication	1.9.44
Q. 13	Evaluation of lubricating oil additive J. G. 1586/80 BS on DB 605 engines in the Genshagen	11.7.44
Q. 18 9	Evaluation of the lubricating oil additive D 2. (Diphenyl Phosphate) and J 3 (J.G.891 in the DB 605 engine	19.1.44
Q. 19 11a	Testing lubricants	6.4.44
Q. 20	Quality limitations of Diesel fuels for supply to the Navy	10.6.43
Q. 22	Technical supply orders for run-out fuel	12.8.43
Q. 24	Evaluation of lubricants (2 copies)	18.2.43
Q. 26	German research installation for aviation, E. V. institute for fuel research	
	Sulphur content and lubricating ability of Aero-Engine oils	28.7.43
Q. 32	Lubricant evaluation in the B M W single Cylinder engine. Oil L. 15082. Aero engine oil "Red Band" - Special additive. Report No. 193	9.5.41
Q. 33	Reports and correspondence. 1939 -41. Daimler-Benz A.G.	1939-41
Q. 37A	Miscellaneous	
Q. 36A	Review of the evaluation results of the standard lubricant SS 1170 P	22.11.39
Q. 30	Semi-annual correlation of knock engines. (VV92)	April 1941
Q. 9	Lubrication of internal combustion engines	10.7.44
Q. 8	Quality limitations of VT 341	3.4.44
N. 1	Most suitable methods for the testing of solid fuels for automotive generators	Sept.1944

REPORT NO.

- N. 9 Leuna Mixture-Aral-Esso-Dynammin-Deropan-Olexin-Amiagin-
Bevaulin-Various mixtures
- N. 12 Hydrogenation Dr. Nedelauss
- N. 13 Miscellaneous correspondence and reports 1941 - 42. Special
test by coal and oil laboratory
