

T.O.M. REEL 260
(ORIGINAL DESIGNATION API-OTS Reel 1)

This is the first of thirteen 16 mm microfilm reels prepared under the direction of the American Petroleum Institute - Technical Oil Mission Study Group with the assistance of the Office of Technical Services of the Department of Commerce, Washington, D. C. This reel contains the English abstract cards pertinent to FIAT microfilm reels prepared in Germany by field experts in that country under the direction of the Office of Technical Services on various Technical Missions. The FIAT reels included were selected by the members of the API-TOM Study Group and the abstract cards for these reels were supplied through the courtesy of Messrs. J. C. Green, Director of the Office of Technical Services, Mr. O. Willard Holloway, his Assistant, and Mr. Arthur Schroder, formerly Chief, Chemicals Section at the Office of Technical Services, now resigned. Assistance in obtaining the English abstracts of FIAT reels was also rendered by the Library of Congress.

In line with our policy affecting Technical Oil Mission matters, the U.S. Bureau of Mines assigned numbers to these reels and incorporated them in the series of TOM reels which have been prepared jointly by our Committee and the Bureau. These thirteen reels have been assigned TOM reel numbers 260 to 272, inclusive.

An index is supplied at the beginning and end of each reel of this series showing the FIAT reel designations in the order in which they appear on the reel. The listing shows also the PB numbers corresponding to the FIAT reel numbers and the number of English abstract cards for each FIAT reel.
