SUBJECT INDEX AND REPORT

T.O.M. REEL NO. 64

Prepared by
GULF RESEARCH & DEVELOPMENT COMPANY

GULF RESEARCH & DEVELOPMENT COMPANY

Pittsburgh, Pa.

ABSTRACT AND INDEX OF TECHNICAL OIL MISSION

MICROFILM

REEL NO. 64

INDEX OF REEL # 64

Frame No.

COAL MINING MACHINERY

Bits, Widia (cutters)	1066
Conveyor, Oscillating	1429
Couplings, Flexible	1157
Cutter and shearer	707
Cutter, chain	1069
Cutter "SIL 20"	696
Developments, War time	1431
"GI Mixture" (WC and Co.)	1074
Lamp, pneumatic driven	1186
Loader, LKF	712
Locomotive, Diesel	1277
Packer and Scraper-loader	1265
Planer, "Hannibal"	1337
Planer, Mine Friedrich Heinrich Co.	1405
Planer, "Preussen"	1379
Rope, Wire	1194
Shearer "K15"	703
Supports, Roof	1160
Vehicle, Caterpillar (Design Drawings)	663
Ventilator, Pneumatic "Eltur VLH"	717

GEOPHYSICAL RESEARCH

Vibrations	1114
------------	------

MINING METHODS

Mine Bruchstrasse, thin, steep pitch	1333
Mine Fritz, five-foot seam, pitch 250-500	1320
Mine Westhausen, five-foot seam, pitch 60	1323

SCHOOLS, MINING

<u>Activities and location</u>	1098
--------------------------------	------

SCANNING OF REEL #64

U. S. GOVERNMENT TECHNICAL OIL MISSION

NOTE: The section numbers used below are those listed in the T.A.C. Index.

BAG 1481 (15) 30/opportunity *Ruhr Coal Mining

SECTION I. GEBRUEDER EICKHOFF, BOCHUM MINING MACHINERY

	<u>Frame No.</u>
<u>ITEM 14. Design drawings DV520 of caterpillar vehicle according to advertising leaflet D-15 (240 pieces).</u>	663-696

BAG 1481-2

696

SECTION II. HEINRICH KORFMANN JR., WITTEN-RUHR MINING MACHINERY

<u>Advertising leaflet (in German) illustrating and describing small coal cutting machine "SIL20" can be used for cutting coal and shearing. The machine is driven either by a pneumatic motor of 20 PS or by an explosion-proof motor 9.5 KW.</u>	698-702
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------

<u>Advertising leaflet illustrating and describing the "K 15" Shearing Machine. This leaflet is in German and in English.</u>	703-706
-------------------------------------------------------------------------------------------------------------------------------	---------

<u>SK 20 Coal Cutting and Shearing Machine. This is the English counterpart to No. 1.</u>	707-710
-------------------------------------------------------------------------------------------	---------

<u>Mine car loader LKF (in German and in English)</u>	712-716
-------------------------------------------------------	---------

<u>Pneumatic Ventilator "Eltur VLH" (in German)</u>	717-718
-----------------------------------------------------	---------

<u>Leaflet enumerating the machines built by Heinrich Korfman, Jr. (in German). Mainly coal cutting and shearing machines, ventilators and carloaders.</u>	719
------------------------------------------------------------------------------------------------------------------------------------------------------------	-----

<u>Leaflet illustrating and describing the Ventilator "ES" with firedamp-proof motor (in German).</u>	720-722
-------------------------------------------------------------------------------------------------------	---------

<u>Letters to Mr. Graf confirming an interview and enumerating enclosures, consisting of advertising leaflets and drawings.</u>	723
---------------------------------------------------------------------------------------------------------------------------------	-----

Drawings

<u>1. Guiding apparatus for working hammer on caterpillar</u>	724
<u>2. Guiding apparatus for working hammer</u>	725
<u>3. High duty drilling machine type UB</u>	726

<u>Summary concerning parts for the coal cutting and shearing machine "SK 20"</u>	727
-----------------------------------------------------------------------------------	-----

<u>Large drawing of cutting and shearing machine "SK 20"</u>	728
--------------------------------------------------------------	-----

<u>Detail list S440 for pneumatic motor for coal cutting machine.</u>	728-731
-----------------------------------------------------------------------	---------

<u>Drawings for the above.</u>	732-1064
--------------------------------	----------

SECTION III. WIDIA-KRUPP TOOL WORKS ESSEN

	1065
<u>Widia bits for coal cutters and coal drills</u>	1066-1068
Booklet (in German) illustrating and describing the bits. Main advantages claimed: Drilling performance without regrinding up to about 150 meters. Total drilling performance 1000-1500 meters. Reforging and retempering not necessary.	
<u>Krupp-Widia chain coal cutting chisel</u>	1069-1073
Main advantages claimed: Performance without regrinding 300-2000 meters of coal, depending on hardness of coal (20-30 times more than ordinary tools). Due to the high strength and toughness, the shaft (handle) will not break. The chisels should be reground in time. Reforging and retempering are not necessary.	
<u>Instructions for regrinding and production of "GI" mixture.</u> (Tungsten carbide and cobalt.)	1074
<u>Drawings:</u>	
1. Widia chisel	1075
2. Widia double plate chisel	1076
3. Widia chisel	1077
<u>Table showing preparation of tools</u>	1078
<u>Drawings of coal cutting bits Widia d 40-43</u>	1079
<u>Booklet of Hard Metal Bureau, Essen, describing the different qualities and uses of tungsten carbide hard metal.</u>	1080-1092
<u>Drawing of Widia coal cutting bits.</u>	1093-1094
<u>Table showing preparation of tools for mining.</u>	1095
<u>Drawing of Widia chain pick</u>	1096

SECTION IV. WESTFAELISCHE GEWERKSCHAFTSKASSE BOCHUM

<u>ITEM 1. Information in English concerning the functions and activities of the Academy.</u>	1098-1112
<u>ITEM 2. The German Mining Schools. Illustrated sheet showing the location of the schools.</u>	1113

<u>ITEM 3.</u>	<u>Publications relating to Geophysical Research</u>	1114-1116
	1. Vibrations of buildings due to machine factories.	1117-1128
	2. Problems of vibrations in mining operations.	1129-1133
	3. Publication of the office investigating earth- quakes (Westfaelische Bergbaukasse). 1934-1935.	1134-1146
	4. Same for the years 1935-1936.	1147-1156
<u>ITEM 4.</u>	<u>Hermann Wingerath, Ratingen. Leaflet with drawings of flexible couplings and high pressure pipes, with test for 80 atm.</u>	1157-1159
<u>ITEM 5.</u>	<u>Steel roof supports in mining. Advertising leaflets describing and illustrating design and application (Heinrich Schmidt, Gevelsberg-Vogelsang and Hermann Schwarz, Wattenscheid.)</u>	1160-1162
	<u>Hermann Schwarz, Wattenscheid, mine steel rams</u>	1163-1175
<u>ITEM 6.</u>	<u>Krupp steel mine supports. Illustrated booklet.</u>	1176-1185
<u>ITEM 7 &</u> <u>ITEM 8.</u>	<u>Friemann & Wölf, Zwickau. Magnet-electric lamp for mining driven by air pressure. Descriptive illustrated booklet. Photostat of an anemometer.</u>	1186-1193
<u>ITEM 9.</u>	<u>Testing Wire Ropes. Six publications from the office for testing wire ropes of Westfaelische Berggewerkschaftskasse. 106 pages. 1931/32, 1938, 1937/38, 1933/34, 1934/35, 1935/36. Testing strength and fatigue of wire rope, etc.</u>	1194-1260

SECTIONS V & VI. PNEUMATIC PACKING MACHINE

Karl Brieden & Company, Bochum

<u>Illustrated leaflet in French and assembly drawing.</u>	1261-1264
<u>Pneumatic Packing Machine and Scraper Loader with Planer at Mine Minister Aschenbach Gebrueder Stumm in Dortmund Brambauer. Perspective drawing of working face. Sketches of timbering and mine layout.</u>	1265-1268
<u>Article relating to the scraper-planer in: Archiv fur Bergbauliche Forschung, November, 1942, 7 pages.</u>	1269-1276

SECTION VII. MINE-DIESEL LOCOMOTIVES, DORTMUND

DR. KONRAD DARIUS, DESIGNER

1277

<u>Leaflet illustrating and describing the 10-ton mine Diesel locomotive, which is authorized to operate in fire-damp mines.</u>	1278-1280
----------------------------------------------------------------------------------------------------------------------------------	-----------

Longhand penciled sheet by Dr. Darius of July 7, 1945, giving formulae for calculating combustion products (CO) and giving references: Der Bergbau, No. 14 of July 4, and No. 15 of July 18, 1940. Glueckauf, 1939, p. 337. 1283-1284

Two illustrated articles: Bergbau, No. 14 and No. 15 of 1940, describing the locomotive. 1285-1308

Regulations of the chief mine inspector stating the conditions which must be observed in design and operation of the mine diesel locomotive. 1309-1319

SECTION VIII. MINE FRITZ HOESCH COMPANY, ESSEN 1320

Cross section (print) of area described in report. 1321

Pencil sketch, details of working face. 1322

SECTION IX. MINE WESTHAUSEN GELSEN KIRCHEN CO., DORTMUND 1323
MINING METHOD OF FIVE FOOT SEAM, 60° PITCH

Data relating to coal planer, typed 1324-1328

Print of mine workings and details for layout for mining with coal planer. 1329

Prints relating to face timbering. 1330-1332

SECTION X. MINE BRUCHSTRASSE GELSEN KIRCHEN CO. BOCHUM 1333
MINING METHOD FOR A THIN, STEEPLY PITCHING SEAM

Prints of plan of level and cross section of mine in area described. 1333-1335

Pencil sketch, details of mine working. 1336

SECTION XI. MINE HANOVER HANNIBAL KRUPP, ESSEN 1337
OPERATION OF THE COAL PLANER HANNIBAL

Photographs of coal planer Hannibal. 1338-1358

Illustrated article by Fritz Lange, Bochum, referring to use and operating details of coal planer. 1359-1378

SECTION XII. MINE IBHENBUEREN, PREUSSISCHE BERGWERKE & HUETTEN CO., OSMABRUECK
OPERATION OF THE COAL PLANER 1379

<u>Report</u> concerning experiences with the " <u>Preussen</u> " <u>coal planer</u> .	1380-1396
a. Fundamentals about the coal planer.	
b. Description of the coal planer.	
c. Performance.	
d. Experiences with the machine.	
e. Summary	
<u>Drawing</u> " <u>Preussen</u> " planer assembly of rolls in the front	1397-1398
<u>Assembly</u> of rolls in the loading part.	1399
<u>Reversing</u> for planer.	1400
<u>Corner</u> roll support on planer.	1401
<u>Assembly</u> of planer.	
<u>Prints</u> relating to mine layout.	1402
<u>Drawing</u> and instructions for " <u>Beien</u> " blowing.	1403
<u>Gobbing</u> machine.	1404

SECTION XIII. MINE FRIEDRICH HEINRICH CO., LINTFORT 1405

<u>Descriptive</u> typewritten sheets for planing operations in this mine.	1406-1409
<u>Prints</u> relating to design of planer.	1410-1414
<u>Guide</u> for rope at planer with one pulley.	1415-1424
<u>Coal</u> planer.	1425
<u>Blowing</u> gobbing " <u>Brieden</u> " with coal planing operation.	1426
<u>Knife</u> for planer.	1427
<u>Schematic</u> assembly of planing arrangements	1428

SECTION XIV. BERGBAU VEREIN, ESSEN	1429
<u>OSCILLATING CONVEYOR FOR MINE SERVICE</u>	
<u>Print of oscillating conveyor</u>	1430
<u>Typewritten review of coal mining development in wartime</u>	1431-1455
Mechanization in the mining industry	
Review of individual machines and processes	
Several chapters reviewing planing operations	
SECTION XV. MISCELLANEOUS DATA OF RUHR COAL MINING	1456
<u>INDUSTRY</u>	
<u>Drawings</u>	1457-1460
<u>Photograph - Touizant - Heintzman timbering</u>	1461
<u>Minecar, 4 tons, Stahlwerke Brueminghaus</u>	1462
<u>Booklet relating to the Ruhr coal mining industry by</u>	1462B-1472
<u>Dr. C. H. Fritsche, editor, Glueckauf, Essen, 1940.</u>
