Review of Microfilm Reel #83
U. S. Government Technical Oil Mission

Compiled by P. D. Branton
and P. D. Caesar
(Socony-Vacuum Oil Co.)
2-14-47

Introduction

This reel is made up entirely of refinery reports of the Rhenania-Ossag Companies covering the years 1939-1943. No attempt has been made to abstract all of these items, since the yearly reports of each company duplicate the corresponding reports of the previous year in style and nature of contents.

The contents of some of these items have been abstracted in a report by P. de H. Hall classified as C.I.O.S. File #XXXII-94, item 30. A copy can be found in T. O. M. Reel #197.

No subject index was made for this film in view of the restricted nature of its contents.

REEL # 83 (7-E)

Bag # 3996 - Target # 30/3.01

Description of Individual Items (#235-250)

Yearly reports from the principal plants and refineries of the Rhenania-Ossag Company for the years 1939 to 1943 are given. They contain data on production, sales, exports, power, raw materials and chemicals, labor and production costs. The contents of some of these items (from Reel #82 to #84) have been abstracted and described in the following report:

T.O.M. Reel 197 - Report #30 - C.I.O.S.
File #XXXII-94 by P. de H. Hall (Harburg
and Grasbrook Refineries).

#235 - Annual Report of Grasbrook Works
for 1939 (completed from Reel 82)
89 pages... ...frames... 5803 - 5888

#236 - Annual Report of Grasbrook Works
for 1940
89 pages... ...frames... 5889 - 5984

#237 - Annual Report of Grasbrook Works
for 1941
73 pages... ...frames... 5986 - 6059

These reports are made up of tables and graphs showing detailed information on the following points:

1. Summary of yearly production - 157,000 tons
(total for 1941).
2. Product composition -
 - a. Blended oils... 59.4%
 - b. Refined oils... 32.1%
 - c. Cutting oils... 3.8%
 - d. Fats processing... 2.8%
3. Personnel
4. Chemical Division
 - a. Refining
 - b. Distribution of products: greases, fatty acids, cylinder oil, motor oil, voltol, etc.
5. Transportation

6. Cost Analysis

- #238 - Annual Report of Mannheim Works
for 1939
80 pages... ..frames... 6061 - 6160
- #239 - Annual Report of Mannheim Works
for 1940
72 pages... ..frames... 6161 - 6253
- #240 - Annual Report of Mannheim Works
for 1941
50 pages... ..frames... 6254 - 6305
- #241 - Annual Report of Mannheim Works
for 1942
42 pages... ..frames... 6306 - 6348
- #242 - Annual Report of Mannheim Works
for 1943
20 pages... ..frames... 6349 - 6369

These five reports consist chiefly of tables concerning operation costs, personnel, yields, etc., in the refining of Rumanian and other crude oils.

- #243 - Annual Report of Floridsdorf Works
for 1939
20 pages... ..frames... 6370 - 6391
- #244 - Annual Report of Floridsdorf Works
for 1940
14 pages... ..frames... 6392 - 6412
- #245 - Annual Report of Floridsdorf Works
for 1941
14 pages... ..frames... 6413 - 6427
- #246 - Annual Report of Floridsdorf Works
for 1942
15 pages... ..frames... 6428 - 6442
- #247 - Annual Report of Floridsdorf Works
for 1943
18 pages... ..frames... 6443 - 6460

These five reports give tabular data on the refining of about 130,000 tons per year of Austrian oil.

- #248 - Annual Report of Reisholz Works
for 1939
92 pages... ..frames... 6461 - 6554
- #249 - Annual Reports of Reisholz Works
for 1940
60 pages... ..frames... 6555 - 6610
- #250 - Annual Report of Reisholz Works
for 1941
37 pages... ..frames... 6617 - 6653

These reports give data concerning the distillation and refining of about 400,000 tons per year of various gasolines and gas-oils. Continued on Reel #84.
