

FILM STUDY GROUP

SUBJECT INDEX

T. O. M. REEL NO. 111

Prepared by

SINCLAIR REFINING COMPANY

SINCLAIR REFINING CO.

March 6, 1947

Technical Oil Mission Microfilm Reel 111

Subject Index

<u>Subject</u>	<u>Reel No.</u>	<u>Frame</u>
<u>Abrasion</u>		
- loss of metallic bearing materials under boundary lubrication conditions.	111	11193 - 11211
- loss test method for synthetic lubricating oils.	111	11281 - 11286
<u>Anti-knock additive</u>		
Tests carried out with Baker gasoline and - cylidine.	111	11087 - 11088
Report on supercharge boundary curves and - liquids	111	11322 - 11354
<u>Catalyst</u>		
Flow resistance of ammonia	111	11022 - 11026
<u>Corrosion</u>		
- of exhaust valve heads in Daimler Benz motor.	111	11426 - 11428
- tests with Refring D lubricants.	111	11445 - 11459
- tests for gear oil.	111	11611 - 11612
<u>Diesel oil</u>		
- as a coolant at winter temperatures.	111	11055 - 11060
<u>Finned pipes</u>		
Sheet metal fins held on tube by force fit.	111	11027 - 11035
Expansion fins.	111	11036 - 11042
Optimum dimensions of fins.	111	11043 - 11047
Mounted on high pressure pipes		
Heat transfer in -	111	11072 - 11079
<u>Flow resistance</u>		
- of ammonia catalyst	111	11022 - 11026
- of "butyl contact mass" at low pressure	111	11080 - 11086
<u>Fuels</u>		
Discussion on aviation motor	111	11134 - 11147
Development of aviation gasoline	111	11165 - 11174
Report on supercharge boundary curves and anti-knock.	111	11322 - 11354
Test conditions for motor - in a BMW - 132 single - cylinder test block.	111	11411 - 11412

<u>Fuels - continued:</u>	<u>Reel No.</u>	<u>Frame</u>
Method of testing aviation -	111	11579 - 11610
Specifications for airplane Diesel -	111	11610 - 11610/3
<u>General topics</u>		
Index of 19 documents	111	11021
Correspondence on miscellaneous topics	111	11429 - 11436
Correspondence on miscellaneous topics	111	11441 - 11444
<u>Heat, frictional</u>		
- directly measured by thermo-electric testing methods	111	11212 - 11236
<u>Heat conductivity</u>		
- of oils	111	11048 - 11054
- of radiator coolants	111	11069 - 11071
<u>Heat exchanger</u>		
- high pressure	111	11061 - 11068
<u>Heat, specific</u>		
- of oils	111	11048 - 11054
- of radiator coolants	111	11069 - 11071
<u>Heat transfer</u>		
- coefficient determination for high-pressure tube with sheet-metal fins	111	11027 - 11035
- determination for high-pressure pipes with expansion fins	111	11036 - 11042
- in a motor vehicle radiator using different coolants	111	11055 - 11060
- coefficients of radiator coolants	111	11069 - 11071
- in high-pressure pipes	111	11072 - 11079
<u>Lubricating oil</u>		
- for airplane engine tested	111	11113 - 11124
- # 33 1101 tested	111	11125 - 11133
- and aviation motor fuels discussed	111	11134 - 11137
Development projects for	111	11150 - 11164
- development	111	11165 - 11174
test with special aviator-	111	11187 - 11190
Specifications for summer and winter aviation	111	11191 - 11192
- subject to glide test under boundary condition	111	11193 - 1121/1
- subject to thermo-electric testing method	111	11212 - 11236
- for aviation engines tested under boundary conditions	111	11237 - 11248
Lecture on "Modern knowledge of lubricating power and its measurement"	111	11256 - 11280
Various synthetic machine -	111	11249 - 11255
- tested	111	11281 - 11286
- difficulty combustible	111	11355 - 11356
- subject to 100 - hour engine test	111	11357 - 11377
- tested in BMW single cylinder engine	111	11384 - 11399
- #V-1 #P-6 tested	111	11397 - 11399/1

<u>Lubricating oil - continued:</u>	<u>Reel No.</u>	<u>Frame</u>
- (standard) tested	111	11400 - 11410
- test conditions	111	11411 - 11412
- SS1100 E tested	111	11413 - 11425
- # Rofring D subject to corrosion test	111	11437 - 11450
- tested	111	11460 - 11479
- (low cold test) developed	111	11480 - 11497
- (special) test	111	11498 - 11506
Development and testing of a water-soluble "torpedo"	111	11507 - 11519
- and torpedo oils	111	11520 - 11533
- engine testing (miscellaneous papers)	111	11534 - 11578
- for extreme pressure, specifications	111	11611 - 11612
<u>Lube oil additives</u>		
- various correspondence on-test proposed	111	11090 - 11101
- in special aviator lubes; test proposed	111	11187 - 11190
- and the Rofring D lubricant in corrosion tests	111	11445 - 11459
<u>N-tributyl - phosphate</u>		
- as additive	111	11105 - 11106
- physical constants	111	11108
<u>Otto - Diesel engine</u>		
- fuel injected during the suction or compression strokes	111	11287 - 11321
<u>Radiator coolants</u>		
Diesel oil as -	111	11055 - 11060
Properties of water, G.A. glycol, ethyl triglycol and diesel oil as-	111	11060 - 11071
<u>Specifications</u>		
- for summer and winter lubricating oils	111	11191 - 11192
- for airplane Diesel fuels	111	11610 - 11610/3
- for gear oils	111	11611 - 11612
<u>Supercharge</u>		
- boundary curves	111	11322 - 11354
<u>Tests for fuels</u>		
- for Baker gasoline with cyllidine	111	11087 - 11088
- for anti-knock liquids	111	11322 - 11325
- in BMW 132 single-cylinder test block	111	11411 - 11412
<u>Tests for lubricating oils</u>		
- airplane engine lubes	111	11113 - 11124
- SS1101	111	11125 - 11133
- 3 lube oils	111	11148 - 11149
Conference report on -	111	11165 - 11174
- (special aviator lubes with additives)	111	11187 - 1121/1
- under boundary conditions (glide test)	111	11193 - 11211
- under boundary conditions (thermo-electric test)	111	11212 - 11236

Tests for lubricating oils - continued:

Reel No.

Frame

- boundary conditions	111	11237 - 11248
Report on -	111	11249 - 11255
- various conditions (full, partial, boundary lubrication)	111	11256 - 11280
- by the abrasion loss method	111	11281 - 11286
- report on	111	11355 - 11368
- in 100 hour engine run	111	11357 - 11377
- in a BMW 132 single-cylinder engine	111	11384 - 11396
- (V1 and P No. 6)	111	11397 - 11399/1
- (conditions of test)	111	11411 - 11418
- SE 1100E in 100 hour engine run	111	11413 - 11425
- (miscellaneous papers)	111	11460 - 11479
- " "	111	11498 - 11506
- ("torpedo lubricating oil")	111	11507 - 11509
- engine run	111	11534 - 11535

Testing methods

- by abrasion loss	111	11281 - 11286
- for specific heat of radiator coolants (stream calorimeter)	111	11067 - 11071
- and apparatus for boundary lubrication (glide test)	111	11193 - 11211
- with the thermoelectric apparatus	111	11212 - 11236
- by abrasion loss	111	11256 - 11280
- for lubricants	111	11411 - 11412
- for aviation fuels	111	11579 - 11610

Thickeners

- viscosity determination	111	11102 - 11103
- influence on viscosity and temperature curve	111	11105 - 11106
- memos relating to	111	11109 - 11110/1

Viscosity

- determination of	111	11102 - 11103
- and temperature curve of thinly fluid gun lubricating oils	111	11105 - 11106
- of "torpedo oil" with tributyl phosphate and "Lucrylan II"	111	11107
- of tributyl phosphate at various temperatures	111	11111 - 11112
- of six unidentified synthetic lubricating oils	111	11237 - 11248
