

FILM STUDY GROUP

SUBJECT INDEX

T.O.M. REEL NO. 138

Prepared by

SINCLAIR REFINING COMPANY

Sinclair Refining Company

July 3, 1947

RECEIVED
 JUL 16 1947
 ALBERT E. MILLER

Technical Oil Mission
Microfilm Reel 138

Subject Index

<u>Subject</u>	<u>Reel No.</u>	<u>Document</u>
<u>Aliphatic Hydrocarbons</u>		
Preparation of high anti-knock isoparaffin motor fuels by the alkylation of -	138	III
Aromatization of straight chained - from the Fischer-Tropsch Synthesis	138	XXVIII
<u>Alkylation</u>		
Preparation of high anti-knock isoparaffin motor fuels by the -	138	III
- Plant at Leuna	138	IV
- and distillation	138	V
<u>Arohin</u>		
The - process	138	XVII
The - plant	138	XVIII
The first operating period of the - converter	138	XIX
<u>Aromatization</u>		
- of straight-chained aliphatic hydrocarbons from the Fischer Tropsch process	138	XXVIII
<u>AT - Plant</u>		
Diagram for the quantitative production at the - including catalytic dehydrogenation	138	XXV
<u>Aviation Fuels</u>		
Technical conditions of contract for -	138	I
Preparation of -	138	XIII
Preparation of - by means of catalytic cracking	138	XK
Preparation of isogasols and - from synthesis products	138	XXII
<u>Branched Hydrocarbons</u>		
Preparation of 2, 2, 3 trimethylbutane and other - by the hydrogenation of trimethyl-acetic acid	138	VII
<u>Catalytic Cracking</u>		
Aviation gasoline by means of -	138	XK
Flow diagram of I.C. experimental - unit in preparation of isogasols and aviation gasoline from synthesis products	138	XXI
	138	XXII

<u>Subject</u>	<u>Reel No.</u>	<u>Document</u>
<u>Chlorine</u>		
- dehydrogenation according to Baehr	138	XXVII
<u>Conditions of Contract</u>		
Technical - for aviation fuels	138	I
<u>Dehydrogenation</u>		
Materials to be used in - procedures	138	XXIV
"	138	XXIII
Diagram of AT-Plant including catalytic -	138	XXV
Catalytic - of propane to propene	138	XXVI
Chlorine - according to Baehr-	138	XXVII
<u>Di 1000</u>		
Preparation of -	138	II
<u>DHD-Process</u>		
Technical development of the -	138	XIV
<u>Distillation</u>		
Alkylation and -	138	V
<u>Flow Diagram</u>		
- for preparation of Di 1000	138	II
- alkylation plant at Leuna	138	IV
- isomerization scheme	138	X
- Arobin plant	138	XVIII
- I.G. experimental cracking unit	138	XI
- Chlorine dehydrogenation according to Baehr	138	XXVII
<u>HF-Process</u>		
- and the Moosbierbaum plant	138	XV
The -	138	XVI
<u>Hydrogenation</u>		
Preparation of 2, 2, 3 trimethylbutane and other branched hydrocarbons by the - of trimethylacetic acid	138	VII
<u>Isogasol</u>		
Preparation of - and aviation gasoline from synthesis products	138	XXII
<u>Isomerisation</u>		
- of n-butane with $AlCl_3$	138	IX
- scheme	138	X
-	138	XI
- of paraffins	138	XII

<u>Subject</u>	<u>Reel No.</u>	<u>Document</u>
<u>Isoparaffin</u>		
Preparation of high anti-knock - motor fuels by the alkylation of aliphatic hydrocarbons	138	II
The most important data and preparation methods of some - and their use as motor fuels	138	VIII
<u>Moosbierbaum</u>		
HF - process and the - plant	138	XV
<u>Motor Fuels</u>		
Preparation of high anti-knock isoparaffin - by the alkylation of aliphatic hydrocarbons.	138	III
The most important data and preparation methods of some isoparaffins and their use as -	138	VIII
<u>n-Butane</u>		
The isomerization of - with $AlCl_3$	138	IX
<u>Paraffins</u>		
Isomerization of -	138	XII
<u>Preparation</u>		
- of HI 1000	138	II
- of high anti-knock isoparaffin motor fuels by the alkylation of aliphatic hydrocarbons	138	III
- of trimethylbutane	138	VI
- of 2, 2, 3 trimethylbutane and other branched hydrocarbons by the hydrogenation of trimethylacetic acid	138	VII
The most important data and - methods of some isoparaffins and their use as motor fuels	138	VIII
The - of aviation gasolines	138	XIII
- of isogasols and aviation gasoline from synthesis products	138	XXII
<u>Propane</u>		
The catalytic dehydrogenation of - to propene	138	XXVI
<u>Propene</u>		
The catalytic dehydrogenation of propane to -	138	XXVI
<u>Trimethylacetic Acid</u>		
Preparation of 2, 2, 3 trimethylbutane and other branched hydrocarbons by the hydrogenation of -	138	VII
<u>Trimethylbutane</u>		
The preparation of -	138	VI
<u>2, 2, 3 Trimethylbutane</u>		
Preparation of - and other branched hydrocarbons by the hydrogenation of trimethylacetic acid.	138	VII
