

INDEX TO

REEL

8

R E S T R I C T E D

This document contains information affecting the National Defense of the United States within the meaning of the Espionage Act, 50 U.S.C., 31 and 32, as amended. Its transmission or the revelation of its contents in any manner to an unauthorized person is prohibited by law.

U.S. GOVERNMENT TECHNICAL OIL MISSION
INDEX - MICROFILM - REEL-8
(Orig. Ident. Reel 8A)

<u>Item Index</u>	<u>No. of Pages</u>
<u>BAG 2732 TARGET 30/4.11 - CONTINUATION OF ITEM 2 REEL 7</u>	
2 - Continued:	
1) Experiments with RM 10927 Iron catalyst 1941, includes: catalyst analyses; discussion of previous use on liquid phase pitch and pitch distillate-hydrogenation; pressure drop in reaction chamber and other operating problems; operating conditions	39
3 - Patents	
1) Method for preventing sedimentation and coking in the hot separators of high pressure hydrogenation plants (Application) "Ruhroel" December 10, 1942	7
2) Method for testing antiknock properties of fuels Patent #744419 T. Rummel to Siemens-Halske Principle: gas formation on electric discharge patented December 30, 1941 published November 18, 1943	1
3) Process for hydrogenation of pitch from low temperature carbonization of coal (draft for application) Ruhroel December 13, 1944	4
4) Process for removal of ash from pitch (application) Ruhroel December 14, 1944	3
5) Installation for the movement of pitch in heated lines. Patent 747106 Paul Hillebrand, patented September 28, 1937 Published January 27, 1944	3
6) Process for the preparation of active catalysts for the polymerization of unsaturated compounds. (Application draft) Ruhroel (no date)	2
7) Use of sulfur dioxide for the preparation of high molecular compounds from olefins. Ruhroel (Draft of application)	9

Page 2.

3 - Patents (continued)

	<u>No. of Pages</u>
8) Recovering solvent and extraction products from the residue of pressure extraction of coal. Letter. Ruhroel February 11, 1944	2
9) Revision of patent law. Reichsgesetzblatt November 20, 1943	3
10) Process for the preparation of low ash coke, particularly electrode coke (application "Ruhroel" January 15, 1944	9
11) Process for the production of sulfonated, water soluble organic compounds (draft of application) Ruhroel December 8, 1943	5
12) Process for the production of polynuclear hydrocarbons with more than 5 rings, particularly Coronen. (draft of application) December 18, 1943	6
13) Letter concerning objection raised against patent application Item 1). 11-20-43	2
14) Automatic, electric, one or multistage regulator, Letters. Ruhroel September 30, 1943	6
15) Draft for patent application on subject of item 8) above. July 13, 1943	3
16) Method for removing impurities from recycle gas of high pressure hydrogenation plants without special washing; patent application Ruhroel June 21, 1943	15
17) Preparation and use of inhibitors in acid for cleaning of iron equipment, draft of application. Ruhroel June 3, 1943	5
18) Inside insulation of tank cars carrying hot liquids, application, Ruhroel June 1, 1943	3
19) Application for item 1) above 11-26-42	4
20) Highly active gasoline inhibitors (application) Ruhroel February 21, 1941	4
21) Method for preparation of toluene. I.G.Farbag March 18, 1937. (published October 29, 1942)	6

3 - Patents (continued)

No. of
Pages

- | | | |
|-----|---|----|
| 22) | Preparation of shape retaining catalysts from silicic acid containing materials. Letter. Stinnes. September 26, 1941 | 3 |
| 23) | Improved storage stability and gum test of gasolines containing organo-metallic anti-knock agents. Letter. September 23, 1942 | 1 |
| 24) | Improvements of storage stability of leaded gasolines by washing with mild alkalies, Ruhroel January 23, 1941 | 5 |
| 25) | Draft of application for item 20) above February 13, 1941 | 4 |
| 26) | Improvement of coal pressure extracts (Patent #693646) patented June 1937, published 1940 Stinnes | 2 |
| 27) | Production of hydrocarbon oils from coal; correspondence concerning application September 1939 Ruhroel | 11 |
| 28) | Preparation of high octane gasoline; patent application June 1939 Stinnes | 16 |
| 29) | Preparation of shape retaining catalyst from silicic acid containing materials; patent application 5-31-39 Stinnes | 7 |
| 30) | Pressure hydrogenation of coals, tars and mineral oils, copy of patent application 8-11-38 I.G. Farben | 3 |
| 31) | Correspondence concerning a registered trade name Ruhroel 1938 | 13 |
| 32) | Apparatus for the absorption of undesirable pressure fluctuations in measuring systems 1938 Ruhroel | 6 |
| 33) | Process for the destructive hydrogenation of extracts from solid fuels; patent 633693 October 1927 Pott & Broche; patent 633391 August 1937 Pott & Broche | 4 |
| 34) | Process for producing extracts from coals of all types, patent 663497 July 1928 Pott & Broche Letter, April 1938; patent 632631 July 1927 | 10 |

R E S T R I C T E D

	<u>No. of Pages</u>
35) Hydrogenation of distillation and extraction products of coal, patent application Stinnes	6
36) Correspondence between I.G. and Stinnes concerning coal hydrogenation patents 1938	4
37) Copies of I.G. Farben patent applications: a) Improvement of motor fuels 1937 b) Motor fuel 1936 c) Operation of diesel motors 1935	9
38) Recovery of hydrocarbon oils from coal; patent application July 1937 Stinnes	6
39) Notes concerning meeting between Stinnes and Leuna concerning patent exchange 6-19-37	4
40) Removal of impurities from recycle gas in catalytic high pressure reactions; patent application April 1937 I.G. Farben	11
41) Recovery of hydrocarbon oils from solid coals draft of patent application; Ruhroel	4
42) Removal of solids from liquids by pressure filtration; draft of patent application; Ruhroel 1937	4
43) Pressure hydrogenation of coal; patent #638637 July 1927 Gesellschaft fuer Teerverwertung	2
4 - History 700 atm; Development and Estimated Costs of Plant. (Ruhroel at Bottrop 1939/40)	63

~~This section includes: Statement of purpose of the new plant; cost of three designs; letter by Hugo Stinnes concerning completion of new plant according to schedule to Admiral Raeder, Ruhroel, etc.; details of contract for sale of aviation gasoline; discussions concerning license fees to I.G. Farben; analysis and investigation of phenols in gasoline and gasoil.~~

5 - Stalls Analyses

- | | |
|---|----|
| 1) Product and Catalyst Code | 4 |
| 2) Analyses of charge and products of coal extraction, liquid and vapor phase hydrogenation plants 1943 | 79 |

BAG 2733 TARGET NO. 30/4.11 - BOTTRUP

Item Index

- 1 - Inhibitors:
 - 1) Tests on Phenolic inhibitors of Scholven A.G. in leaded aviation gasoline 8-8-43 1
 - 2) Report on the effectiveness of inhibitors "A-Bi 180/230" in gasoline 4-24-43 6
 - 3) Note on inhibitors from the Scholven hydrogenation works 5
- 2 - Inhibitors:
 - 1) Inhibitor 2V-1 (185-210°C fraction obtained by extracting gasoline from liquid phase hydrogenation with caustic, springing phenols with carbon dioxide and fractionating) Analyses, correspondence, etc. 1943 Ruhroel 23
 - 2) Inhibitor B I S and others such as Lecithins, caprylic acid, caprylic acid 1943 26
- 3 - Tar Acids:
 - 1) Description of the "T. G.-Lurgi - Phenosolvan" method for removing phenols from coking and hydrogenation water, etc. Includes flowsheet 1940 5
 - 2) Preparation and investigations of phenols in gasoline from the vapor phase hydrogenation of coal extracts Dec. 1940 6
 - 3) Price quotation from raw phenols (Gesellschaft fuer Teerverwertung to Ruhroel) analysis of raw phenols, and miscellaneous correspondence 8
- 4 - Knock Ratings and Engine Calibrations

Comparison tests on knock engines (V.V. 75)
Report #420 4-27-40 I.G. Farben, Ludwigshofen
Compares C F R and IG motors and reproducibility of results on same as well as different motors 28
- 5 - Water gas and Alkazid
 - 1) Daily report on the water gas plant 10-20-37 3
 - 2) Schematic flowsheet of water gas plant (very much simplified) 3-1-38 2

Technical Oil Mission
Index - Reel-8

No. of
Pages

Item Index

5 - Water gas and Alkazid (continued)

- | | |
|--|---|
| 3) Calculation of Nitrogen content of water gas 11-19-37 | 3 |
| 4) Discussion of the "wet catalysis" and Alkazid plant of Ruhrcoel 4-5-40 | 6 |
| 5) Discussion of operating experiences at the Alkazid plant at Scholven 4-3-41 | 3 |
| 6) Note on stabilizer plant built by Koppers for Ruhrcoel 5-21-41 | 1 |
| 7) Note on operation of new vapor phase product distillation plant | 2 |
| 8) Inspection of the "wet catalysis" and phenolic water gasification plant at Ruhrcoel | 4 |

6 - Gasoline Refining

- | | |
|--|----|
| 1) Results of caustic and acid treating of "Technikum" gasoline 12-18-40 at Ruhrcoel | 2 |
| 2) Composition of various gasolines 12-16-40 | 3 |
| 3) The inhibiting effect of phenol and its homologs in leaded gasolines 12-16-40 Ruhrcoel among those tested were phenol; the three cresols; 1,3,4 - 1,3,5 - 1,2,4, -1,4,2-1,3,2 dimethyl phenol (the last one very good); A and B naphthol; O and M-diphenol; 1,3,5 triphenol, etc. | 4 |
| 4) Caustic and acid treatment of gasolines 12-22-41 | 22 |
| 5) Purification of untreated gasoline from the large scale experimental plant at Welheim | 4 |
| a) removal of pyridins with 40% sulfuric acid | |
| b) removal of phenols with 17% caustic | |
| c) acid treatment | |
| d) neutralization and distillation | |
| Ruhrcoel 1-24-38 | |
| 6) Experimental acid treatment of gasoline at Leuna | 2 |
| 7) Correspondence on mercaptan content of finished gasoline Ruhrcoel November 1943 | 3 |
| 8) Blending tests with gasoline to determine the effect of boiling points, boiling point curves and chemical composition December 19, 1940 Ruhrcoel | 4 |

6 - Gasoline Refining (continued)

- | | |
|--|----|
| 9) Same as 1) Item 6 | 2 |
| 10) Same as 2) Item 2 | 6 |
| 11) Properties of pyridine from gasoline 12-11-40 | 2 |
| 12) Discussion of the present status of experiments for the improvement of aging tests of leaded gasolines by the addition of natural inhibitors 11-9-40 | 6 |
| 13) Treating experiments with gasoline prepared over K 391 catalyst 11-9-40 | 2 |
| 14) The treating possibilities for gasoline at 1.2 ccm TEL/liter 10-12-40 | 6 |
| 15) Treatment of a dehydrogenated gasoline 9-20-40 | 1 |
| 16) Treatment of Gelsenberg gasoline 9-17-40 | 2 |
| 17) Treatment and rerunning of Scholven CV 2b gasoline | 3 |
| 18) Treatment of gasolines produced over K 369 catalyst 9-5-40 | 2 |
| 19) Comparison of treating methods on Scholven gasolines produced over catalysts K 5058 and K 6434 8-9-40 | 2 |
| 20) Treatment of various gasolines produced over K 349, K 7019 1940 | 10 |
| 21) Notes on the caustic treatment of Weihein gasoline for the production of aviation gasoline February 1940 | 11 |
