U.S. GOVERNMENT TECHNICAL OIL MISSION  
INDEX - MICROFILM - REEL - 14  
(Orig. Iden. Reel 14A)

BAG 3043 TARGET No. 30/4.02 - LEUNA

<u>INDEX ITEM No.</u>	<u>No. PAGES</u>
4. <u>OXO - Process</u>	
Material balance for the manufacture of fat alcohols by the aldehyde synthesis and hydrogenation (OXO process.) February 7, 1940.	1
Discussion of I.G. with Ruhrchemie on the OXO process. (Manufacture of olefins, discussion of the OXO process.) February 15, 1940.	5
Instructions for the experimental operation of the aldehyde synthesis using a catalyst suspension. (Catalyst used, addition of Co and H <sub>2</sub> on propylene, addition of CO and H <sub>2</sub> on liquid olefins). February 21, 1940. One flow-sheet.	5
Flowsheet of the OXO pilot plant. Sept. 14, 1940. 2 parts	
Flowsheet of the OXO pilot plant. Sept. 18, 1940.	1
Memorandum on a meeting on the preparation of metal carbonyls. Dec. 9, 1940.	1
Report on the preparation of textile agents from olefins by direct sulfonation or by sulfation after conversion of the olefins to alcohols. February 6, 1941.	6
Memorandum on a discussion with Ruhrchemie on the aldehyde synthesis by the OXO process. February 2, 1940.	3
Memorandum on the cost of a plant for the OXO process (10,000 tons olefins/year) to be built jointly by I.G. and Ruhrchemie. April 30, 1941.	4
Memorandum on a discussion of OXO problems with Ludwigshafen. (Exchange of information on operations, catalyst problems, reaction of low-molecular weight olefins, reaction of medium and high molecular weight olefins, reaction with other unsaturated compounds, plant visit). December 12, 1941.	3

<u>INDEX ITEM No.</u>	<u>No. PAGES</u>
Letter by Dr. Otto Ambros (Ludwigshafen) to Prof. Martin on the reaction with low-molecular weight olefins. December 23, 1941.	2
Letter by Prof. Martin to Dr. Ambros on the reactions of low-molecular weight olefins. December 2, 1941.	2
Report on a pilot plant run on the OXO process. February 2, 1942.	4
Memorandum on a discussion with Henkel A.G. (Use of OXO alcohols and their sulfuric acid esters washing agents). February 2, 1942.	2
Report on the status of the OXO problem. (Comprehensive report on the status of the laboratory and pilot plant work on the addition of CO on aldehydes, investigation of the products and the general application of the reaction). February 2, 1942.	8
Memorandum on a meeting with Ruhrchemie on the design of a commercial plant for the OXO process. February 10, 1942.	3
Summary report on the design and intended operation of the OXO plant at Oberhausen-Holtien. February 2, 1942. (First 2 pages are microfilmed twice); one flow sheet.	6
Report on the reaction products from the OXO process. February 25, 1942.	17
Discussion of design details for the OXO plant at Oberhausen. February 27, 1941.	5
<del>Memorandum on a meeting at Ludwigshafen on the potential utilization of the OXO alcohols, especially the C<sub>7</sub>-C<sub>12</sub> alcohols. March 17, 1942.</del>	<del>2</del>
Memorandum on the raw material basis and manufacturing costs as well as the disposal and evaluation of the products. March 28, 1942. 4 diagrams, 10 tables.	7
Memorandum on the future development of the OXO process including utilization of the products. March 30, 1942.	7
Letter by Prof. Martin on the operation of the OXO process in the presence of water. April 20, 1942.	2
Letter by Dr. Herold on the continuous operation of the OXO process. April 27, 1942.	2

<u>INDEX ITEM No.</u>	<u>No. PAGES</u>
Letter by Dr. Ambros on the continuous operation of the OXO process. May 4, 1942.	2
Memorandum on the economic problems resulting from the change from discontinuous to continuous operation of the OXO plant at Holten. May 5, 1942. One diagram.	3
Memorandum on the conversion and expansion of the OXO pilot plant for production purposes. May 12, 1942.	2
Memorandum on the design and construction costs for an OXO plant for 20,000 tons/year. May 28, 1942. One diagram.	2
Report on the importance of the Synol and OXO synthesis with respect to the existing synthesis of methanol, isobutyl oil and fatty acids. June 1, 1942. One table.	11
Memorandum on a discussion on the continuation of experiments to use the neutral material from the fatty acid manufacture in the OXO reaction. June 17, 1942.	1
Memorandum on the reaction by the OXO method of the neutral material from the ester oil plant. June 23, 1942.	1
Chemical and physical data of aliphatic compounds. December 3, 1941.	1
Remark on secrecy of the term "Synol". July 17, 1942.	1
Cover letter to contract on OXO process. July 7, 1942.	1
Letter requesting data on cooperative analytical work. July 11, 1942.	1
Analytical data on olefins for the OXO process. No date.	1
Cover letter for samples of various alcohols obtained by the OXO process. July 9, 1942.	1
Memorandum on a discussion to obtain the alcohols for the ester oils by the OXO synthesis. July 14, 1942.	2
Memorandum on a discussion of the continuous operation of the OXO process. July 15, 1942.	4
Ester oils as special lubricants. July 25, 1942.	1
Report on the structure of OXO and Synol alcohols and on the mechanism of the OXO reaction. August 21, 1942. One diagram.	12

<u>INDEX ITEM No.</u>	<u>No. PAGES</u>
Letter on the use of OXO alcohols in plasticizers suitable for low temperatures. September 17, 1942.	3
Report on the water absorption of C <sub>18</sub> OXO alcohols. September 28, 1942.	1
Memorandum on the preparation of methyladipol. August 10, 1942. One diagram.	3
Evaluation of OXO alcohol sulfates as textile agents; registration of these sulfonates as textile agents. October 12, 1942.	9
Memorandum on the expansion of the OXO pilot plant at Leuna for the temporary production of 2,000 tons of alcohols per year for the manufacture of plasticizers. October 20, 1942.	6
Request for the testing of OXO alcohol sulfates as textile agents; description of the properties of these products. November 27, 1942.	1
Request for cracked oil for the OXO synthesis. November 9, 1942.	1
Correspondence on the supply of cracked oil. November 25, 1942. (2 copies)	1
Request for testing of "Lana" type OXO products. December 2, 1942.	1
Discussion of properties of OXO alcohols and their products. December 9, 1942.	3
<del>Exchange of information on the OXO process with Ludwigs-</del> hafen. (Manufacture of catalyst, OXO reaction, removal of cobalt from the reaction product, etc.) December 15, 1942.	<del>2</del>
Discussion of the supply of olefins by Ruhrchemie. December 12, 1942.	2
Sulfation of OXO alcohols. December 16, 1942.	4
Request for the allocation of material to expand the OXO plant (use of OXO alcohols in esters for special lubricants). December 18, 1942.	1
The manufacture of fatty acids from OXO alcohols. January 8, 1943.	2

Supplement to the request of material for the expansion of the OXO plant. January 12, 1943.	1
Discussion of the properties of OXO alcohol sulfates for the use as textile agents. January 14, 1943.	1
Description and comparative tests of textile agents made from OXO alcohols. January 15, 1943.	2
Inspection of the Ruhrchemie OXO plant and discussion of the operations planned. January 29, 1943. One flowsheet.	4
Letter on the supply of cracked oil for the OXO process. February 9, 1943.	2
Same. February 10, 1943.	1
Report on the status of the OXO process. February 17, 1943	2
Letter on the supply of cracked oil. February 22, 1943.	1
Memorandum on the potential supply of C <sub>8</sub> -C <sub>12</sub> alcohols by the Michael process. February 22, 1942.	1
Request for the grant of funds for the expansion of the OXO plant. February 27, 1943.	1
Request for funds for the expansion of the OXO plant. January 28, 1943.	1
Memorandum on the conversion of the OXO plant to continuous operation. March 29, 1943. One flowsheet, two diagrams.	3
Memorandum on the supply of cracked oil. June 3, 1943.	1
Supply of cracked oil. Letters of June 28 and July 7, 1943.	2
Same. July 3, 1943	1
Letter on the supply of cracked oil. July 5, 1943.	2
letter on the supply of cracked oil. July 16, 1943 .	1
Comparison of the economics of the sulfation of the crude OXO alcohol mixture with the sulfation of the purified alcohols. August 4, 1943. Two diagrams, three tables, one explanatory remark.	9
Report on the utilization of olefinic products from CO + H <sub>2</sub> syntheses for the OXO process with special consideration of bases for textile agents. November 3, 1943. Diagrams in the text.	30

Report on the xanthates of OXO and Synol alcohols with respect to their use in the manufacture of rayon. November 8, 1943.	4
Cover letter to above report. November 22, 1943.	1
Physiologic effects of branched fatty acids from the OXO process. December 7, 1943.	2
Letter from Oppau on possible experiments on the physiological effects of branched fatty acids. Feb. 9, 1944.	1
Report on the physiological effects of branched fatty acids. February 4, 1944.	1
Analytical results on olefins and alcohols from the OXO process. December 20, 1943.	2
Analytical results on cooperative samples of hydrocarbons and alcohols from the OXO process. December 20, 1943.	3
Summary of the sulfochlorination process and the OXO and Synol processes. April 5, 1944.	3
Cover letter on three samples of aldehydes. (Table with physical and chemical data). April 17, 1944.	2
Letter on physical data on OXO alcohols. May 9, 1944.	1
Letter on properties of products from the OXO process. June 6, 1944.	2
Letter on problems of the OXO plant at Holten. June 21, 1944.	3
Report on the manufacture of Palatinol (plasticizer) from OXO alcohol. June 29, 1944, (including cover letter), 1 table of properties.	3
Discussion on the manufacture of OXO and Synol products. July 6, 1944.	1
Data on OXO alcohols made from olefins obtained from low-temperature carbonization tar. November 27, 1944.	
Memorandum on OXO catalyst composition. August 9, 1944.	1

5. Analytical methods for OXO products.

Methods of analysis for olefins (charge stock) and alcohols. August 19, 1941.	7
Discussion of the above methods of analysis. September 4, 1941. Includes one handwritten page of comments.	7
Determination of hydrocarbon soluble in H <sub>2</sub> SO <sub>4</sub> -H <sub>3</sub> PO <sub>4</sub> . September 3, 1941.	1
Minutes of a meeting on analytical methods. October 8, 1941.	14
Results of analyses of cooperative samples and comments on analytical methods used. July 18, 1942. Includes cover letter.	11
Cooperative analysis of OXO alcohol C <sub>16</sub> . December 1943 - January 1944.	9
Cooperative analysis of OXO alcohols C <sub>11</sub> /C <sub>12</sub> , C <sub>12</sub> /C <sub>13</sub> May - July 1944.	5

6. Hydrogenation

Report on the experimental work for the design of the hydrogenation plant Lutzkendorf. May 1938. Two title pages. Three flow sheets (one in duplicate). <u>two copies.</u>	11
<del>Filtration of the sludge from coal hydrogenation.</del> July 21, 1938. Two title pages, one drawing.	20
Report on starting the propane dewaxing plant Me944 March 15, 1940. Three flow sheets.	33
The measurement and control of the interface-level (gasoline and water) in the hydrogenation plant Leuna. April 17, 1940. Two cover pages, three pages supplement, twenty drawings.	16
Aromatization of the middle oil from coal hydrogenation. April 10, 1941. One title page.	12
Report on hydrogenation in the gas phase at 700 and 300 ats. April 17, 1941. Includes cover letter.	12.

Summary report on the hydrogenation of middle oil at pressures above 300 atmospheres using Ruhrol catalyst K413. April 1941. Includes title page. 27

Progress report on the work on coal degradation. February 1944. Includes title page. 8

Comparison of the economics of the Linde and Gerlach units for the recovery of ethane, propane and butane from the high-concentration gases from the hydrogenation. February 23, 1944. Includes cover letter, one flow sheet, six tables. 7

Planned expansion of the plant for working up the coal slurry residue May 1944. 1

Report of the inspection of the rotating kilns at Scholven and discussion of sludge processing. February 20, 1939. 10

Minutes of meeting on the operation of low-temperature carbonization kiln. March 2, 1944. 8

Design data for rotating kiln. February 25, 1944. 1

Report on the exchange of experience with rotating kilns. November 5, 1943. 3

Memorandum on the installation and operation of rotating kilns. October 8, 1943. 1

Memorandum on the estimated energy requirements for the low-temperature carbonization of residual sludge. May 26, 1943. 1

Memorandum on the operation of rotating kilns at Leuna. March 12, 1943. One flow-sheet. 2

Memorandum on the use of rotating kilns for the carbonization of heavy oil containing sand. March 3, 1943. 1

Description of the operation of a rotating carbonization kiln. March 3, 1943. One flow-sheet. 1

Memorandum on the intended use for two new rotating carbonization kilns. February 23, 1943. 1

Memorandum on the expansion of the coal drying plant. March 13, 1943. 1

History of the alkylation process at Leuna, June 18, 1942. 3

Draft of a report on the development work on butane dehydrogenation. August 20, 1942. 4

Memorandum on the cost of alkylation and ET 100 technical isooctane by various methods of manufacture. (2 copies of 2 pages; not included in count), eight flow-sheets. 14

Memorandum on the stepwise catalytic dehydrogenation of butane. December 3, 1942. 2

Memorandum on the comparative manufacturing costs of alkylate on the basis of catalytic dehydrogenation with moving and fixed bed catalysts. February 10, 1943. Four tables, three flow-sheets. 3

Memorandum on a large-scale test with fixed-bed dehydrogenation catalyst. July 28, 1943.

Memorandum on the experiments on dehydrogenation of butane over fixed bed catalyst. September 14, 1943. One diagram. 1

Alkylation of propylene. May 26, 1944. 2

9. Alkylation

Status of the development of H<sub>2</sub>SO<sub>4</sub> alkylation at Leuna. January 28, 1941. One drawing. 1

Memorandum on a large-scale alkylation test run. April 7, 1941. 2

Discussion of the development of n-butane dehydrogenation and alkylation at Leuna. June 9, 1942. Ten diagrams, two flow-sheets. 3

Letter on the acid requirements for alkylation. July 22, 1942. 1

Report on the status of the alkylation. April 29, 1941. Includes abstract and cover letter. 23

Exchange of experience with alkylation plants. September 4, 1942. 10

Memorandum on the comparative economics of alkylation using catalytic dehydrogenation or chlorination and dehydro-
