

BAG TARGET

- ** Drawings by Rheinmetal-Borsig A.G.
- *** Drawings by F. Seifert
- All Other Drawings by Ammoniakwerk, Merseberg g.m.b.h.
- 29. M-046-1 Cooling Coils in Reactor
- 30. M-019-2 Gas Yields
- 31. M-023a-1 Reaction Chamber Setting
- 32. M-031-1 Piping Details
- 33. M-032-1 Piping Details
- 34. M-041-1 Arrangement of Reactor and Apparatus

3391 30/4.02 - I.G. Farbenindustrie, Leuna

- 35. M-042-1 Flow Sheet
- 36. M-5926a-1 Dumping Apparatus for React. Chamber
- 37. M-5727a-1 Flow Sheet - General
- 38. M-5759-1 Flow Sheet - Hydrogen Purification and Solution
- 39. M-6304a-1 Piping Details
- 40. M-6305a-1 Piping Details
- 41. M 1 Piping Details
- 42. B-SK-111 L.P.G. Recovery from Catalytic Cracking
Pilot Plant
- 43. SK (12.10.43) Flow Sheet - Alkyl. Chloride Plant
- 44. M-6117-16 Curves - Solubility of Methane and Hydrog.
Gasoline
- 45. M-6118-16 Heat of Dilution - Sulfuric Acid
- 46. M-6119-16 Heat of Dilution - Hydrochloric Acid
- 47. M-10053a-2 Radiant Heat Transfer Chart
- 48. M-10054a-2 Radiant Heat Transfer Chart
- 49. M-5455-8 Nomograph - Vapor Pressure vs. Temp. for
Hydrocarbons and Aliphatic Alcohols
- 50. M-5127a-1 Vapor Pressure - Temp. Curves Amines and
Acids
- 51. M-5128a-1 Vapor Pressure - Temp. Curves Alcohols,
Ethenes, Aldehydes and Ketones
- 52. ---- Vapor Pressure - Temp. Curves for Alcohols
- 53. M-3628d-2 Slagging Producer
- 54. M-799-1 Slagging Producer
- 55. M-11098-2 Proposed Change of Cooling System
- 56. Ba-90211/25 Piping Scheme
- 57. Ba-90211/34 Secret Installation "Waste"
- 58. ---- Map of Secret Plants

1928 30/4.03 - I.G. Farbenindustrie (Ludwigshafen)

- 1. General Hydrogenation Data
 - Gas makes at Pölitz
 - Solubility of H₂ in Oils
 - Gas Hydrates
 - Dehydrogenation Pyrene
 - Properties of German Crude Oil
 - Data for A.N.I.C. on Hydrog. of Albanian Oil
 - High Pressure Structural Materials

BAG

TARGET

2. Liquid Phase Hydrogenation
Flow Sheets and Performance Data
Stall Layout and Controls
Hydrogenation of Bohlen tar oven catalyst - 8376
Hydrogenation of Bituminous Coal 250 and 600 ats.
Use of Bayermasse in Hydrogenation Brown Coal
On the Hydrogenability of Coals
Development of Liquid Phase since 1933
Chemistry of Asphalts
Asphalts in Liquid Phase
Ultimate Analysis of Liquid Phase Products
Summaries of Knowledge on Liquid Phase Processes, 1942
3. Vapor Phase Hydrogenation
Experiments with Iron Containing Catalysts
Reactions Using WS_2
Development of Catalysts
Comparison of Costs of 7019 Stall, 5058 and 6434
Silicon Sulphide and Developments on Sulphides and Oxides
Reduction of As_2O_3
4. Engine Tests on Isooctane
5. Rich Mixture Blending Agents
6. (a) Quality of Fischer-Tropsch Petrol
(b) Examination of Fischer-Tropsch Product
7. Ethylene absorption from Coke Oven Gas
8. Electrode Material for Aluminum Manufacture
9. Synthetic Alcohols
10. Reports on Paraffin Oxidation
Synthetic Fats
11. D.H.D.
Technical Data
Flow Sheet
Stall Arrangements
12. Acetylene Reports
Arc Process from Ethylene
Conversion to acetaldehyde
Arc Process of Vinyl Acetylene to Butadiene
