

BAG TARGET

INDEX - MICROFILM - REEL - 72
(Orig. Ident. Reel 7C)

2744

22. Determination of S in synthesis gas
23. Analytical methods for liquid fuels
24. Tests data and experiments on individual ovens
25. Analysis of Tripene (Hexachlorbutene)
26. Specimen analyses of cobalt catalysts
27. Technical conference report 1941
28. Production of toluene from hexane and hexene
29. Gasol analysis
30. Operating costs 1941-3
31. Improving the octane number of benzin
32. Preparation of alkyl benzol
33. Hydrogen costs in the Bamag-Schacht plant
34. Method of testing catalyst
35. Diesel oil
36. Plant for preparing pure esters
37. Oven house foreman's log for period July 1, 1943 to July 14, 1943
38. Use of aluminum alcoholates in medicine
39. Use of aluminum alcoholates in the textile industry
40. Production of alcohols and esters
41. Calculation of yield when hydrogen is added to the second stage
42. Analyses of synthesis and residual gases
43. Gasol analyses
44. Calculation of water production from gas analysis
45. Conversion of carbon monoxide
46. Carbon and hydrogen balances
47. Olefine production in Stages I and II
48. Use of active carbon adsorption between Stages I and II
49. Adjustment of gas for second stage
50. Working costs
51. Drying water gas with silica gel
52. Reactivity of coke
53. Properties of Benzin from a 2 stage plant
54. Diesel oil analyses
55. Determination of lead tetraethyl in benzin
56. Purification with bleaching earth
57. Activity of sulphur purification catalyst
58. Determination of sulphur in water gas
59. Physical properties of benzin-benzol-methanol mixtures
60. Dependence of octane number on boiling point
61. Mixture rules for mixtures of light and heavy benzin
62. Octane numbers
63. Ring analysis
64. Properties of benzin from active carbon
65. Specimen log sheet for fine sulphur purification
66. Effect of olefine content on octane number
67. Octane numbers of individual hydrocarbons
68. Mixed Diesel oils
69. Use of 80% sulphuric acid in the polymerization plant
70. Cracking at low pressures to produce olefines
71. Typical day to day plant results

BAG TARGET

72. The arithmetic analytical determination of the research octane number
73. Lubricating oils - plant and product
74. Life history of an oven
75. Edible fats - feeding tests
76. A fractionation plant
77. Diacetonolcohol from acetone
78. Preparation of octyl acetate
79. Preparation of esters
80. Experiments on effect of gas rate on production of olefines and acids
81. Terrena earth (bog iron ore)

3979 30/Opportunity - WIFO Blending Station, Stassfurt (Leopoldshall)

a. Reports

1. I.G. Test engine - operating instructions
2. Report on engine test conference at Oppau, 15-16 July 1941
3. Report on engine test conference at Oppau, 25-26 Nov. 1941
4. Semi-annual report on combined research on engine testing, I.G. Oppau, April 1942
5. Report on fifth engine test conference at Oppau, 16-17 February, 1943
6. a. Semi-annual report on combined research on engine testing, I.G. Oppau, May 1943
b. Reid vapor pressure determinations, Rheinpreussen
7. Semi-annual report on combined research on engine-testing, I.G. Oppau, April 1944
8. Cylinder and piston ring wear, Tech. Hochschule, Dresden (VDI report)
9. Air Ministry Report - Directions for Testing of aviation lube oils. March 1938
