

BAG TARGET

INDEX - MICROFILM - REEL - 75
(Orig. Ident. Reel 3D)

2 & 3 Hydrierwerke Pölitz 30/4.13

4. Completed
5. **Monthly** sheets of daily average stall conditions selected to cover:
 - Deiner hydrogenation over 3078
 - Prosaturation over 5058, 5058 & 7846, 5058 & 8376
 - Splitting over 6434
 - Liquid Phase stalls
6. Miscellaneous Operating Reports
 - Fuel Gas Report, August 1942
 - Annual Power Section Report, 1942
 - Lean and Rich Gas Report, September 1941
7. Descriptions of Factory, Processes and Equipment
 - Layout Plan 6.6.44
 - Description of Process
 - Items of Equipment 1944
 - General Flow Diagram 28.11.44
8. Summaries of Consumptions; Productions and Efficiencies
 - Liquid Phase stalls
 - Petrol Production VT708, DHD, ET110, etc.
 - Catalyst Consumption Estimates
9. Calculated Plant Balances
10. Cost Data
 - Notes on Hydrogenation Cost Calculations
 - Raw Material Costs 1940-1942
 - Summarized costs, 1941 - 1943
 - Calculated costs of motor and aviation petrol, 1942
 - Monthly cost reports March 1943, Dec. 1943, Jan. 1944
11. Liquid Phase Hydrogenation
 - Coal Preparation
 - Coal and Petroleum Oil Hydrogenation Schemes
 - Stall 12 Line Diagram
 - Paste Interchange
 - Stalls 13 and 14 Operation on Coal
 - Report on Hydrogenation of Petroleum Residues 1939
 - Analytical Data on Liquid Phase Processes
 - "Abbsu" calculation
12. Liquid Phase Catalysts
 - FeSO₄, Bayermasse, Sulphagram
13. Vapor Phase Hydrogenation
 - Report on Aromatic Petrol Production using 7019 L8. 1939
 - Product analyses
14. Vapor phase catalysts
 - 6434, 7846, 8376, 5058
15. Analytical data on all stalls, April and May 1944
16. Finished products
 - Typical analyses of finished petrols
 - Specification for petrol, diesel oil and jet grid
17. Catalysts
 - Pölitz catalysts preparation plant
 - Catalyst compositions and costs

Technical Oil Mission
Indexes - Reels 75 and 76
