

INDEX - MICROFILM - REEL 93
(Orig. Ident. Reel 3G)

BAG 3966

ZWB REPORTS

by F.K.F. Technical School, Stuttgart

<u>CIOS</u> <u>NO.</u>	<u>REF.</u> <u>NO.</u>	<u>TITLE</u>	<u>AUTHORS(S)</u>	<u>DATE</u>
SB1	-	Flying Mechanics of Jet Motors II Interim Report Method of Working of a Jet Motor consisting of a Compressor and a Turbine	Weinig	15.5.43
SB2	-	Widening (the scope) of the F.J.F.S. Quick Method of estimating the TEL content of Fuels	Widmaier	15.8.43
SB3	-	Test on the running behaviour of Electro Plated Silver Bearings in an Engine	Rossenbeck and Stark	16.8.43
SB4	-	Controlling an Aero Engine Blower by a Tap	Weinig	15.10.43
SB5	-	Axial Flow Compressor	Eckert and Weinig	3.4.44
SB6	-	The Economic Limit of High Load of the 2-stroke Engine without utilizing Exhaust Gas	Fezer and Schmitz	11.4.44
SB7	-	Power Increase of Combustion Engines by Swept Volume Sub-Division	v.Dorrer	4.9.44

F.K.F. Technical School, Stuttgart

SC1	274	The 2-stroke - Ball Valve Engine with Uni-Flow Scavenging, Power and Characteristics	Kuhm	6.9.38
SC2	382	Position of the Performance of the Riessler method	Riessler and	18.12.40
SC3	383	Tests on a 1.09 L high load single Cylinder Engine (1st report)	Berndorfer and Gussmann	14.12.40
SC4	392	Investigation of the Performance of self ignition operation in a mixture Compression Engine	Ernst and Weinig	29.3.41
SC5	395	Calculation of a Seven-Stage Axial Compressor	Eckert and Weinig	3.4.41

<u>SCIOS</u> <u>NO.</u>	<u>REPT</u> <u>NO.</u>	<u>TITLE</u>	<u>AUTHOR(S)</u>	<u>DATE</u>
SC6	405	Rapid Starting Tests on a Piston with various protective coatings on the Running Surfaces	Rossenbeck and Platz	12.11.41
SC7	412	Testing protective coatings on Piston running surface in the quick starting test	Rossenbeck and Platz	3.3.42
SC8	423	Engine investigation on the thermal relation of Aero Engine Piston Crowns with various running surface protective coatings	Rossenbeck and Speer	18.5.42
SC9	424	Tests on a 1.09L - high load single-cylinder Engine (2nd report)	Berndorfer and Gussman	10.6.42
SC10	427	Clarification of the Rieseler working method in a single-cylinder test engine	Kamm	14.7.42
SC11	429	Quick starting tests with a BMW 132-Piston with various running face protective coatings	Rossenbeck and Speer	28.8.42
SC12	444	Pressure and Temperature measurement in the lubrication system and in the Main Bearings of a DB 605 Engine	Hampp	22.6.45
SC13	-	Improvement of the Lubricating behavior of Oil by Chemical additives	Glocker	20.1.45

F.K.F. Technical School, Stuttgart

SD1	-	Operating Instructions for the Fuel Test Engine	Gross	?
SD2	-	Apparatus for measuring Ignition Delay	Staiger	30.3.43
SD3	-	Institute Progress Report	(various)	20.6.40
SD4	-	10th Annual Report		1939/40
SD5	-	11th Annual Report		1940/41

Diploma Theses

SE1	-	The starting behaviour of Fuels with the use of various Chemical Ignition Accelerators is to be investigated and evaluated on the FKFS Test Engine	Demmer	
-----	---	--	--------	--

<u>CIOS</u> <u>NO.</u>	<u>REPT</u> <u>NO.</u>	<u>TITLE</u>	<u>AUTHOR(S)</u>	<u>DATE</u>
SE2	-	The influence of the operating conditions on the knock intensity of Fuels is to be investigated by use of various measuring apparatus	Kessler	1943?
SE3		The ignition behaviour of Hydrocarbon Air mixtures in the Diesel Engine and the influence of Ethyl Nitrate	Schutz	
SE4	-	Investigation on the influence of the Chemical pre-reaction on the starting behaviour in Diesel Operation	Gerschler	20.10.43
SE5		Investigation of the Precipitated Deposits in the Lubricating oil formed by running in an Engine		
<u>Engineering Laboratory for Heat Engines and Compressors</u>				
SE6	-	Investigation of Cylindrical Sliding Bearings for High Rotational Speeds	Wewerka, Dollhopf and Stephan	15.8.39
SE7	-	<u>Public Material Testing Installation</u> Wear behaviour of Cromed running surfaces (on Al base) by running against Aluminum Alloy with Oil Lubrication containing added wear material	Brockstedt and Siebel	10.6.41
SE8		The influence of the grain size of the Quartz Dust as wearing material in engine oil on the wear behaviour of different pairs of bearing material	Wellinger and Brockstedt	7.6.44
SE9	-	The influence of the surface pressure and the sliding velocity, as well as the hardness of bearing material, on the wear behaviour with Quartz Dust as wearing material in Engine Oil	Wellinger and Brockstedt	20.2.45

German Automotive Research

By the Laboratory for Lubrication Research
of the Technical College, Dresden

SF1	71	Interim report on comparative test on Bearing Shell materials	Doring	May 1939
SF2	76	Interim report on the running test of a Truck Engine with Synthetic Resin Bonded Crankshaft	Doring	

<u>CIOS</u> <u>NO.</u>	<u>REPT</u> <u>NO.</u>	<u>TITLE</u>	<u>AUTHOR(S)</u>	<u>DATE</u>
SF3	83	Interim Report on new Methods of Evaluating the lubricating ability of Oils and Fats	Pietsch	Apr. 1940
SF4	104/1941	Interim report. Methods of determining the Technical Lubricating ability of Lubricants	Heidebrook	Oct. 1941
SF5		Hydrogen as Motor Fuel	Gehmichen	1942
<hr/> <p>By the Institute for Brown Coal - and Mineral Oil Research of the Technical College BERLIN</p> <hr/>				
SF6	109	Interim report on the production of lubricating Oils from Brown Coal Tar	Marder and Feichtinger	1942
SF7	120	Interim report on the production of lubricating Oils from Brown Coal Tar	Heinze	1944
SF8	92	Interim report on the production of lubricating Oils from Brown Coal Tar	Marder and Mertz	1941
SF9	93	Usability of Ignition Accelerators for Diesel Fuels	Heinze Marder & Veidt	1941
<hr/> <p><u>Research and Official Test Installation for</u> <u>Road Transport</u></p> <hr/>				
SF10	85	Interim Report on Investigations on Dust Filters for Combustion Engines	Schmidt	June, 1940
SF11	78	Public Material Testing Station Interim Report. Testing the effect of Fuel additives and their Combustion products on the Metals used in Engine construction	Schikorr Alex	
<hr/> <p>Department for Industrial Construction BERLIN</p> <hr/> <p>Four-Year's Plan Institute for Road Transport at the Technical College, Berlin</p> <hr/>				
SF12		Interim Report on the Testing of a Fibrous material Oil Cleaner	Schwarz	March, 1944

<u>CIOS</u> <u>NO.</u>	<u>REPT</u> <u>NO.</u>	<u>TITLE</u>	<u>AUTHOR(S)</u>	<u>DATE</u>
		<u>German Automotive Research</u> <u>By F.K.F. of the Technical College, Stuttgart.</u>		
SG1	74	Interim Report. Test on the Engine behaviour of Synthatic Otto Fuels	Auber and Widmaier	12.6.39
SG2	99	Interim Report. Tests on a Carburetter Engine with Self-Ignition		
		By Working Group for questions of Engine Combustion for the Trade Ministry		
SG3	91	Interim Report. Mixture formation and Burning. The position of the research on the sphere of Diesel Engine type working methods	Various	1.10.40
SG4	111	Interim Report. 2nd Meeting of the working group for questions of engine combustion	Various	1942
SG5	118	Interim Report. 3rd Meeting of the working group for questions of engine combustion	Various	1943
SG6	-	Research Plan 1939/40		
		<u>D.V.L. BERLIN</u>		
SH1	-	Instructions for use of the D.V.L. Exhaust Gas tester for combustion engines	Broicher	Aug. '42
SH2	-	Investigation of the running properties of Radial Loaded Segment Bearings with lead bronze and light metal surfaces	Siedenburg	4.11.42
