

REPORT NO.

INDEX - MICROFILM - REEL - 103
(Orig. Ident. AD1(K) 48 - (C - 64) - Part II)

H15	417	Experiments with safety fuel	15.6.40
H16	418	Stroboscope for injection nozzle investigations	26.4.40
H17	419	Test on the performance of Pump 2 in op. 37 of 5.4.40	17.4.40
H18	421	Measurement of the heat conductivity of stones for the internal insulation of high pressure ovens	27.5.40
H19	422	The measurement of cetane numbers down to zero	5.6.40

<u>REPORT NO.</u>			
H20	424	Investigation of light firebricks "Didier Pa 08" as	16.6.40
H21	425	Lubricating oil testing with the BMW - 132 single cylinder engine	25.8.40
H22	426	Ignition delay measurements with the F.K.F.S. apparatus	30.7.40
H23	427	Measuring the heat transfer of pipes with welded and pressed on ribs	16.7.40
H24	428	Investigation of the light firebrick "Anawerk L. O. 9/26/2."	1940
H25	429	Relating between cetane numbers determined with the T.G. test diesel and the H.W.A. engine	21.8.40
H26	430	Investigation of two cement asbestos compounds for high pressure insulation	24.8.40
H28	432	Heat transfer through an increased high pressure pipe	13.9.40
H29	434	Collection of results on the latest investigation on high pressure insulations	12.10.40
H30	435	New apparatus for determining knock intensity	25.10.40
H31	436	Detection of knock vibrations in multi-cylinder engines	31.10.40
H32	437	Classification standard for aviation fuels and aero engines	5.6.40
H33	443	Measurement of performance of the pump from the turbine aggregate two in O.P. 87 of 31.10.40	2.12.40
H34	451	Influence of temperature on the behaviour of aero engines operating according to the "Ring"	3.4.41
H35	459	Measurement of the performance of the pump from the turbine aggregate 1. in Op. 87 from 5.3.41	7.5.41
H36	488	Radiation and temperature distribution in a contact pipe of 250 mm.	29.1.42
H37	492	Results on the correlation of the Oppau method	9.10.43
E. 1	K5M2G 11	Influence of the lead content of the fuel on the construction materials of aero engines	1.8.42
E. 2	M2K30 11	Influence of the lead content on aero engine components	23.10.42
E. 3	M2	Description of Russian Aero engines AM 35 to AM 38	1.8.42
E. 4	O6K3 13	The measurement of piston temperature in an engine whilst running	20.10.42

REPORT NO.

E. 5 G 35	Experiments with the "Four Ball" machine	23.7.43
E. 6 G35 A27	Measurement of friction coefficients with the P.T.R. apparatus	10.7.43
E. 7 G35-2	Sulphur content and lubricating properties of aero engine oils	25.7.43
E. 8 M 11-11	The D.V.L. single cylinder fuel test engine	28.8.43
D. 1. 1	1942 Year book of German Aviation research	15.1.43
D. 2. 3	1942 Year book of German Aviation research	15.3.43
D. 3. 5	1942 Year book of German Aviation research	15.10.42
D. 4. 6	1942 Year book of German Aviation research	1.12.42
D. 5. 7	1942 Year book of German Aviation research	30.12.42
D. 6. 12	Translations of foreign aviation literature	15.12.44
