

REPORT NO.

INDEX - MICROFILM - REEL - 108
(Orig. Ident. AD1(K) 48D - C 69)

V 6 I.G. test engine. Introduction and operating instructions

L 3 VE 6 Power plant protection (cooling, lubrication etc.)

31.10.40

15.5.40

REPORT NO.

| | | |
|-------------|---|-----------|
| L 5 111B17 | Instructions for the testing of component parts and equipment of power plant housings of air-planes | 13.5.40 |
| L 6 11019 | Non-destructive testing of materials in airplane and motor building | 30.11.39 |
| L 7 11C21 | Synthetic materials and their use in aircraft construction | 31.1.41 |
| L 8 11A21 | Piston rings | Oct. 1939 |
| L 9 11A22 | The basic form and working principles of injection pumps and jets for diesel and Otto Aero-engines | 16.2.40 |
| L 10 11A24 | Aero-dynamic jet cooling liquid-cooled aero-motor with radiators | 1.4.40 |
| L 11 111A26 | The design of combustion chambers in Aero-Engines | 12.4.40 |
| L 12 111A27 | Supplement to the construction of exhaust-manifold and exhaust pipes on aero-engines | 3.10.40 |
| L 13 11A28 | Calculations and manufacture of valve springs for aero-engines | 15.5.40 |
| L 14 111A29 | Aero-carburetor | |
| L 15 111A30 | The principles of design and construction of in line aero engines | 15.5.40 |
| L 16 111A31 | The water segregation by fuel filters in aircraft and tank installations | |
| L 17 111A32 | Fuel supply pumps | 15.5.40 |
| C 27 130 | Anti-knock value of benzol in various gasolines and various ignition settings of the engines | 4.10.27 |
| C 32 142 | Tests with synthetic lubricating oil | 1.3.28 |
| G 66 203 | Valve deposit report No. 9. Tests on the substitution of additive A by Kylidine | 5.11.30 |
| C 85 280 | Influence of the lowering of the pour point on diesel oil | 22.2.35 |
| U 1 | Ignition of inflammable gas-air, especially vapour air mixtures, by contact spark | 23.4.44 |
| U 2 | Results of the evaluation of booty-special report No. 33. Fuel and Lubricants | 15.11.44 |
| U 4 | Oppau technical test house. Fifth meeting of the working group for knock measurement | 1943 |
| U 6 | Research work on Pistons by Dr. Ing Erich Koch VDF Stuttgart | 1942 |

REPORT NO.

- U 8.01 Communications on the field work of the Oppau Technical Test Establishment. (Collection of Reports) 18.7.42
- U 9.01 Research report of the fuel department in the government research group May 1941
- U 10 Problems in fuel research and supply and their relationship 12.4.43
21.11.41
- U 11 Research on the problem of fuel and its injection through the injection nozzle 1941
- U 12 The properties of aviation fuels and their testing
- U 14 Lilienthal-Gesellschaft for aviation research. Report on the meeting in Stuttgart on 24 and 25 June 1938. Working group on sound insulation of test engine establishments
- U 15 See above. Report on special meeting in Cottingen on 7-8 December 1937. (Sound proofing)
- U 20 German research installation for aviation. The D.V.L. (Spark plug Thermo-element (Therme couple)
- U 21 German research installation for aviation. Direction for use of the DVL exhaust gas analyzer for internal combustion engines
- U 22 German research installation for aviation. Description and installation of an automatic coolant temperature control shutter for aero-engines
