

REPORT NO.

INDEX - MICROFILM - REEL 109
(Orig. Ident. AD1(K)-48E - C 68)

A 1	442	Application of the "Ring" on the BMW-Cylinder 132 N	1.12.40
A 2	445	Tests on Wear of Injection Nozzles and Pump Pistons with Fuel R300 and Gas Oil	24.1.41
A 3	446	Knocking Properties and Index of Knock Evaluation	3.2.41
A 4	447	Examination of Nozzles with (Mengen) The Quantity Stroboscope	10.3.41
A 5	448	Examination of Lubrication Capacity of Oils in 3 different apparatus (Three copies)	18.2.41
A 8	449	About the Determination of Knock Intensity	27.2.41
A 9	451	Temperature Effects in the Running of Aero-engines according to "Ring" Systems	3.4.41
A 10	452	Modified Test System to Examine Aviation Fuels (Oppau Method) (2 copies)	

REPORT NO.

A 11 453	The Test of Low Temperature Behaviour of Airplane Lubrication Greases (3 Copies)	15.4.41
A 12 454	Investigation of the Temperature, Lead (Vermagerung), and Weak Mixture Sensitivity of an Aromatic and Paraffinic Fuel Mixtures in Supercharged Engine	21.4.41
A 13 455	Testing of Polyglycol Ethers of High Molecular Alcohols as a Lubricant (2 copies)	23.4.41
A 14 460	Important and Optimum R-Mixtures for the (Stoffmengen) "Ring" Operation of the Jumo-Cylinder 211A	1.5.41
A 15 (b) 463	Tests on Ribbed Pipes. 1st Part: Comparison of the Heat Transfer of High Press. Pipes with Welded and Stamped Ribs	14.7.41
A 16 464	Reference Fuels and Accuracy of Measurement in the Determination of the Octane Number	23.6.41
A 17 466	Driving Tests with TZ100 in Diesel Trucks	23.6.41
A 19 468	Comparative Tests of Synthetic Automobile Oils	10.8.41
A 20 469	Tests of Ribbed Pipes. 2nd Part: Measurement of Heat Transfer on High Pressure Pipes with Spiral Wound Welded Ribs	1.8.41
A 21 471	Comparative Tests of Aero-Engine Lubricants	20.8.41
A 22 472	Testing of the Lubrication Properties of R200 and R300 (2 copies)	16.8.41
A 23 474	A contribution on the Testing of the Knock Resistance of Aviation Fuels in a Small Engine (Single Cylinder?)	25.8.41
A 24 475	Indication of Knock Vibrations by means of Body Ring "Korperschall" and its Electrical Remote Transmission (3 copies)	1.9.41
A 25 476	Comparative Tests with I.G.-Test Diesels 1941	25.8.41
A 26 D 477	Comparative Tests with Gear Oils (4 copies)	10.10.41
A 27 480	Semi-annual Comparative Tests with Knock-Engines (V.V.95)-October 1941	1.11.41
A 28 481	Measurement of the External Heat Transfer of a High Pressure Pipe with Displacers (?) (Verdrängern), when Incorporated in a Tube-Bundle and When Surrounded by Fire-bricks	3.11.41
A 30 483	About the Starting of Diesel Engines by Aid of Head Tablets (Heiztabletten)	25.11.41
A 31 D 486	Experiments with the Four Ball Machine (2 copies)	12.12.41

REPORT NO.

A 32 D 487	Tests of Lubricants in the I.G. Cold Chamber (2 copies)	12.12.41
A 32A 490	The Evaluation of Octane Number Determinations According to the Oppau Method	17.2.42
A 33 491	Results of Comparative Measurements Between the Oppau and the DVL Method (Copies 2)	24.10.42
A 34 492	Results of Comparative Measurements According to the Oppau Method	9.10.43
A 35 493	Experiments Using the "Ring" Method Under Various Compression Ratios	13.2.42
A 36 D 495	Technical Testing of Lubricating Oils (Lecture Given on the Occasion of the Inorganic Colloquium (28 January 1942) (2 copies)	28.1.42
A 38 500	The Ring Method	1.9.42
A 39 501	The Peak Pressure by the Ring Method	25.5.42
A 40 502	On an Electrical Instrument for the Acoustical or Optical Detection of Incipient Detonation	4.6.42
A 41 D 504	The Use of the I.G. Test Engines for Lubricating Oil Investigations (2 copies)	1.7.42
A 43 D 505	Experience with Lubricant-Test Rungs for Ring Stocking Behaviour	1.7.42
A 44 506	Correlation on Knock Engines with Low Reference Fuel, benzol and Z (V.V.98)	13.7.42
A 45 507	Half-yearly Correlation Tests on Knock Engines (V.V.100)-April 1942	19.6.42
A 46 508	Investigations on Ribbed Pipes. 3rd Part: High Pressure Pipes with Rectangular Welded Ribs. Installation of Displacers (Verdrängern)	3.7.42
A 48 510	Investigations on Ribbed Pipes. 4th Part: Measurement of Heat Transfer in Spiral Ribbed Pipes in Group Installations	1.8.42
A 49 511	Engine and Fuels	15.7.42
A 50 D 512	Instrument for Measurement of the Lubrication Ability at Limit Friction (2 copies)	20.8.42
A 51 D 513	The Behaviour of Starting Fuel for Diesel Engines Through Suction Injection (2 copies)	24.8.42
A 52 514	Porcelain Lightstone "K" and "T" of the Krister Porcelain Manfr. Waldenburg (Schles)	11.9.42

REPORT NO.

A 53	515	About an Apparatus for the Determination of Flame Spread in Combustion Machines (Engines)	25.9.42
A 54	516	Experiments on the Photocell Deflection Instrument by Dr. Neir	20.10.42
A 56 D	518	Test of Lubricants by Wear and Tear Measuring Method (2 copies)	5.1.43
A 58	523	An instrument for the Measurement of Movement (Vibration) According to the Carrier Frequency Method (2 copies)	20.11.42
A 59	524	Experiments on the Knock Properties of Alkyl-Benzols in BMW 132 - Supercharged Motor (Engine)	21.11.42
A 60	525	The Behaviour of Glysantin-Water-Mixtures (Lectures, held at the Winter-Talks on 2.10. and 26/27.11.1942)	18.3.43
A 63	528	Examination of Various Materials for Suitability as Cooling Material for Liquid Cooled Engines	4.1.43
A 64	531	Thermodynamic Examination on a High Pressure Installation for the Catalytic Polymerization of Olefins Containing Liquid Cases	15.3.43
A 69	536	The development of an Incandescent Fuel with Long Duration Low Heat Output	1.3.43
A 70 D	537	The Testing of Lubricants in Small Apparatus with regard to Lubrication Properties (2 copies)	8.3.43
A 73	540	Capacity Measurements of Maulwurf Pumps Under Working Conditions (2 copies)	14.5.43
A 74	541	Application of an Ante-Chamber in the "Ring" System	15.5.43
A 75 D	542	An Instrument for the Determination of Metal Abrasion During (By?) Lubrication (2 copies)	21.6.43
A 76	543	Examination on Ribbed Tubing. 5th part: Measurement of the Heat Transfer on a Piece of U Shaped Pipe After Two Years of Operation. - Heat Conducting Calculation for the Outer Shell. - Influence of the Ribbing on the Wall Temperature Measurement. (4 copies)	21.6.43
A 77	544	Ether High Cetane Number	15.7.43
A 78 & 79	545	Experiments to Determine the Critical Condition of Multi-Fuel Mixture (3 copies)	1.7.43
A 81	547	About the Kybol Value and its Determination	1.7.43
A 82 D	548	Lubricant Test by wear Measurement (2 copies)	29.7.43
A 83	549	About an Inductive "Standmesser" (Impulse Meter?)	20.9.43

REPORT NO.

A 89 557	Methanol as Engine Fuel	3.1.44
A 90 558	Semi-Annual Correlation Tests of Knock Engines (1) 11th Series of Tests - May 1943 Technischer Prüfstand Oppau (2) Vapour pressure determination in the Reid Bomb Treibstoff werk Rheinpreussen	1.12.43
A 91 D 562	The Falax Oil Tester in Comparison with the 4 Ball Machine and the Almen-Wieland Machine (2 copies)	1.2.44
A 95 D 567	Technical Lubrication Investigation of Eleven Aircraft Engine Oils (3 copies)	20.7.44
A 97 D 572	Investigation on the Pumpability of Engine Oils (2 copies)	20.7.44
A 99 D 574	Observations on Abrasion and Friction Experiments (5 copies)	5.8.44
A 104 489	The Determination of the Octane Number by the Oppau Method	22.1.42
