

T. O. M. 152

INDEX MICROFILM REEL 152
(ORIGINAL DESIGNATION C-98)
PB 13093

GENERAL SUBJECT PAGE

PART A

THE LOW-TEMPERATURE CARBONIZATION OF COAL AND THE PROCESSING,
USE AND DISTRIBUTION OF LOW-TEMPERATURE TAR AND PRODUCTS
DERIVED THEREFROM. DOCUMENTS AND DRAWINGS.

PART B

PROCESSES AND EQUIPMENT FOR THE RECOVERY OF PHENOLS FROM
INDUSTRIAL WASTE WATERS. DOCUMENTS AND DRAWINGS.

PART C

THE "BÜTTNER" DRYER. DESCRIPTIVE PAMPHLETS AND DRAWINGS.

PART D

THE "PINTSCH-HILLEBRAND" WATER GAS GENERATOR AND THE PRO-
DUCTION OF SYNTHESIS GAS FROM PEAT. DOCUMENTS AND DRAWINGS.

PART E

COPY OF A DISSERTATION BY ING. F. A. CROY ENTITLED, "CON-
CERNING A PROCESS FOR THE RECOVERY OF PYROCATECHOL FROM
BROWN COAL TAR, THE USE OF THE SAME ON A LARGE SCALE AND
THE PURIFICATION OF THE TECHNICAL PRODUCT".

Source of Documents: Manufacturers and users of dephenolizing
equipment in Germany.

Collected by: E. O. Rhodes, Miscellaneous Chemicals
Sub-Committee, JIOA, between September 15,
1945 and January 15, 1946.

Filmed by: JIOA

Date: 26 January 1946

PART A

- I. Books and documents dealing with low temperature carbonization of coal. Received from Dr. Adolf Thau, Didier Werke, Berlin.
1. The state of low temperature carbonization in Germany before the conclusion of the war.
By Adolf Thau. 1-30
 2. Documents to accompany article by Adolf Thau entitled "The State of Low Temperature Carbonization in Germany before the Conclusion of the War". Diagrams and tables relating to low temperature carbonization of coal. Yearly report of the "Brennkrafttechnische Gesellschaft E.V." 1940-41. 31-201
 3. Kohlen Schwelung Zugleich Ergänzung zu "Die Schwelung von Braun- und Steinkohle" von Adolf Thau.
The low temperature carbonization of coal, supplement to "The Low Temperature Carbonization of Brown and Bituminous Coal". 202-418
 4. 70 Jahre Didier-Offenbau Mitteltemperaturverkokung.
70 years of Didier oven construction middle temperature coking. 419-424
 5. Amt für Technik der N.S.D.A.P. Bericht über die Tagung "Heimische Treibstoffe" Nürnberg, Oktober 1936.
Report on the meeting "Domestic Motor Fuels", Nürnberg, October 1936. 425-482
- II. Documents from Brennstoff Technik, Essen.
1. Letter to Mr. E. Rhodes, description, drawings, diagrams and photographs relating to "Brennstoff-Technik" process for carbonizing coal at low temperatures. 483-506
- III. Documents concerning low temperature carbonization, low temperature tar and pressure gasification of solid fuels with oxygen. From Lurgi, Frankfurt am Main.

1. "Recent Developments of Low Temperature Carbonization of Solid Fuel in Germany" by Dr. F. A. Getken. Reprinted from Engineering Progress October 1936. 507-513
 2. Krupp Lurgi Kammer-Schwelanlagen für Steinkohle.
Krupp Lurgi chamber plants for low temperature carbonization of bituminous coal. 514-524
 3. Lurgi Carbonizers. 525-540
 4. Die Druckvergasung fester Brennstoffe mit Sauerstoff. Von Dr. Ing. Friedrich Danulat, Frankfurt a.M.
The pressure gasification of solid fuels with oxygen. 541-550
 5. Statistics for 1943. Production and treatment of Low Temperature Tar. 551-552
- IV. Reports and diagrams received from H. Koppers, Essen.
1. Die Schwelung der Steinkohle nach Koppers.
The low temperature carbonization of bituminous coal by the Koppers method. 553-564
- V. Documents obtained from Messrs. Friedrich Krupp A.G., Essen, Ruhr, Germany.
1. Lay-out drawings and flow diagram of low temperature carbonization and Fischer-Tropsch plants of Friedr. Krupp A.G.
 - a. Flow sheet for Krupp Lurgi low temperature carbonization plant - Wanne Eickel. 565
 - b. Flow sheet for Krupp Fischer-Tropsch plant - Wanne Eickel 566
 - c. Krupp-Treibstoff Werk Gm.b.H. Lageplan.
Krupp motor fuel plant lay-out. 567
 2. Reprints of articles concerning low temperature carbonization and low temperature tar, received from Fried. Krupp A.G., Essen - Ruhr.
 - a. "Steinkohlenschwelteer" from "Kohlenschwelung" by Adolf Thau. 568-574

- b. Ueber Betriebs Erfahrungen mit der Steinkohlen-Schweilanlage Bauart "Krupp-Lurgi" auf Schachtanlage "Amalie" der Fried. Krupp Aktiengesellschaft, Bergwerke Essen. von K. Brüggemann.
Concerning operating experience with the Krupp-Lurgi plant for the low temperature carbonization of bituminous coal at the "Amalie" shaft plant of Fried. Krupp. Akt. Mines Essen. 575-583
- c. Wassergaserzeugung aus Steinkohlen-Schwelkoks. Von Dipl.-Ing. Wilke, Oberhausen-Holten.
Watergas production from coke produced by low temperature carbonization of bituminous coals. By Dipl.-Ing. Wilke, Oberhausen-Holten. 584-589
- d. Die physikalische Prüfung von Schwel- und Hoch Temperaturkoks in einer 5-kg-Trommel. Von E. Combes und W. Surmund.
The physical testing of coke produced by low temperature carbonization and high temperature carbonization. By E. Combes and W. Surmund. 590-593
- e. Die Bestimmung der Pumpfähigkeit von Heizölen. Von H. R. Asbach und J. Tegthoff.
The determination of the pumpability of heating oils. By H. R. Asbach and J. Tegthoff. 594-598
- f. Mischbarkeit von Heizölen von Dr. W. Demann, Essen.
Miscibility of heating oils by Dr. W. Demann, Essen. 599-606
- g. Laboratoriumsapparatur für Steinkohlenschwelung nach dem Heizflächenverfahren von K. Scheeben, Essen.
Laboratory apparatus for low temperature carbonization according to the "heating surface" process by K. Scheeben, Essen. 607-612
- h. Die bisherigen Arbeiten der Vereinigung für Steinkohlenschwelung (V.f.S.) von Dir. Dr. H. Weittenhiller, Dortmund.
The previous work of the "Vereinigung für Steinkohlenschwelung" (V.f.S.) by Dir. Dr. H. Weittenhiller, Dortmund. 613-622

- i. Ueber die Schwelung der Steinkohle im Verbindung mit der Fischer-Tropsch-Ruhrchemie-Synthese von F. Müller.
Concerning the low temperature carbonization of bituminous coal in connection with the Fischer-Tropsch-Ruhrchemie-synthesis by F. Müller. 623-625
- j. Viskosimetrisches Verfahren zur Bestimmung der Mischbarkeit von Kohlenwasserstoffgemischen, insbesondere von Heizölen von Dr. Demann und H. R. Lsbach.
Viscosimetric methods for determination of the miscibility of mixtures of hydrocarbons, especially of heating oils. 626-635
- VI. Documents obtained from Messrs. Carl Still, Recklinghausen, Germany, concerning a tar plant for Messrs. Aktiengesellschaft Sächsische Werke in Espenhain, and a plant for processing hydrogenation residue for the Politz Hydrogenation Works.
1. Letter from Messrs. Carl Still, Recklinghausen, to Mr. E. C. Rhodes, referring to descriptions and drawings relating to the processing of tar. 636-637
- (For items 2 through 11, (except No. 7), referred to in the letter, see Reel No. C-frames 435-460 and for items 12 and 13 see Reel No. C-frames.
2. Documents concerning a tar plant built by Messrs. Carl Still of Recklinghausen, Germany, for Messrs. Aktiengesellschaft Sächsische Werke at Espenhain.
- a. Beschreibung einer Teerverarbeitungsanlage für die Aktiengesellschaft Sächsische Werke in Espenhain.
Description of a tar processing plant for the A. G. Sächsische Werke in Espenhain. 638-641
- b. Espenhain low temperature tar plant built by Carl Still for Aktiengesellschaft Sächsische Werke Dresden. 642
- c. Beschreibung einer Rohteer-Schlenderanlage.
Description of a crude tar centrifugal plant. 643-645

- d. Beschreibung einer Teerdestillation.
Description of a tar distillation-
plant. 646-649
- e. Beschreibung einer Blasenredestillation
für paraffinhaltige Öle.
Description of a redistilling still
for oils containing paraffin. 650-651
- f. Description of still for production of
hard pitch with inert gas.
(See Incl. No. C- Frame Nos. 456-458,
for description and drawings).
- g. Beschreibung einer Pechkokererei.
Description of a pitch coke plant. 652-656
3. Beschreibung einer Anlage zur Zerlegung von
8 t/h eines Hydrierabschlammes für die
Hydrierwerke Pölitze.
Description of a plant for processing
8 tons per hour of a hydrogenation resi-
due for the Pölitze Hydrogenation Works. 657-658
- VII. 1. Document received from Dr. Lameck, Essen,
Germany, concerning: The treatment of tars made
by low temperature according to the process of
BYK-Guldenwerke Chemische Fabrik A.G., Berlin-
Cranienburg. 658-662
- VIII. Documents from Gesellschaft Für Teerverwertung,
Duisberg, Weiderich.
1. Beiträge zur Kenntnis des Steinkohlenschwarteöls .
Von Dr. O. Kruber. Sonderdruck aus "Öel und
Kohle vereinigt mit Petroleum", Heft 45, Seite
770 (1939).
Contributions to the knowledge of tar oils
produced by low temperature carbonization of
bituminous coal by Dr. O. Kruber. Special
print from "Öel und Kohle vereinigt mit
Petroleum", volume 45, page 770 (1939). 663-667

2. —Versuchsbericht über eine diskontinuierliche Destillation von Schwelteeer aus Waldschacht - Kohle in der Versuchsanlage der Gesellschaft für Teerverwertung m.b.H. —Duisberg-Meiderich.
Test report of a discontinuous distillation of low temperature carbonization tar from Waldschacht coal in the test plant of the Ges. für Teerverwertung m.b.H. Duisberg-Meiderich. 668-672
- IX. Documents and drawings from I.G. Farbenindustrie, Leuna Plant, Merseburg.
1. Beschreibung und Plan der Kohlehydrierung.
Description and diagram of the coal hydrogenation. 672A-673
2. Sumpffphase-Destillation Me 888. Allgemeine Beschreibung der Anlage.
Liquid phase distillation Me 888. General description of the plant with apparatus flow diagram (drawing No. M6060-1) and drawing No. 1104b(4), showing locations of thermocouples on pipe heater. 674-677
3. Description of the phenol installations with drawings: M 5762-4 Phenolextraction, building Me 953 - M 6138-1 Phenol oil distillation, building Me 950 - End 3146-2 Flow diagram of springing and carbonizing equipment. 678-684
4. Description of phenol plant "South" with drawings:
M-10231 "d"-2 Phenol refining, building Me 992 -
Sk-101145-4 Phenol fractination, building Me 983
Production scheme Jan./May, 1944
M-6948-16 Phenol fractination, building Me 983
Flow diagram
M 3924 "d"-1 Phenol fractination, building Me 983
Equipment arrangement
M 6947-16 Pyrocatechol plant, building Me 994
685-697
5. —Description of the manufacture and distillation of Cyclohexanol, with drawing M 6881-16, building Me 978 and Me 975. 698-706
6. Description of the manufacture of Cyclohexanone with flow diagram M 6882-16, building Me 975. 707-710

7. Description of the manufacture of Oxime and Luran (Caprolactam) with flow diagram M 5626^a-8. 711-713
8. Description of the adipic acid manufacture with flow diagram SK 31745, building No 205. 714-716
9. The syntheses stages of Igamides A, B and U. 717
- X. 1. Über die oxydative Ringöffnung von o-Dioxybenzolen zu Mukonsäurederivaten. Dr. Günther Spengler, Munich.
The oxidative ring fission of the o-dioxybenzenes to muconic acid derivatives. 718-738
- XI. 1. Die Zerlegung von Schwelteeren aus Braunkohle und Ölschiefer mit selektiven Lösungsmitteln von Prof. Dr. Ing. Ernst Terres.
The extraction of low temperature tar from brown coal and oil shales with selective solvents by Prof. Dr. Ing. Ernst Terres. Reprint received from Edelmann-Gesellschaft, Berlin. 739-754
- XII. Documents obtained from Deutsche Erdöl - Aktiengesellschaft, Berlin.
1. Verarbeitung in der Raffinerie Rositz in den Jahren 1942/43.
Production at the Rositz Refinery in 1942-1943. 755
2. Verarbeitung von Schwelteer auf Paraffin.
Production of paraffin from low-temperature tar with drawing SK 327 and description thereof. 756-759
3. Verarbeitungsschema von Schwelteer auf Treibstoffe (durch Spaltung).
Procedure for making motor fuel from low temperature tar (by cracking). 760-762
4. Verarbeitung des Waschteers.
The processing of the wash oil residues ("wash tar"). 763-764

- | | | |
|-------|--|---------|
| XIII. | 1. Document and drawing from Schwelwerk Offleben (distillation plant Offleben) of Braunschweigische Kohlen Bergwerke, Helmstadt. | 765-773 |
| XIV. | Documents concerning Schwelerei Brück, obtained from Hermann Göring Werke, Schwarzenfeld near Nürnberg. | |
| | 1. Aufbau und Arbeitsweise der Lurgi-Spülgas-Schwelanlage für Rohbraunkohle in Brück.
Construction and production methods of the Lurgi flushing gas plant for low-temperature carbonization of crude brown coal. | 774-785 |
| | 2. Elektrische Standmessung - Ausführung D.
Electrical level indicator - Model D. | 786-794 |
| | 3. Druckverlust in Rohrleitungen.
Pressure drop in pipe systems. | 795-805 |
| | 4. Lurgi Spülgas-Schwelanlagen.
Bulletin of the "Lurgi Spülgas" low-temperature carbonization plant. | 806-821 |
| | 5. Flow diagram for the low-temperature carbonization plant. | 822 |
| | 6. CO ₂ -Waschanlage.
CO ₂ scrubbing plant. | 823-864 |
| | 7. Klardampf-Karbonisier-anlage Entwässerungs und Blasendestillation - Bau 342-344.
Steam-stripping, springing, dehydration and distillation plant (for phenols).
Building 342-344. | 865-880 |
| | 8. CO - Reinigung. Brück.
CO removal (from crude hydrogen). | 881-887 |
| | 9. Winkler - Anlage. Brück. Bau 55 (Generatoren), Bau 58 (Desintegratoren) u. Bau 66 (Gebläse).
Winkler plant - Brück. Building 55 (generators), building 58 (centrifugal dust removers) and building 66 (blowers). | 888-900 |
| | 10. Waschöl- und Mittelöldestillation. Brück.
Wash oil and middle oil distillation. | 901-920 |
| | 11. Steam flow diagram. | 921 |

- | | | |
|-----|---|---------|
| 12. | Condensor water flow diagram | 922 |
| 13. | Druckkonvertierung.
Pressure converters | 923-936 |
| 14. | Plant flow diagram. | |
| 15. | Turbinentrockner - "Büttner".
Turbine dryer - "Büttner". | 938-957 |
| 16. | Der Turbinentrockner in der Braunkohlen-
aufbereitung von Dr. Ing. K. Fritsche,
München.
The turbine dryer in the brown coal
production. | 958-961 |
| 17. | Büttner Turbinen-Trockner - seine Entwicklung.
Büttner turbine dryer - its development. | 962-969 |
| 18. | Die Schwelung von festen Brennstoffen und ihre
Bedeutung für die Beschaffung von flüssigen
Treib- und Brennstoffen.
The low-temperature carbonization of
solid fuels and their importance for
the obtaining of liquid fuels. | 970-979 |

PART B

- I. Documents and drawings pertaining to the removal of phenols from waste waters by various systems used at coke plants, hydrogenation plants and brown coal low-temperature carbonization plants.
- Statement and three drawings concerning dephenolizing of waste waters received from H. Koppers, Essen: Entphenolung - 27.11.1945 - Dephenolizing. Drawings Nos. K 157 104, B 121748IIPh, and B 130688Ph.V 629.
- 980-984
2. Beschreibung zum Schema einer Entphenolungsanlage nach Blatt V 54/34 mit stehendem Rührwerks-Wascher (System Still).
Description of the plan for a dephenolizing plant, with vertical agitator-washer, according to drawing V 54/34 ("Still" system).
- 985-988

3. Beschreibung einer Entphenolungsanlage mit Umpumpsystem Still - Zeichnung: Lab. S 833.
Description of a dephenolizing plant with the "Still" recycling system. 989-991
4. Entphenolungs-Anlage.
Dephenolizing plant. I.G. Farbenindustrie A.G., Merseburg-Leuna. Tricresylphosphate system 992
5. Gegenwärtiger Stand der Entphenolung von Abwässern aus Kohleveredlungsanlagen von Dr. Ing. W. Herbert, Frankfurt a.M. Sonderdruck aus "Oel und Kohle" 38, Jahrgang 1942 Heft 19, Seite 525/31.
Present position of the dephenolizing of waste waters from coal processing plants.. Reprint from "Oil and Coal" 38, 1942, Vol. 19 pages 525/31. 993-1000
6. Die Entphenolung von Industrieabwässern und -ölen nach dem Phenosolvan-Verfahren von Dr. Alfred Dierichs, Leverkusen. Sonderdruck aus der "Chemischen-Zeitung", 1942 Jahrgang 66, No. 22/28, S. 288.
The dephenolizing of industrial waste waters and oils by the Phenosolvan process by Dr. Alfred Dierichs, Leverkusen. Reprint received from Dr. Dierichs at I.G. Farbenindustrie Plant Schkopau. 1001-1004
7. Entphenolung von Schwelwässern und Phenolge-
winnung bei der Aktiengesellschaft Sächsische Werke von Dr. Ing. H. Just, Dresden. Sonderdruck aus "Braunkohle" 1941, Heft 19, S. 245-249 und Heft 20, S. 259-263.
Dephenolizing of low-temperature coke plant waters and recovery of phenol at the Akt. Sächsische Werke by Dr. Ing. H. Just, Dresden. Reprint from "Braunkohle" 1941, Vol. 19, pages 245-249, and Vol. 20 pages 259-263. 1005-1013

8. Phenosolvan process. Document from
Dr. Lameck. 1014

II. Documents from Emschergenossenschaft, Essen.

1. Zehn Jahre Phenolgewinnung aus dem Gaswasser der Kokereien im Rheinisch-Westfälischen Industriegebiet - Essen 1939 - von Regierungsbaumeister a.D.H. Wiegmann, Essen.
Ten years of phenol-recovery from the coke plant gas liquors in the Rhine-Westphalia industrial area. Reprint received from Dr. Wiegmann, Emschergenossenschaft, Essen. 1015-1022
2. The Emschergenossenschaft. 1023-1035
3. Emschergenossenschaft und Lippeverband in den Jahren 1925 bis 1930.
"Emschergenossenschaft" and "Lippeverband" in the years 1925 until 1930. 1036-1158

PART C

- I. Catalogs and drawings for Büttner Dryer, Büttner Werke A.G., Uerdingen, collected by Solid Fuels Team.
1. Kohle-Trocknung und -Kühlung.
Coal drying and cooling (booklet). 1159-1199
2. Der Turbinen Trockner - "Büttner".
The turbine dryer (pamphlet). 1200-1219
3. Farben - Pasten - Schlamm jeder Konsistenz.
Colors - Pastes - Sludges of every consistency. 1220-1227
4. Büttner-Werke - Drawing 81868 - Anordnung der U.B. Anlage der Grube Elisabeth.
Lay-out of the U.B. Plant of mine "Elisabeth". 1228
5. Aufstellungsplan des Büttner-Vert.Turb.Trockners für Feinkohle - Drawing OTu 85518.
Cross sectional view of Büttner vert. turb. dryers for fine coal. 1229

6. ~~Aufstellungsplan einer Lignit-Trockenanlage mit Büttner - Vertical - Turbinentrocknern -~~
Drawing OTu 88860.

Cross sectional view of a lignite drying installation with Büttner - vertical turbine dryers.

1230

PART D

- I. Documents from Messrs. Julius Pintasch-Berlin, concerning: a. The "Pintasch-Hillebrand Process" and b. Synthetic gas from peat.

1. Letter to FILT, Berlin, November 14, 1945. 1231-1232

2. Die kontinuierliche Wassergaserzeugung nach dem Umwälzverfahren mit besonderer Berücksichtigung des Pintasch-Hillebrand-Generators von Friedrich Domann, Berlin.

The continuous water gas production according to the re-cycling process with special consideration to the Pintasch-Hillebrand generators by Friedrich Domann, Berlin.

1233-1278

3. Drawings for "Pintasch-Hillebrand" plant:

BGH 0250 Schnitt durch die PH Wg-Anlage.
Cross-section of the PH Wg-plant.

1279

BGH 0358 P.H. Wassergas-Anlage.
P.H. Water gas plant.

1280

BGH 0533 (Title undiscernable).

1281

BGH 205 Elektromotoren in Bau 1 und Bau 7.

Electro motors in building 1 and building 7.

1282

BGH 0385 Generator und Regenerator (Längsschnitt).

Generator and regenerator (elevation view).

1283

- | | | |
|----------|--|-----------|
| BGH 0590 | Synthesegaserzeugung aus Torf.
Giebelansicht der Anlage.
Synthesis gas production from
peat. View of plant. | 1284 |
| BGH 0386 | Generator und Regenerator (Grundriss);
Generator and regenerator (plan
view). | 1285 |
| BGH 0589 | Synthesegaserzeugung aus Torf.-
Lageplan.
Synthesis gas production from
peat. Lay-out. | 1286 |
| BGH 0418 | Schem. der Pintsch-Hillebrand
Wassergasanlage,
Diagram of the Pintsch-Hillebrand
water gas plant. | 1287 |
| BGH 0630 | Torfschwelanlage mit Couperbeheizung.
Plant for the low-temperature
carbonization of peat with
Couper heating system. | 1288 |
| b. 1. | Synthesegas aus Torf von Prof. Dr. Gustav
Kuppeler, Hannover.
Synthetic gas from peat by Prof.
Dr. Gustav Kuppeler, Hannover. | 1289-1307 |

PART E

- | | | |
|-------|---|-----------|
| I. 1. | Copy of a Dissertation by Ing. F. A. Croy
entitled "Ueber ein Verfahren zur Gewinnung
von Brenzcatechin aus Braunkohlenteeren, die
Verwertung desselben im Grossbetriebe und die
Reinigung des technischen Produktes."
"Concerning a process for the recovery of
Pyrocatechol from brown coal tar, the use
of the same on a large scale and the puri-
fication of the technical product," | 1308-1369 |
|-------|---|-----------|
