INDEX - MICROFILM REEL 184  
(Original designation Navy 5883-1)

<u>TITLE</u>	
Methods and problems of oil shale carbonization.	1-20
Oil-shale occurrences abroad and in Germany.	21-31
Low temperature carbonization of oil shale using electric current.	32-139
Proposal for low temperature carbonization of oil shale.	140-150
Underground carbonization of oil shale.	151-161
Borchert process Test No. 2.	162-167

T.O.M. Reel 184 - Cont'd.

	<u>FRAME NOS.</u>
Proposal of Professor Borchert for low temperature carbonization of oil shale.	168-179
Oil shale carbonization in France - Inspection of Autun and St. Hilaire.	180-191
Sweden, Bergh process - Description of two commercial plants.	192-210
Sweden, Bergh process - Composition of the carbonization gases.	211-217
Oil shale deposits in the Lika, Yugoslavia.	218-230
Production of ichthyol from shale oil.	231-232
<u>Kohle Oil Union - Schorzingen:</u>	
Weekly reports	233-412
Monthly reports	413-470
Reports of meetings of board of directors	471-496
Patent application concerning oil shale carbonization utilizing a traveling grate	497-501
Short description of the experiments to be carried out in 1944	502-504
Objectives of the experiments	505-510
Correspondence of Mr. Hubner	511-545
Design of an underground carbonization plant with a capacity of 10,000 CEM of gas (480 tons oil shale) per day	546-550
Design of a pilot plant utilizing an exhaust fan of a capacity of 1,000 CEM per hour	551-552
Report of conferences concerning preparations for the first experiment to be carried out at Holzheim (horizontal and vertical carbonization method)	553-558
Carbonization of oil shale utilizing a beehive kiln (first proposal of Dr. Sennewald)	559-565
Patent applications concerning underground carbonization	566-578
Description of the Schorzingen plant, <u>underground carbonization</u>	579-591
Properties of shale oil produced by underground carbonization	592-605
Calculation of daily oil production utilizing an exhaust fan with a capacity of 9,000 CMB per hour	606-609
Unimportant correspondence	610-613
List of persons - organization of the company	614-616

T.O.M. Reels 184

Reel 184

FRAME NOS.

Kohle Oil Union - Schorzingen - Cont'd.

Correspondence concerning the contract between Kohle Oil and the Navy Department	617-666
Enlargement of the Schorzingen plant for an oil produc- tion of 40.5 tons per day	667-679
First tests on underground carbonization of oil shale	680-703
Short reports of carbonization tests: 1,5,6,7 & 9	704-728
Charts of various underground carbonization experiments	729-736
Oil content of Wurttemberg oil shale depending on the height of the shale bed	737-744
Oil content in various heights of the shale bed	745-771
Miscellaneous	772-791
