

INDEX - MICROFILM REEL 185
 (Original designation Navy 5883-2)

Portland Cement Works

Holzheim plant - Thyssen carbonization process	792-812
Patents concerning the production of ichthyol from oils	813-824
Miscellaneous correspondence	825-832
Tetens process	833-882
Schweitzer process	883-916
Separation of oil from water utilizing a centrifuge	917-922
Correspondence with a tar distillation company concerning properties of shale oil	923-926
Tetens carbonization process for oil shale	927-940
Correspondence concerning oil shale carbonization	941-953
Dotternhausen plant	954-967
Sulphur extraction from oil shale gas	968-979
Oil shale carbonization in Manchuria	980-983
Miscellaneous	984-991
Oil shale carbonization using the Otto process	992-1048
Experiment to burn cement from oil shale utilizing the Krupp-Lurgi process at Rheinhausen (pilot plant)	1049-1054
Direction for testing diesel oils	1055-1061
Reports on oil shale carbonization at the Otto pilot plant	1062-1083
Correspondence concerning an electrical heated furnace for the laboratory	1084-1093
Laboratory tests to produce diesel oil from shale oil	1094-1101
Production of hydrocarbons high in sulphur content for pharmaceutical purposes	1102-1172
Patent and patent application: "Cement from oil shale"	1173-1223
Correspondence concerning gasoline and sulphur extraction from shale gas	1224-1233
Correspondence concerning utilization of shale oil for diesel engines	1234-1237
Patent application: "Cement from oil shale"	1238-1268

Patent application: "Cement from oil shale"	1269-1287
Remarks concerning oil shale carbonization in Manchuria	1288-1293
Carbonization of French, Estonian, and Spanish shales	1294-1306
Correspondence concerning analytical investigation of shale oil	1307-1315
Patent application: "Gypsum - cement"	1316-1357
Molten aluminum retort	1358-1364
Molten aluminum retort	1365-1371
Molten aluminum retort	1372-1393
Patent application concerning dehydration and low temperature carbonization of peat	1394-1402
Electrical carbonization of oil shale by Sarapuu	1403-1417
Molten aluminum retort	1418-1425
Oil shale metal bath carbonization	1426-1460
Use of shale oil as fuel for diesel engines	1461-1471
Literature concerning production of ichthyol from oil sha	1472-1483
Miscellaneous technology from technical journals, P.C. Co.	1484-1503
Distillation tests of shale oil	1504-1515
Flow sheet of the hydrogenation process of lignite tar	1516-1518
Offers for a complete oil shale carbonization plant utilizing the Otto process	1519-1584
Patent applications	1585-1627
Miscellaneous correspondence	1628-1729
Patent application: "Production of hydrocarbons high in sulphur content for pharmaceutical purposes"	1730-1733
Correspondence with Patent Agent	1734-1738
Routine Laboratory reports	1739-1924
