

T.O.M. Reel 204
INDEX - MICROFILM REEL 204
(Original designation LF - 127).

GENERAL SUBJECT

DOCUMENTS AND TABLES OF I. G. FARBEN-
INDUSTRIE, A. G., DEPARTMENT
"HOCHDRUCKVERSUCHE" (HIGH PRESSURE
EXPERIMENTS). DEALING WITH MISCEL-
LANEOUS SUBJECTS IN COAL HYDROGENATION.
1938 - 1943.

Source of Documents: Griesheim Central I. G.
Library

Folder Nos.: S9/I-B-2
S28/VI-C-5
S31/IX-D-13
S28/V-B-11
S28/III-B-8

S30/VII-D-1
S32/III-D-10

Filed by: J I O A

Date: 27 February 1946.

(Item)

FRAME NOS.

- | | | |
|---|---|---------|
| 1 | A quick and exact method of determining lead content in liquid fuels. | 1 - 6 |
| 2 | Determination of aromatics. | 7 - 11 |
| 3 | Determination of phenols. | 12 - 14 |
| 4 | Directions for the operation and superintendence of alkacid washing plants. | 15 - 38 |
| 5 | Reports on experiments with tip-filters and Zeitzer TTH- lubricating oil residue. | 39 - 53 |
| 6 | Deparaffination experiments with TTH lubricating oil residue in Leuna. | 54 - 57 |
| 7 | Coal carbonization. | 58 - 62 |

T.O.M. Reel 204

(Item)		FRAME NOS.
8	On the present stage of progress in coal distillation and further plans for development of GB chemistry.	63 - 92
9	Material balances in carbonization.	93 - 108
10	On reactions occurring in catalytic pressure hydrogenation of coals and oil and their direction.	109 - 135
11	On resin formation in gasolines during storage and artificial ageing and its prevention.	136 - 155
12	Production of briquetting agents in hydrogenation plants.	156 - 161
13	Experiments in extractive hydrogenation of coal in Chamber 804. (preliminary report).	162 - 174
14	Extractive hydrogenation in the 10 litre furnace.	175 - 179
15	Dilution oil in the pressure extraction of coals.	180 - 184
16	Extraction experiments in rotary autoclaves for the production of primary bitumens.	185 - 193
17	Arsine.	194 - 200
18	Oleic alcohol as anti-foam agent for alkacid.	201 - 202
19	Regeneration of alkacid solutions Me 383.	203 - 213
20	Experiments in production of SO ₂ .	214 - 219
21	Alkacid-claus plant at Scholven.	220 - 231
21A	Obtaining highly concentrated SO ₂ by burning sulphur with oxygen.	232 - 239
22	The production of briquetting agents from products of hydrogenation, particularly in connection with a link between hydrogenation and distillation.	240 - 247
23	The production of quality coke via distillation of coal, with special use made of briquetting agents from slightly hydrogenated coals or hydrogenation residue.	248 - 290

(Item)

FRAME NOS.

24	The production of briquetting agents from slightly hydrogenated coals or by treatment of hydrogenation residue, with special consideration given to the connection between hydrogenation and distillation.	291 - 347
25	Briquetting on a technical scale, and distillation experiments with Upper Silesian coals, hydrogenation residue, and anhydrated coal.	348 - 371
26	The production of solid coke and fuel oil by distillation from briquets made from poorly baking coals, with the addition of slightly hydrogenated coal and hydrogenation residue.	372 - 401
27	The production of solid coke by distillation from briquets made from poorly baking coals, with addition of hydrogenation pitch and hydrogenation residue.	402 - 432
28	Technical experiments on the extraction of distillation tar and coke ("Hycoke") from poorly baking coals in conjunction with byproducts of hydrogenation (hydrogenation residue and slightly hydrogenated coal) by means of briquetting and subsequent distillation of the briquets. Gasification of the distillation coke.	433 - 464
29	Production of slightly hydrogenated coal.	465 - 471
30	Increasing the distillation yield by the use of catalysts and the addition of steam.	472 - 478
31	Improvement of the distillation yield by addition of thinning oil in the separating medium.	479 - 481
32	On benzol density in briquetting agents and binders.	482 - 485
33	Pressure hydrogenation of dry coal.	486 - 491
34	On binders and their composition.	492 - 498
35	Further possible uses in production of briquetting agents for hydrogenation.	499 - 502
36	Treatment of Upper Silesian coal and washing-gas tar in the same chamber for production of briquetting agents and fuel oils.	503 - 507
37	On the treatment of Silesian coal with distillation tar for production of fuel oil and briquetting agents.	508 - 511

T.O.M. Reel 204

(Item)		FRAME NOS.
38	Treatment of hydrogenation residues rich in asphalt by distillation in combination with coal in loose consistency.	512 - 525
39	Treatment of residues rich in asphalt.	526 - 528
40	Report on experiment made in extraction and distillation of slightly hydrogenated coal from Upper Silesia.	529 - 537
41	Fuel oils and hydrogenation products obtained by briquetting and distillation.	538
42	Estimate of cost of hydrogenation plant.	539 - 544
43	Estimate of combined costs of briquetting, distillation, gasification for large-scale experiment.	544a
44	Slightly hydrogenated coal from pit coal, with recirculation of the middle oils.	545 - 549
45	Estimate of cost of slightly hydrogenated coal (Anko).	550 - 558
46	Briquetting agents from hydrogenation plants.	559 - 564
47	Transforming hydrogenation residues into briquetting agents.	565 - 570
48	Briquetting tar (slightly hydrogenated coal).	571 - 577
49	Economy of use of hydrogenation residues, particularly from centrifugal separation for briquetting.	578 - 590
50	The briquet works at the Hohenzollern pit in Beuthan, Upper Silesia, and costs of running same.	591 - 595
51	Estimate of cost of treating 200,000 tons of pit coal yearly for conversion into bitumen to be used in distillation.	596
52	Discussion on the subject of binders on 2.11.1943.	597 - 601
53	Present stage of production in electrode coke by means of extracting hydrogenation.	602 - 607
54	File record of visit to Welheim on 25.2.42.	608 - 613
55	Cost estimate of s-Bi + Ni + electrode coke.	614 - 627

(Item)		FRAME NOS.
56	Investigations on anode material connected with the problem of backfiring in large-scale rectifiers. Soiling of the rectifier and precipitation during the supplementary heating process.	628 - 633
57	Examination of furnace residues in electrode moulding.	634 - 639
58	Tests in the hydrogenation extraction of pit-coals in Chamber 804.	640 - 658
59	Primary bitumens from large-scale Ludwigshafen and Welheim bitumens.	659 - 661
60	Present stage of tests in the production of electrode coke.	662 - 663
61	Production of electrode coke by thermal cracking under pressure.	664 - 666
62	On the subject of filtration of the sludge from Chamber 804, formed during production of primary bitumens.	667 - 671
63	Production of electrode coke by pressure distillation.	672 - 674
64	Fuel oil and electrode coke.	675 - 678
65	Pressure carbonization of filtered "Spülgas" tar from coal briquets bonded with hydrogenation bitumens.	679 - 680
66	Experiments in the filtration of sludge with various solvents.	681 - 686
67	Experiments in the filtration of sludge with various aldehydes.	687 - 691
68	The process of extractive hydrogenation in comparison with the methods of treatment at the Uhde and the normal hydrogenation to heavy oil surplus.	692 - 697
69	Improving filtration by the addition of Furfural.	698 - 699
70	Further experiments in filtration of hydrogenation sludges and results achieved.	700 - 701
71	Experiments in obtaining primary bitumens for the production of electrode coke.	702 - 705
72	The production of ash-free electrode coke via primary bitumens.	706 - 712
