

INDEX - MICROFILM REEL 207
(Original designation C - 115)

GENERAL SUBJECT

GROUP A

DOCUMENTS AND DRAWINGS OF THE GELSEN-
KIRCHNER BERGBAU A. G., FRIEDRICH KRUPP
A. G., ESSEN, RUHR GAS A.G., ESSEN,
HEINRICH KOPPERS A. G., ESSEN, STICKSTOFF-
WERKE HIBERNIA WANNE-EIKEL, ON VARIOUS
PROCESSES AND TYPES OF MACHINERY FOR COAL
DERIVATIVES.

GROUP B

ITEMS I, II AND III REFER TO APPARATUS
FOR CARBON DISULFIDE PRODUCTION. ITEM IV
CONSTITUTES A SET OF DETAILED DRAWINGS
FOR THE ROEHM & HAAS PLEXIGLAS CASTING
MACHINE.

Source of Documents: Collected by Dr. F. H. Reed
Solid Fuels Subcommittee.

Filmed by: J. I. O. A.

<u>GROUP A.</u> Item No.)	<u>Documents from Gelsenkirchen Bergbau A. G., Essen.</u>	<u>FRAME NOS.</u>
1	Advantages of tall coke ovens.	1 - 9
2	Coke plant practice of the United Steel Works.	10
3	Manufacture of sulfuric acid from hydrogen sulphide, from coke oven gas by wet catalysis.	11 - 15
4	Scheme of plant for recovery of motor methane, ethylene and motor gas.	16
5	Hydrocarbon recovery process.	17 - 32

Group A - Cont'd.

	<u>FRAME NOS.</u>
<u>II - Documents from Friedrich Krupp A.G., Essen.</u>	
1 Laboratory procedures for coke testing.	33 - 38
2 Operating data of three typical plants.	39 - 41
3 Reprint of papers by Dr. Demann and Adelsberger on research of coking of coal mixtures, etc.	42 - 84
<u>III - Documents from Ruhr Gas A. G., Essen.</u>	
1 Description of the extraction plant of Ruhr Gas A. G. A translation - extraction of sulphur by carbon disulphide.	85 - 87
<u>IV Documents from Heinrich Koppers, A. G., Essen.</u>	
1 Description of dry purification. Thylox and potash process.	88 - 91
2 Removal of H ₂ S from gas by potash process. Drawings of layout.	92 - 93
3 Description of Thylox H ₂ S process, with diagram.	94 - 98
4 Description of regeneration of potash reagent, with diagram.	99 - 100
5 Removal of H ₂ S from condensed gases by Koppers potash process.	101 - 104
6 Thylox process and its technical and economical results.	105 - 110
7 New process of wet desulfurization of coke oven gas.	111 - 126
8 Differential heating by Koppers.	127 - 138
9 Influence of double receiver in coking plants on output of hydrocarbon.	139 - 149

T.O.M. Reels 207

Reel 207 - Group A - Cont'd.

FRAME NOS.

V - Documents from Stickstoffwerke Hibernia Wanne-Eickel.

- | | | |
|---|--|-----------|
| 1 | Questions on the recovery of hydrocarbons from coke oven gas. | 150 - 151 |
| 2 | Drawing of nitrogen plant Hibernia. | 152 |
| 3 | Temperature pressure curves for pure gas oil. | 153 |
| 4 | Flow sheet for NH ₃ synthesis from coke oven gas and air. | 154 |
| 5 | Podbelniak distillation of pure gas oil. | 155 |

GROUP B - Carbon disulfide manufacture, Premnitz.

- | | | |
|-------|---|-----------|
| I - | Details of retort (Refer to FIAT Report No. 723). | 156 |
| II - | Details of retort cover (Refer to FIAT Report No. 723). | 157 |
| III - | Details of clean-out connection (Refer to FIAT Report No. 723). | 158 |
| IV - | Detailed drawings of Roehm & Haas Plexiglas casting machine (Refer to FIAT Report No. 714). | 159 - 212 |
