

INDEX - MICROFILM REEL 235
(Original designation 39 - E)

	<u>FRAME NOS.</u>
Simultaneous production of oxygen and nitrogen. Description and maintenance of plants for simultaneous production of oxygen and nitrogen.	5 - 110
Plant for separation of coke oven gases. Operating instructions for separation of coke oven gases	111 - 174
Drawings, diagrams of piping (tubing) and part lists for a simple column apparatus for the production of $5 \text{ m}^3 \text{ O}_2$ (99,7%) per hour from 50 m^3 air.	175 - 197B
Calculations, drawings and part lists for separating equipment producing $100 \text{ m}^3 \text{ N}_2$, $20 \text{ m}^3 \text{ O}_2$ (99,5%), $27 \text{ m}^3 \text{ O}_2$ (39,7%) from 147 m^3 air.	198 - 244
Drawings for a separation plant with precooling producing $100 \text{ m}^3 \text{ O}_2$ (99,7%) and $356 \text{ m}^3 \text{ N}_2$ (0,05-0,1% O_2 from 530 m^3 air.	245 - 277
Drawings for a double column apparatus with precooling, producing 80-87% $\text{m}^3 \text{ O}_2$ and $355 \text{ m}^3 \text{ N}_2$ from 435 m^3 air at medium pressure.	278 - 297
Drawings of a plant producing $800 \text{ m}^3 \text{ N}_2$ (99,95%) and $200 \text{ m}^3 \text{ O}_2$ (99, 5%) from 200 m^3 high pressure air and 800 m^3 low pressure air.	298 - 325
Drawings for an installation for a NH_3 -synthesis for the firm TOSCANA AZOTA, TURIN. Producing $160 \text{ m}^3 \text{ O}_2$ (99,5%) and $600 \text{ m}^3 \text{ N}_2$ from 870 m^3 air, and $1700 \text{ m}^3 \text{ H}_2\text{N}_2$ from m^3 converter-gas.	326 - 381
Drawings for a krypton installation with an output of 24.200 m^3 air per hour, with approximately 1,7 ata. appr. $1840 - 1760 \text{ m}^3$ air 5 ata. and appr. $360 - 440$ m^3 air 220 ata.	382 - 459
Drawings for a Linde-Frankl plant (small) producing $600 \text{ m}^3 \text{ O}_2$ (98%) from 3500 m^3 air.	460 - 487
Drawings for the Scholven plant, producing 4500 m^3 $\text{H}_2 + \text{N}_2$ from 7750 m^3 coke gas.	488 - 538
Drawings for a Linde-Frankl plant (large) of Brabag in Zeitz (a firm) producing $2.700 - 2900 \text{ m}^3 \text{ O}_2$ (98%) from $16 500 \text{ m}^3$ air.	539 - 580
