

INDEX - MICROFILM REEL 258
(Original designation BM-44)

TABLE OF CONTENTS

KISLOROD
(Oxygen)

(Oxygen - Bulletin of the USSR State Board for the Production and
Utilization of Oxygen)

FRAMES

1944, No. 1

P. L. Kapitza. Intensification of industrial processes
by use of oxygen. 1

Proceedings of the Scientific Advisory Committee

I. P. Bardin. The use of oxygen in the metallurgy of
ferrous metals. Considerations upon technical and
economical prospects. 4

Discussion. 15

	<u>FRAMES</u>
M. A. Shapovalov. Experimental data on a blast furnace run on blast enriched with oxygen.	18
Discussion.	29
<u>Experience and Practice</u>	
D. L. Gleezmanenko. Some practical data on the construction of the first oxygen plant and its exploitation at the Dniepropetrovsky Blast Furnace and Metallurgical Works.	31
<u>1944, No. 2</u>	
<u>Proceedings of the Scientific Advisory Committee</u>	
K. F. Pavlov. General directions in the research work on the complete gasification of low grade fuels with oxygen.	45
Discussion.	59
N. V. Karkhov. On the gasification of fine coal in a "boiling" layer with steam and air enriched with oxygen.	63
Discussion.	75
G. N. Poluboyarinov. On the gasification of "Moscow" lump coal with steam and oxygen blast.	79
S. A. Shashkin. On the gasification of "milled" peat in suspended layer.	92
Discussion.	102
S. S. Lachinov. High pressure gasification of fuels with oxygen and steam.	104
Discussion.	115

	<u>FRAMES</u>
G. O. Nussinov. Underground coal gasification and the problem of oxygen supplies.	117
Discussion.	126
<u>Book Review</u>	
The production of oxygen.	130
<u>1944, No. 3.</u>	
<u>Proceedings of the Scientific Advisory Committee</u>	
B. E. Vedenejeff. Some aspects of the use of oxygen in the power industry.	133
Discussion.	147
N. A. Semenenko. Prospects of the use of blow enriched with oxygen in the open-hearth furnaces (from the view-point of energetics).	150
K. G. Troubin. The use of oxygen in open-hearth process.	159
Discussion.	162
V. V. Kondakov. A manufacture of the silico-aluminum alloys by means of the pyro-metallurgical method with oxygen-rich blow.	165
Discussion.	174
V. A. Assonov. A new method of the absorbent briquetting in the production of the oxyliquits and prospects of their use.	178
Discussion.	188

Experience and Practice

J. N. Rjabinin. New insulation material for the oxygen tanks.	193
D. L. Gleezmanenko. Liquid oxygen and its utilisation.	199
V. A. Nikiforov. On the manufacture of the turbocompressors in the U.S.S. R.	205

1944, Issue 4.Proceedings of the Scientific Advisory Committee

A. G. Kassatkin. Prospects of the use of oxygen in the chemical industry.	209
Discussion.	221
K. M. Malin. The use of oxygen in the nitrous process of the sulphuric acid production.	225
G. K. Boresskov. The use of oxygen in the contact process of the sulphuric acid production.	235
Discussion.	247
N. M. Zhavorenkov. Prospects of the use of oxygen in the nitric acid production.	251
Discussion.	263
M. G. Eliashberg. Prospects of the use of oxygen in the sulphite-cellulose production.	266
Discussion.	274

Experience and Practice

N. V. Karkhov. The gasification of metallurgical coke with oxygen-enriched blow.	284
----------------------------------------------------------------------------------	-----

Listed below are pages in each issue which have not been translated:

Issue 1 -- pages 38-40.
 Issue 2 -- pages 54-59.
 Issue 3 -- pages 53-56.
 Issue 4 -- pages 60-64.

PAGES

1945, Issue 1

Proceedings of the Scientific Advisory Committee

M. A. Glinkov. Thermal problems of the use of oxygen in open-hearth process.	1
Discussion.	14
V. V. Mikhailov. A manufacture of Fe-Cr alloys in the blast furnace with oxygen-rich blow.	16
Discussion.	23
M. A. Shapovalov. A manufacture of steel by blasting of molten cast iron with oxygen.	25
G. P. Ivantsov. Some features of heat balance in Bessemer converting process on pure oxygen blow.	30
Discussion.	33
V. V. Kondakov. The run of blast furnace charged with peat on oxygen-rich blow.	35
Discussion.	44
<u>Technical News Abroad</u>	48
<u>Chronicle</u>	50
Index to KISLOROD for 1944	
<u>Bibliography</u>	

1945, Issue 2

Proceedings of the Scientific Advisory Committee

A. B. Chernysheff. The role of oxygen in long-distance gas distribution.	1
Discussion.	6
D. L. Gleezmanenko. Storage and transportation of the liquid oxygen.	8
Discussion.	16

Experience and Practice

J. N. Rjabinin. The pump for regasification of liquid oxygen.	20
S. E. Bressler and A. I. Zinovjeff. Automatic oxygen analyzer.	24
L. M. Jakimenko. The small size electrolytic cells for oxygen and hydrogen production.	30
I. G. Gurvich. A hydraulic principle compressor.	34
P. G. Sstrelhoff. Some notes on the technology of manufacture of mineral gels.	36

Technical News Abroad

Chronicle

Bibliography

1946, Issue 1

Proceedings of the Scientific Advisory Committee

V. A. Mojarov. The use of oxygen for steel manufacture
in reverberatory furnaces. 1

Discussion. 11

N. F. Reshetnikov. The oxygen industry of U. S. A. 15

Experience and Practice

I. N. Drobinin and S. E. Dunaev. A long distance trans- 33
portation of liquid oxygen.

I. P. Ishkin, B. I. Sserebrjanskaja and P. P. Ssokolov. 40
The first experimental transportation of oxygen in
tank cars.

Technical News Abroad

A novel form of refrigerator. 48

An air-reduction plant on the shipboard. 55

Chronicle 56

Bibliography 58

1946, Issue 2-3

Proceedings of the Scientific Advisory Committee

V. V. Kondakov. Experimental smelting of steel in 1
Bessemer converter on oxygen blow at Stalin's Kuznetzk-
Metallurgical Works.

Discussion. 13

	<u>PAGES</u>
S. V. Gljebov. A problem of refractories in connection with use of oxygen in metallurgical industry.	18
Discussion.	29
<u>Experience and Practice</u>	
I. F. Baryshev. A testing of tuyers presented for contest.	34
A symposium on refractory materials.	42
<u>Chronicle</u>	
<u>Bibliography</u>	
<u>1946, Issue 4.</u>	
<u>Proceedings of the Scientific Advisory Committee</u>	
A. N. Shashkov. New methods and apparatus of autogenous treatment of metals.	1
Discussion.	10
A. G. Dembo. The use of oxygen in medicine.	13
Discussion.	20
<u>Experience and Practice</u>	
V. T. Bykov. Experience of application of oxyliquits for superficial and underground work.	25
P. I. Rjumin and J. N. Rjabinin. Wear and friction of metals in liquid oxygen.	35
<u>Technical News Abroad</u>	
N. F. Reshetnikov and I. P. Ishkin. Portable plant for gaseous oxygen manufacture.	42
<u>Chronicle</u>	
<u>Bibliography</u>	

1946, Issue 5

Proceedings of the Scientific Advisory Committee

- I. P. Ussjukin. Present state and prospects for construction of plants for technical oxygen production. 1

Experience and Practice

- I. P. Ishkin and B. I. Sserebrjanskaja. The tests of tank-car liquid oxygen. 11
- M. B. Stolper. Technological scheme of Linde-Frankl oxygen plant and some features of its refrigeration cycle. 18
- N. F. Reshetnikov and I. P. Ishkin. The piston-rings and bushes from the graphiter. 24

Technical News Abroad

- N. F. Reshetnikov and I. P. Ishkin. Clark's low pressure plant for gaseous oxygen production. 26
- A. F. Ivanov. New methods for pure oxygen production. 34
- G. S. Valberg. The burning of Portland-cement clinker in shaft-kilns on oxygen-rich blow. 38
- A. B. Fradkov. On the economics of cascade process for the liquefaction of gases. 39
- New data on efficiency of the air compressors. 43

1946, Issue 6

Bibliography of Articles on Low-Temperature Processes.

1947, Issue 1.

M. K. Sucov. New problems of mechanical engineering in oxygen industry.	1
<u>Proceedings of the Scientific Advisory Committee</u>	
V. G. Fastovski. Commercial methods for production of krypton and xenon.	5
I. P. Ishkin. Development of argon production.	14
M. B. Stolper. Manufacture of argon.	20
Discussion.	26
D. L. Gleezmanenko. Some data on economics and organization of oxygen industry in Germany.	28
E. I. Bomshtein. Use of oxygen in German chemical industry.	35
<u>Scientific and Technical Section</u>	
N. I. Gelperin. Method for analytical calculation of processes of distillation and rectification of binary mixtures.	40
I. I. Strizhevski. Methods for determination of acetylene in liquid oxygen and in air.	48
J. S. Kan. On problem of design of tank cars for transportation of low-boiling gases.	53
<u>Technical News Abroad</u>	
A. B. Fradkov. Mechanical properties of aluminum-magnesium alloys at temperature of liquid oxygen.	54

1947, Issue 2

- S. Ya. Gersh. Low and high pressure in technical production of oxygen. 1

Scientific and Technical Section

- A. G. Zeldovich. Hydraulic resistance of regenerator nozzles with spiral slots. 7
- A. B. Fradkov. Choking velocity in tubular apparatus. 16

Experience and Practice

- M. O. Shumelishskii and B. I. Serebrjanskaje. Character of recovered liquid oxygen at the gasification plant of the machine building factory. 24

Technical News Abroad

- N. F. Reshetnikov. Synthetic gasoline from natural gas. 29
- A. B. Fradkov. Utilization of liquid oxygen for boosting aviation engines. 33

1947, Issue 3Proceedings of the Scientific Advisory Committee

- L. I. Levi. Fusion in cupolas on blowing with enriched oxygen. 1

Scientific and Technical Section

- S. Ya. Gersh and I. V. Marfenina. Production of oxygen in fractionating columns under elevated pressure. 15
- A. G. Zeldovich. Coefficient of heat-transfer in regenerators equipped with special slots. 28
- G. P. Kuziminov. Concerning the question of utilizing oxygen in engines with internal combustion. 36

Technical News Abroad

- D. L. Gleezmanenko. Utilizing argon and helium for welding metals. 44

1947, Issue 4Proceedings of the Scientific Advisory Committee

- I. P. Usjukin. Installations for the production of technological oxygen in the U.S.A. 1
- Yu. S. Lurie and G. S. Valverg. Calcining portland cement clinker with air and enriched oxygen 14

Scientific and Technical Section

- O. A. Benjaminovich. Separating gaseous mixtures by the condensation method. 27

Experience and Practice

- I. N. Drobinin and S. E. Dunaev. Double action high pressure pump for liquid oxygen. 39

Technical News Abroad

- A. F. Ivanov. Gasification of solid fuel in a steam oxygen blast. 46

1947, Issue 5.

- Thirtieth Anniversary of the great October socialist revolution and the oxygen industry. 1
- I. P. Usjukin. The All-Soviet Scientific Investigation Institute of Oxygen Machine Construction, its undertakings and achievements. 5

Scientific and Technical Section

- N. M. Zhavoronkov and I. E. Furmer. Concerning the question of hydraulic resistance and of the limits of charge in fractionation columns with perforated plates. 9
- S. Ya. Gersh and O. A. Benjaminovich. Thermodynamic properties of nitrogen at low temperatures and pressures up to 200 atms. 21
- I. P. Ishkin and P. Z. Burbo. Method of preventing the explosion of air-fractionation apparatus. 26

Bibliography

- Work of the Soviet scientists and specialists on the technique of low temperature and production of oxygen in industry for the thirty years (1917-1947). 35

1947, Issue 6Scientific and Technical Section

- N. I. Gelperin. Analytical method of computing the fractionation process of binary and multi-constituent liquid mixtures. 1
- S. I. Sergeyev. Computation of the damping of the rotor of a turbo-machine. 11
- V. G. Fastovski, Yu. V. Petrovski, M. B. Stolper. Concerning a rational scheme for treatment of air with extraction of krypton. 22
- I. I. Strizhevski. Methods of analyzing argon. 33

Technical News Abroad

- I. V. Marfenina and S. L. Girshberg. The maximum permissible quantity of liquid in the caps of a plate. 44
